Paper 1 Multiple Choice

0654/11 October/November 2010 45 minutes

Additional Materials:

Multiple Choice Answer Sheet Soft clean eraser Soft pencil (type B or HB is recommended)

READ THESE INSTRUCTIONS FIRST

Write in soft pencil.

Do not use staples, paper clips, highlighters, glue or correction fluid.

Write your name, Centre number and candidate number on the Answer Sheet in the spaces provided unless this has been done for you.

There are **forty** questions on this paper. Answer **all** questions. For each question there are four possible answers A, B, C and D.

Choose the **one** you consider correct and record your choice in **soft pencil** on the separate Answer Sheet.

Read the instructions on the Answer Sheet very carefully.

Each correct answer will score one mark. A mark will not be deducted for a wrong answer. Any rough working should be done in this booklet. A copy of the Periodic Table is printed on page **20**.

This document consists of 17 printed pages and 3 blank pages.

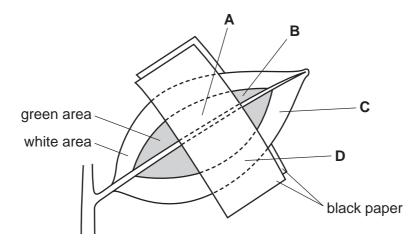

- 1 Which features are found in mammals but **not** in other vertebrates?
 - A claws and hair
 - B claws and lungs
 - C hair and milk
 - D lungs and milk
- 2 Which cells produce starch in their cytoplasm?
 - A all animal cells
 - B all plant cells
 - **C** some animal cells
 - D some plant cells
- **3** The diagram shows a leaf, still attached to a plant, with both green and white regions that have been partly covered with black paper.

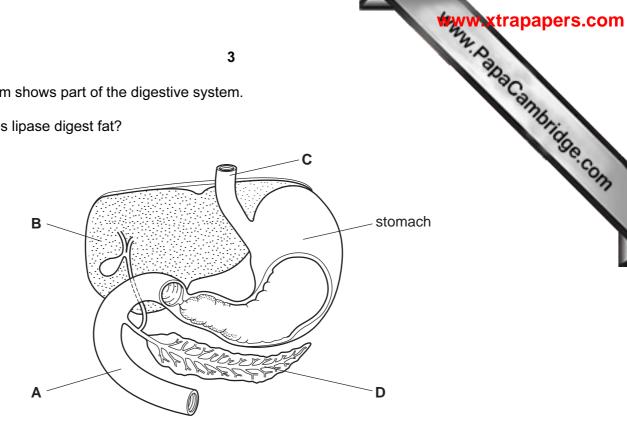

The leaf is left in bright light for six hours and then tested for starch.

Which area of the leaf turns blue-black after the starch test?

The diagram shows part of the digestive system. 4

Where does lipase digest fat?

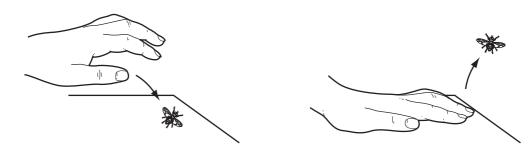

- How do bacteria cause tooth decay? 5
 - They release acids that dissolve enamel. Α
 - В They release alkalis that dissolve enamel.
 - С They release enzymes that digest enamel.
 - D They release ethanol that digests enamel.
- 6 What happens during anaerobic respiration in muscle cells?
 - carbon dioxide is released Α
 - B energy is released
 - С lactic acid is oxidised
 - D water is released
- 7 Which row is correct for the blood in veins?

	direction of flow	oxygen content
Α	away from heart	always high
в	away from heart	high or low
С	towards heart	always low
D	towards heart	high or low

constant 8 Which internal conditions in a human being are maintained at a more or less constant result of homeostasis?

	blood glucose	blood insulin	body temperature				
Α	\checkmark	\checkmark	\checkmark				
в	\checkmark	\checkmark	×				
С	\checkmark	×	\checkmark				
D	x	\checkmark	\checkmark				

9 The diagram shows two stages in an attempt to kill a fly.

What else does the diagram show?

