7010/13

Paper 1

October/November 2011

2 hours 30 minutes

Candidates answer on the Question Paper.

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO **NOT** WRITE IN ANY BARCODES.

Answer **all** questions.

No marks will be awarded for using brand names of software packages or hardware.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

For Examiner's Use

--

This document consists of **20** printed pages.

- 1 (a) Give **two** benefits of networking a set of computers.

For
Examiner's
Use

1

.....

.....

2

.....

..... [2]

- (b) A college decides to use network computers with wireless capability.

Give **one** advantage and **one** disadvantage of using wireless systems.

Advantage:

.....

Disadvantage:

..... [2]

- 2 The following table shows **three** applications which require specialist **output** devices.

For **each** application, suggest **one** possible **output** device and give a reason for your choice.

For
Examiner's
Use

Application	Output device	Reason for choice of device
A visually impaired person using a word processor		
Using CAD to design a new engine		
Monitoring a house for burglars		

[6]

- 3 A user wishes to use a word processing application. They can either use a *command line interface* (CLI) or a *graphical user interface* (GUI) to open this application.

For
Examiner's
Use

- (a) Describe how both methods could be used to select the application including any input hardware needed.

- (i) CLI

.....

.....

.....

.....

- (ii) GUI

.....

.....

.....

..... [4]

- (b) (i) What is meant by *automatic data capture*?

.....

.....

.....

- (ii) Name a device used in automatic data capture and describe an application that uses it.

Device:

Application:

.....

..... [3]

4 **Five** definitions and descriptions are shown below on the left hand side.

Five computer terms are shown on the right.

Match the definitions/descriptions on the left to the correct term on the right by drawing connecting arrows.

check if students' ages are
in the range 11 to 18

computer generated
operation of a chemical
process

software that looks for
information based on certain
key words

system where all the data
are collected first before
being processed in one go

typing in a password twice
to ensure it is correct

verification

validation

simulation

search engine

batch processing

For
Examiner's
Use

[5]

- 5 When new software is produced it is usually accompanied by *user documentation* and *technical documentation*.

For
Examiner's
Use

- (a) Explain these two terms:

user documentation:

.....

.....

technical documentation:

.....

..... [2]

- (b) The following list contains items that can be found in either or both types of documentation.

Tick (✓) the box which indicates where you would find each item.

Item	User documentation only	Technical documentation only	Both user <u>and</u> technical documentation
how to save a file			
program listing/coding			
hardware and software requirements			
file structures			
list of variables			
how to load the software			
meaning of errors/error messages			

[3]

- 6 (a) What is meant by the term *web browser*?

.....
 [1]

- (b) Rock-ICT has set up a website as shown below:

The screenshot shows a website titled "ROCK - ICT". The navigation bar includes links for Home, Sales, Basket, Checkout, and Payment. The Payment link is highlighted. Below the navigation bar, there is a section for choosing a payment method with radio buttons for credit card and debit card. A link "click here to go to CD website" is also present. Labels (i), (ii), and (iii) point to the main content area, the Payment button, and the link respectively.

Give the names of the **three** parts that have been labelled:

- (i)
 (ii)
 (iii) [3]

- (c) How does the website recognise the user's buying preferences as soon as they visit the website?

.....
 [1]

- (d) Hacking is one security issue associated with the Internet and emails.
 State **two** other security issues.

- 1

 2
 [2]

For
Examiner's
Use

- 7 The following flowchart inputs the size of a number of car engines; a value of -1 stops the input.

The following information is output: *average engine size* and *number of engines with size > 1.5*.

For
Examiner's
Use

Complete the trace table for the following input data:

1.8, 2.0, 1.0, 1.3, 1.0, 2.5, 2.0, 1.3, 1.8, 1.3, -1

For
Examiner's
Use

engine	count	number	size	average	OUTPUT

[6]

8 Robots are being introduced into a factory which makes engines.

For
Examiner's
Use

(a) Describe **three** ways this could affect the workers.

- 1
.....
2
.....
3
..... [3]

(b) One of the many advantages to management is the reduction in overall costs.

Give **two** reasons why using robots could reduce costs.

- 1
.....
2
..... [2]

(c) Give **two** other advantages to the management of introducing robots.

- 1
.....
2
..... [2]

- 9 A spreadsheet was set up to compare passenger costs for five airlines.

	A	B	C	D	E
1	Flight id	Distance (km)	Number of passengers	Total revenue (\$)	Cost per passenger (\$)
2	AA 151	3 000	240	60 000	250
3	AT 304	2 000	320	80 000	250
4	BR 106	1 500	150	45 000	300
5	CD 221	8 000	400	360 000	900
6	EX 115	6 000	280	140 000	500
7				Average cost:	

For
Examiner's
Use

- (a) What formula must be in E2 to calculate the cost per passenger.

..... [1]

- (b) Cell E7 is to contain the average passenger cost.

What formula would need to be placed in this cell?

