Introduction

This document consists of both 'penny point' mark schemes, with specific answers and levels of response mark schemes. **All appropriate responses should be given credit.**

Where literary or linguistic terms appear in the mark scheme, they do so generally for the sake of brevity. Knowledge of such terms, other than those given in the specification, is **not** required.

Level of response marking instructions

Level of response mark schemes are broken down into three bands, each of which has a set of descriptors. The descriptors for the level show the average performance for the band.

Before you apply the mark scheme to a student's answer, read through the answer and annotate it (as instructed) to show the qualities that are being looked for. You can then apply the mark scheme. Use the key provided to judge how well your student meets each skill descriptor, where you feel they fall within each band, and to award marks. You should refer to the standardising material throughout your marking.

Step 1 Determine a band

Start at the lowest band of the mark scheme and use it as a ladder to see whether the answer meets the descriptors for that band. The descriptors for the band indicate the different qualities that might be seen in the student's answer for that band. If it meets the lowest band then go to the next one and decide if it meets this band, and so on, until you have a match between the band descriptor and the answer. With practice and familiarity you will find that for better answers you will be able to quickly skip through the lower bands of the mark scheme.

When assigning a band you should look at the overall quality of the answer and not look to pick holes in small and specific parts of the answer where the student has not performed quite as well as the rest. If the answer covers different aspects of different bands of the mark scheme you should use a best fit approach for defining the band and then use the variability of the response to help decide the mark within the band, i.e. if the response is predominantly band 2 with a small amount of band 3 material, it would be placed in band 2 but be awarded a mark near the top of the band because of the band 3 content.

Step 2 Determine a mark

Once you have assigned a band you need to decide on the mark. The exemplar materials used during standardisation will help. There will be an answer in the standardising materials which will correspond with each band of the mark scheme. This answer will have been awarded a mark by the Lead Moderator. You can compare the student's answer with the example to determine if it is the same standard, better or worse than the example. You can then use this to allocate a mark for the answer based on the Lead Moderator's mark on the example.

You may well need to read back through the answer as you apply the mark scheme to clarify points and assure yourself that the band and the mark are appropriate.

An answer which contains nothing of relevance to the question must be awarded no marks.

Spoken Language