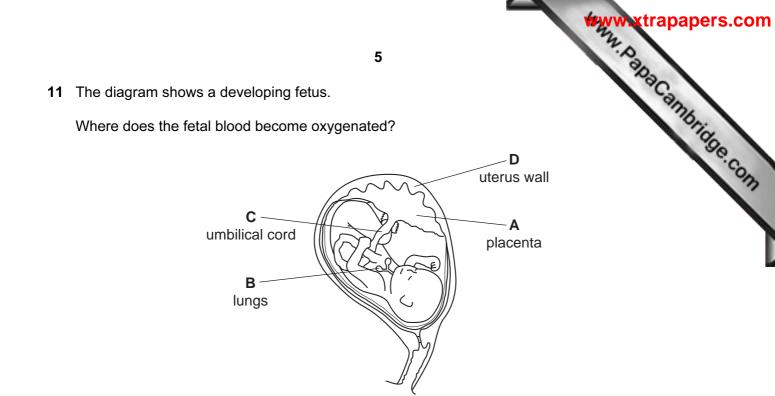

- Α The fly converts impulses to stimuli.
- В The fly responds to a stimulus.
- The hand produces impulses. С
- The hand is a receptor. D
- 10 The diagram shows a wind-dispersed, single-seeded fruit.

Structure P is an extension of which part?

- A cotyledon
- В leaf
- С ovary wall
- D testa

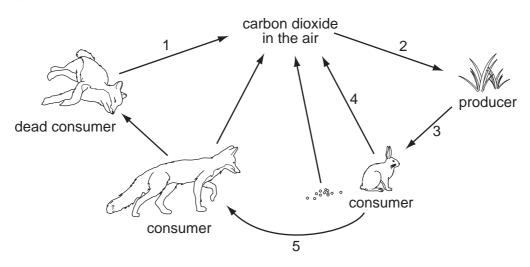

4

12 The alleles for a particular character are H and h.

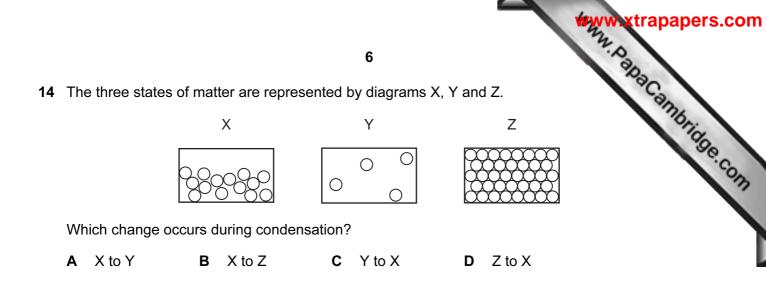

Which term describes an organism whose genotype is Hh?

- A heterozygote
- **B** homozygote
- C phenotype
- D recessive
- **13** The diagram shows part of the carbon cycle which includes a food chain.

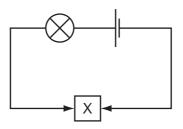

Which arrows are part of the food chain?

A 1 and 2 **B** 2 and 3 **C** 3 and 5 **D** 4 and 5

15 The diagram shows a circuit.

Solid X makes the lamp light.

What is solid X?

- A rubber
- B silicon(IV) oxide
- C sulfur
- D zinc

16 Which two elements are present in the compounds found in petroleum?

- A carbon and nitrogen
- **B** carbon and oxygen
- C hydrogen and carbon
- D hydrogen and oxygen
- 17 Which molecules join into long chains to make proteins?
 - A amino acids
 - B ethene
 - C glucose
 - D starch

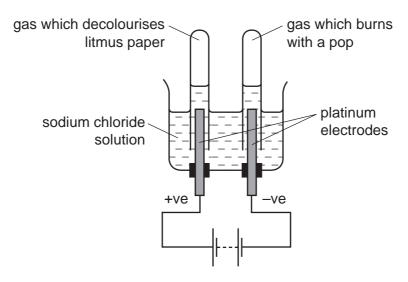

www.xtrapapers.com

- 18 Which material is made from silicon(IV) oxide combined with metal oxides?
 - A brass
 - B glass
 - C polythene
 - D steel
- 19 Carbon is used in the extraction of some metals from their ores because
 - 1 carbon forms strong alloys with metals,
 - 2 carbon reacts with oxygen in the ore.