..... [1]

- (c) It was decided to add two new columns (F and G) to find out if the airline made a profit or loss on each flight. The costs per flight are calculated by multiplying **Distance (km)** by 1/10th of the **Number of passengers**.

- (i) What formulas must be in column F?

	F
1	Flight costs (\$)
2	
3	
4	
5	
6	

[2]

- (ii) The formula = IF (F2 > D2, "Loss", "Profit") was added to cell G2. What would be output?

..... [1]

- (iii) What formula would be in G5 after replication down from G2?

..... [1]

10 A computer system is being used to monitor and control a chemical process.

For
Examiner's
Use

(a) Data are collected from sensors at regular intervals and compared with stored values.

(i) Describe how the computer uses this data when **monitoring** the chemical process.

.....

.....

.....

..... [1]

(ii) Describe how the computer uses this data when **controlling** the chemical process.

.....

.....

.....

..... [1]

- (b) What steps are necessary for the computer to control the temperature of the chemical process?

For
Examiner's
Use

.....

.....

.....

.....

.....

.....

.....

.....

..... [3]

- (c) Name **two** other sensors and give a different application where they are used.

sensor 1:

application:

.....

.....

sensor 2:

application:

.....

..... [4]

- 11 A digital alarm clock is controlled by a microprocessor. It uses the 24-hour clock system (i.e. 6 pm is 18:00).

For
Examiner's
Use

Each digit in a typical display is represented by a 4-digit binary code:

For example:

(clock display)

is represented by:

8	4	2	1	
0	0	0	0	1st digit (0)
1	0	0	0	2nd digit (8)
0	0	1	1	3rd digit (3)
0	1	0	1	4th digit (5)

- (a) What time is shown on the clock display if the 4-digit binary codes are:

8	4	2	1
0	0	0	1
0	1	1	0
0	1	0	0
1	0	0	1

(clock display)

[2]

- (b) What would be stored in the 4-digit binary codes if the clock display time was:

8	4	2	1	
				1st digit
				2nd digit
				3rd digit
				4th digit

[4]

(c) The clock alarm has been set at 08:00.

Describe the actions of the microprocessor which enable the alarm to sound at 08:00.

.....

.....

.....

.....

..... [2]

*For
Examiner's
Use*

- 12 A database has been set up to show details about countries. Part of the database is shown below.

For
Examiner's
Use

Country code	Country	Continent	Area (millions sq km)	Population (millions)	Coastline	Currency
CH	China	Asia	9.6	1320	Yes	yuan
IN	India	Asia	3.8	1150	Yes	rupee
PO	Poland	Europe	0.3	39	Yes	zloty
BO	Bolivia	America	1.1	9	No	boliviano
TI	Tibet	Asia	1.2	2	No	yuan
BR	Brazil	America	8.5	192	Yes	real
RO	Romania	Europe	0.2	22	No	leu
SA	Saudi Arabia	Asia	2.2	28	Yes	riyal
ZA	Zambia	Africa	0.7	12	No	kwacha

- (a) How many fields are in each record?

..... [1]

- (b) Using **Country code** only, what would be output if the following search condition was used?

(Population (millions) > 1000) OR (Continent = "Asia")

.....
..... [2]

- (c) Write down a search condition to find which countries have a land area less than 3 million square km and also have a coastline.

.....
.....
..... [2]

- (d) If the database was sorted in **descending order** of population size, using **Country code** only, what would be the order of countries in the database?

.....
.....
..... [2]

- 13 The following flowchart shows how barcodes are used when a customer buys items from the supermarket. Barcodes are used to find the prices and to carry out stock control. Several stages are missing from the flowchart. These stages are shown in the item list below.

For
Examiner's
Use

Insert the correct statements, **using numbers only**, to complete the flowchart.

[5]

- 14** An alarm, Y, sends a signal ($Y = 1$) when certain fault conditions in a chemical process are detected. The inputs are:

For
Examiner's
Use

Input	Binary value	Condition
A	1	acidity > 5
	0	acidity $\leq$ 5
T	1	temperature $\geq$ 120°C
	0	temperature < 120°C
S	1	stirrer bar ON
	0	stirrer bar OFF

The alarm, Y, returns a value of 1 if:

either (i) temperature $\geq$ 120°C AND stirrer bar is OFF

or (ii) acidity > 5 AND temperature < 120°C

(a) Draw the logic circuit for the above system using these logic gates.

[5]

(b) Complete the truth table for this alarm system.

A	T	S	Y
0	0	0	
0	0	1	
0	1	0	
0	1	1	
1	0	0	
1	0	1	
1	1	0	
1	1	1	

[4]

15 A student gave the following **three** computer definitions.

Give the name of the term being described in **each** case.

- (i) *“a signal from a device sent to a computer causing the CPU to stop its current operation temporarily”*

.....

- (ii) *“an exchange of signals between two devices when communicating to ensure synchronisation”*

.....

- (iii) *“a temporary memory to store data waiting to be sent to a device”*

.....
 [3]

For
Examiner's
Use
