CAMBRIDGE INTERNATIONAL EXAMINATIONS Cambridge Ordinary Level

MARK SCHEME for the October/November 2014 series

5090 BIOLOGY

5090/62

Paper 6 (Alternative to Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October / November 2014 series for most Cambridge IGCSE[®], Cambridge International A and AS Level components and some Cambridge O Level components.

® IGCSE is the registered trademark of Cambridge International Examinations.

Mark schemes will use these abbreviations:

ο	;	separates marking points
0	1	alternatives
0	0	contents of brackets are not required but should be implied
0	R	reject
0	Α	accept (for answers correctly cued by the question, or guidance for examiners)
0	AW	alternative wording (where responses vary more than usual)
0	AVP	alternative valid point (where a greater than usual variety of responses is expected)
0	ORA	or reverse argument
о	<u>underline</u>	actual word underlined must be used by candidate (grammatical variants excepted)
0	max	indicates the maximum number of marks that can be given
ο	+	statements on both sides of the + are needed for that mark

Question	Expected Answer	Mark	Additional Guidance
1 (a)	В;		
	minutes ;		A min
	6 and 8 in the time column ;		
	<i>temperatures</i> : 50 ;	101	
	54 ;	[5]	
(b)	A - 25 ;		
	В - 28 ;	[2]	
(c) (i)	time on x axis, temperature on y axis + full labels ;		x-axis: t/min, y-axis: temp/°C
	only one linear scale on each axis, both using at least half the grid ;		
	all points clearly plotted ;		tolerance ± ½ small square
	two continuous lines between the points / two smooth curves / two lines of best fit ;		
	key or label to distinguish between the two sets of data ;	[5]

(ii)		both containers / AW ; r / AW / comparative statement (e.g. both				
	decrease similar amou the first 2 minutes / ref	[2]				
(iii)	larger surface area (SA	A) loses more heat ;		A ref. surface area : volume rat		
	by named heat loss ;		[max. 2]	A radiation / evaporation / convection / conduction		
(d)	volume/mass of conta	iner/water/liquid;		A 100 cm ³		
	starting <u>water</u> / <u>liquid</u> temperature ; A 65 °C					
	times of measuring ter	nperature ;		e.g. every two minutes, total measuring time		
	material of container (i	.e. plastic) ;				
	(same type of) liquid w	ithin containers ;	[max. 3]

Question	Expected Answer	Mark	Additional Guidance
2 (a) (i)	counting/adding up/estimating/AW number of squares or parts of squares (covered by leaf);	[1]	
(ii)	evidence of counting/adding up squares, e.g. ticks, numbers ;		
	6 - 8 ;	[2]	
(b)	clear outline, realistic shape and no shading ;		
	at least 100 mm in length ;		
	midrib (as double line, and to apex) and veins represented ;		
	labels: 2 from (leaf) stalk (petiole) / mid rib (main vein) / vein / blade (lamina) / cuticle ;	[4]	
(c) (i)	label palisade (cell) in correct position ;		A P for palisade
	label xylem (vessel) in correct position ;	[2]	A X for xylem A layers labelled
(ii)	palisade cell – contains (many) chloroplasts / chlorophyll / AW ;		
	xylem vessel – thick walls / (strong hollow) tubes / tubular / AW ;	[2]	A woody / lignin / strengthening
(iii)	palisade cell – light (needed for photosynthesis) + position near to upper surface/top / AW ;		
	xylem vessel – in midrib/veins/below main part of leaf / AW + ref. most support for leaf ;	[2]	
		[Total: 13]