Which of these statements are correct?

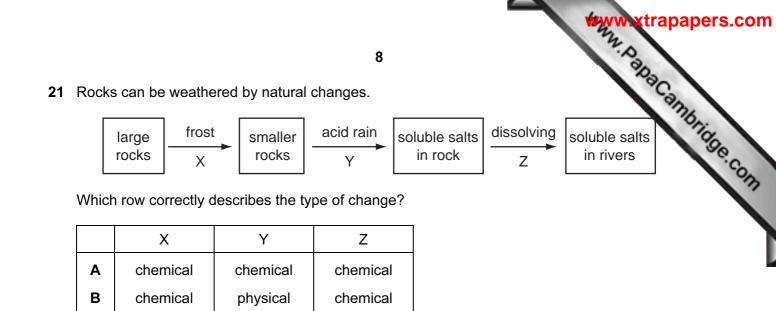

- A 1 only
- B 2 only
- C both 1 and 2
- D neither 1 nor 2
- **20** Sodium chloride solution is electrolysed and a gas is collected at each electrode.

One gas decolourises moist litmus paper, the other gas burns with a pop.

Which statement is correct?

- A Chlorine gas is collected at the anode.
- **B** Hydrogen gas is collected at the anode.
- **C** Oxygen gas is collected at the cathode.
- **D** The cathode is the positive electrode.

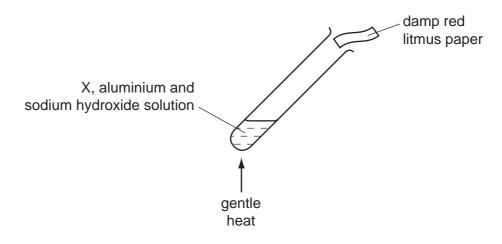

22 Compound X is heated gently with aluminium powder and sodium hydroxide solution.

physical

chemical

physical

The damp red litmus paper turns blue.

What does X contain?

- A carbonate
- B chloride
- **C** nitrate

С

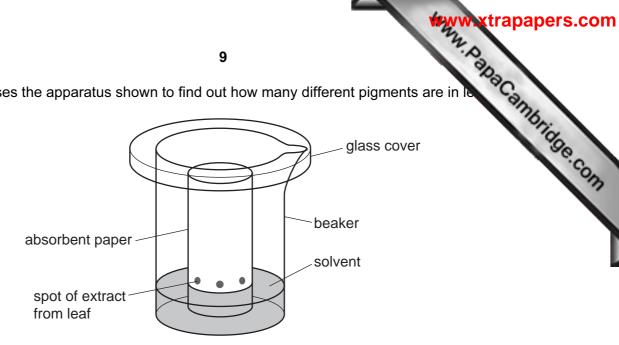

D

physical

physical

D sulfate

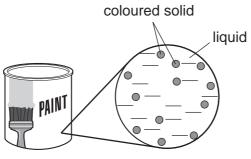

23 A student uses the apparatus shown to find out how many different pigments are in R

9

What is this separation method called?

- chromatography Α
- distillation В
- С evaporation
- D filtration
- 24 Paint contains particles of solid finely dispersed in a liquid.

magnified view of paint

Which term correctly describes paint?

- Α emulsion
- В gel
- С sol
- solution D

ed as a combined ed as a 25 Waste material buried underground can decay to form gas X which can be used as a

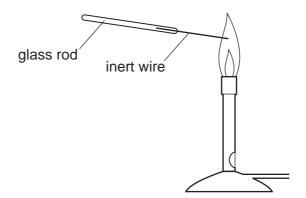

X burns to form an oxide Y and water.

```
X + oxygen \rightarrow Y + water
```

What is Y?

- Α carbon dioxide
- В nitrogen dioxide
- С sulfur dioxide
- D sulfur trioxide
- 26 In separate experiments, an inert wire is dipped into two solutions, P and Q.

The wire is then placed in the flame of a Bunsen burner.

