READ THESE INSTRUCTIONS FIRST

These instructions give details of the apparatus required by each candidate for each experiment in this paper. A summary of the questions that will be presented to the candidates is included, where appropriate, to allow the Biology teacher to test the apparatus appropriately. **No access to the question paper is permitted in advance of the examination session.**

If a candidate breaks any of the apparatus, or loses any of the material supplied, the matter should be rectified and a note made in the Supervisor's Report.

If arrangements are made for different sessions for different groups of candidates, care must be taken to ensure that the different groups of candidates are effectively isolated so that **no information passes between them.**

Supervisors are advised to remind candidates that **all** substances in the examination should be treated with caution. Pipette fillers and safety goggles should be used where necessary.

In accordance with COSHH (Control of Substances Hazardous to Health) Regulations, operative in the UK, a hazard appraisal of the examination has been carried out.

The following codes are used in the left margin where relevant.

C = corrosive substance

F = highly flammable substance

H = harmful or irritating substance

O = oxidising substance

T = toxic substance

N = harmful to the environment

Centres are reminded that they are **not** permitted to open the question paper envelopes before the examination. There are **no** exceptions to this. Centres are also referred to the Handbook for Centres which covers Security of Question Papers and Examination Materials and Practical Examinations in Science Subjects.

If there are any difficulties with any aspect of setting up this practical examination that the Centre is not able to resolve, it is essential for Centres to contact the Product Manager as soon as possible by e-mail to info@cie.org.uk, by fax to +44 1223 553558 or by phone to +44 1223 553554.

container label	volume of stock sucrose solution/cm ³	volume of distilled water/cm ³
A	0	100
B	25	75
C	Container to be left empty	
D	75	25
E	100	0

The stock sucrose solution should contain 556 g/dm³ of sucrose and be coloured with a few drops of red food colouring to represent fruit juice.

- (iii) 100 cm³ of stock sucrose solution (556 g/dm³ of sucrose) in a separate container labelled **concentrated fruit juice**.
- (iv) 100 cm³ of distilled water in a beaker, labelled **water**.
- (v) 2 × measuring cylinders, each capable of measuring 50 cm³ of fluid.
- (vi) Slice of (Irish) potato wrapped in plastic film.

This slice needs to be greater than 60 mm long and 10 mm thick.

- (vii) Sharp knife or scalpel.
- (viii) White tile on which to cut potato.
- (ix) Ruler (mm).
- (x) Forceps.
- (xi) Paper towels.
- (xii) View of a clock or timer.
- (xiii) 4 pieces of potato, each cut to 60 mm × 10 mm × 3 mm.

These pieces need to be cut approximately 30 minutes to 1 hour **before the start of the examination**. One piece should be submerged in each of the containers **A**, **B**, **D** and **E**. Cover each container with plastic film.

The Supervisor (**not** the Invigilator) is expected to carry out the practical aspects of **Question 1** and record their results in the space provided in the Supervisor's Report. This must be done during the examination, using the same apparatus and reagents as the candidates but out of sight of candidates.
