**MATHEMATICS**

**9709/22**

Paper 2 Pure Mathematics 2

**May/June 2022**

**1 hour 15 minutes**

You must answer on the question paper.

You will need: List of formulae (MF19)

## INSTRUCTIONS

- Answer **all** questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do **not** write on any bar codes.
- If additional space is needed, you should use the lined page at the end of this booklet; the question number or numbers must be clearly shown.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.

## INFORMATION

- The total mark for this paper is 50.
- The number of marks for each question or part question is shown in brackets [ ].

This document has **16** pages. Any blank pages are indicated.

2 (a) Sketch, on the same diagram, the graphs of  $y = |2x - 9|$  and  $y = 5x - 3$ . [2]

(b) Solve the equation  $|2x - 9| = 5x - 3$ . [2]

7

The diagram shows the curves  $y = \sqrt{2\pi - 2x}$  and  $y = \sin^2 x$  for  $0 \leq x \leq \pi$ . The shaded region is bounded by the two curves and the line  $x = 0$ .

Find the exact area of the shaded region. [8]
