Unit 1 Fundamental principles of computing

Monday 15 January 2018

Morning

Time allowed: 2 hours

Materials

For this paper you must have:

- a ruler.

You may use:

- a calculator
- stencils or other drawing equipment (eg flowchart stencils).

Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.
- If you need more space use the additional pages at the back of this booklet.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 80. There are 50 marks in **Section A** and 30 marks in **Section B**.
- Both sections should be attempted.

Advice

- In all calculations, show clearly how you work out your answer.
- Use diagrams, where appropriate, to clarify your answers.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.

Section AAnswer **all** questions in this section.**Total for this section: 50 marks**In the multiple choice questions, only **one** answer per question is allowed.

For each question completely fill in the circle alongside the appropriate answer.

CORRECT METHOD

WRONG METHODS

If you want to change your answer you must cross out your original answer as shown.

If you wish to return to an answer previously crossed out, ring the answer you now wish to select as shown.

**0 1**

A device driver acts as a translator between hardware and

A other hardware.**B** software programs.**C** the system bus.**D** the user.**[1 mark]****1****0 2**

Which of these types of software is defined as 'the original source code is made freely available and may be redistributed and modified'?

A Freeware.**B** Open source software.**C** Shareware.**D** System software.**[1 mark]****1**

1 5 . 3 The off-the-shelf software requires customisation in order to meet the organisation's needs better.

What is this type of software called?

[1 mark]

Discuss the advantages and disadvantages to the organisation of customising the software in this way.

[6 marks]

20

16

‘Citizen Science’ uses the power of many people working together to collect or analyse huge data sets. These projects might record and analyse wildlife numbers or analyse images from radio telescopes to map the stars. Hundreds of thousands of people might take part in each project. Overall the project is supervised by professional scientists.

Citizen science projects have a genuine science outcome.

1 6 . 1

Describe how computer systems enable large numbers of volunteers to collaborate on citizen science projects.

[6 marks]

Turn over ►

16.2

Describe **two** characteristics of information that might affect the quality of the results of a citizen science project.
