UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the May/June 2006 question paper

0610 BIOLOGY

0610/02

Paper 2, maximum raw mark 80

These mark schemes are published as an aid to teachers and students, to indicate the requirements of the examination. They show the basis on which Examiners were initially instructed to award marks. They do not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published *Report on the Examination*.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the Report on the Examination.

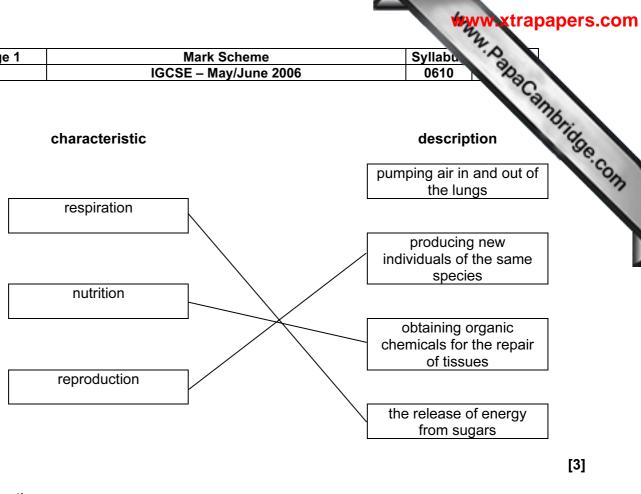

The minimum marks in these components needed for various grades were previously published with these mark schemes, but are now instead included in the Report on the Examination for this session.

• CIE will not enter into discussion or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2006 question papers for most IGCSE and GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

			IGCSE – May/June 2006 0610	Pap
(a)	clea	ar land	for agriculture / cattle / crops;	dy
	clea	ar land	for building / factories / houses;	A trapar
	clea	ar land	for roads / airports;	•
	rem	nove tir	mber for use,	
	Any	∕ two –	1 mark each	
(b)	(i)	reduc	ed photosynthesis;	
		becau	use of less plants;	
		decre	ased removal from / increases carbon dioxide levels in atmosphere;	
		increa	ased release of carbon dioxide into atmosphere;	
		from b	ourning / increased rotting;	
		accep	ot other valid points	
		Any fo	our – 1 mark each	
	(ii)	erosic	on by rain;	
		more	leaching by rain;	
		becau	use of lack of canopy;	
		reduc	ed humus input to soil;	
		deser	tification;	
		Any tv	wo – 1 mark each	

(iii) disrupt food chains;

knock on effect within food webs / alter balance in food web;

destruction of potential resources;

loss of genetic pool material;

loss of biodiversity;

loss of habitats;

Any two – 1 mark each [2]

3	(a)	(i) label linked to sperm duct;	Cambridge.C
		(ii) label linked to ureter;	Tide
		(iii) label linked to urethra;	100
	(b)	produce sperm;	
		produce testosterone / male hormone;	[2]
	(c)	condom placed over penis;	
		cutting and tying sperm duct / vasectomy;	[2]
	(d)	male parent / father has XY sex chromosome;	
		passes either X or Y to each child;	
		if X then child is female;	
		if Y then child is male;	
		as females always pass X to all children;	
		Any three – 1 mark each	[3]
		Credit relevant points shown on annotated genetic diagram	
			[Total: 10]
4	(a)	(i) white;	[1]
		(ii) Rr;	[1]
	(b)	Rr x Rr parents;	
		R r R r gametes;	
		RR Rr rr offspring genotypes;	
		3 red flowers : 1 white flower offspring phenotypes;	
		matches ratio of seeds / 133 : 44;	
		Any four – 1 mark each	[4]
	(c)	1 red flower : 1 white flower;	[1]
	(d)	water;	
		oxygen / air;	
		heat / warmth / suitable temperature;	[3]

IGCSE – May/June 2006 (a) (i) sun; (ii) evaporation; (iii) transpiration / evapotranspiration;	Syllabu A. Dabac annoning
(ii) evaporation;	ambria
	100
(iii) transpiration / evapotranspiration;	The state of the s
(iv) moist air rises;	
cooling happens;	
condensation;	
Any two – 1 mark each	[2]
b) use in photosynthesis / raw material for reactions;	
acts as a solvent;	
transportation / carries substances as it moves in plant;	
support / turgor;	
Any two – 1 mark each	[2]
c) (i) water absorbed by osmosis;	
cell has partially permeable membrane; R – wall	
concentration gradient (water) between soil and cell;	
soil with higher (water) concentration;	
Any three – 1 mark each	[3]
(ii) sea water reverses concentration (water) gradient;	
plants /roots lose water/ exosmosis occurs;	
wilting occurs;	
water logged soil;	
no / little oxygen;	
root cells die / active transport stops;	
Any three – 1 mark each	[3]