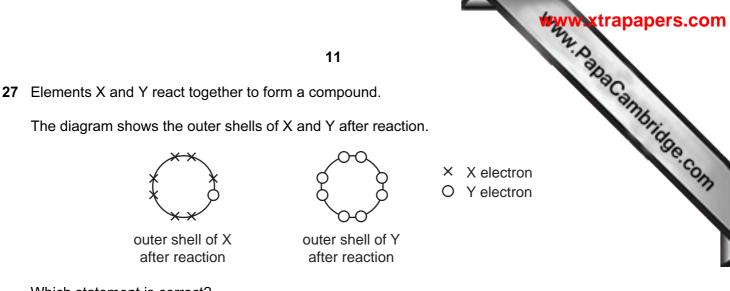

The table shows the results.

	solution P	solution Q
colour of Bunsen flame	yellow	green

Which metal ions are present in the solutions?

	Р	Q
Α	copper	calcium
в	copper	sodium
С	sodium	calcium
D	sodium	copper

Which statement is correct?

X is in group VII and has formed the X^+ ion. Α

В X is in group VII and has formed the X^- ion.

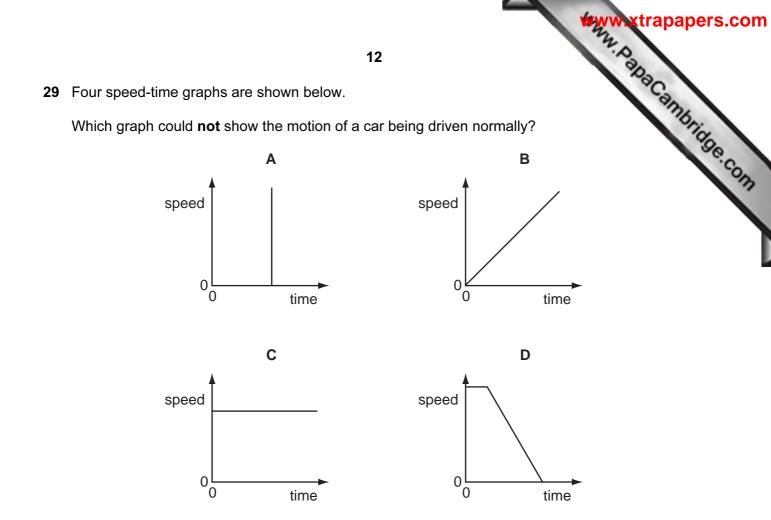

С X is in group VIII and has formed the X^+ ion.

D X is in group VIII and has formed the X^- ion.

28 100 cm^3 of a liquid has a mass of 85 g.

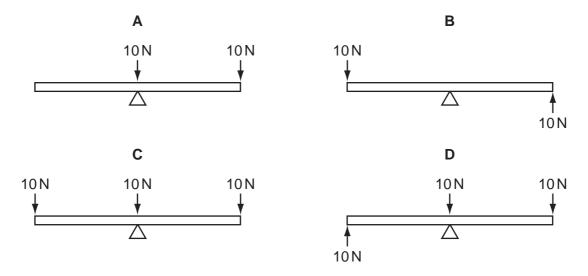

How does the density of this liquid compare with the density of water (1 g/cm^3) ?

- Its density is higher than that of water. Α
- В Its density is lower than that of water.
- С Its density is the same as that of water.
- D It is impossible to say with only this data.

30 Four beams are each balanced on a pivot at their centres as shown. Forces are then applied to the beams as shown.

Which beam will not rotate when the forces shown are applied?

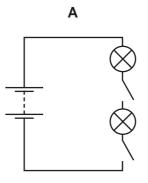

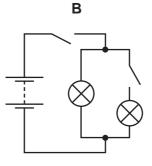

In which activity is the power of the man the smallest?

- lifting a mass of 1 kg through a height of 0.1 m in 1 second Α
- В lifting a mass of 1 kg through a height of 0.1 m in 10 seconds
- lifting a mass of 1 kg through a height of 1 m in 1 second С
- D lifting a mass of 10 kg through a height of 0.1 m in 1 second
- 32 1 kg of water and 1 kg of aluminium are heated to the same temperature and then allowed to cool in a room.

Which of these could be a reason why the aluminium cools more quickly than the water?

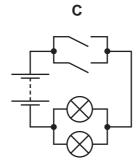

- Aluminium does not evaporate but water does. Α
- В Aluminium has a higher specific heat capacity than water.
- С Aluminium has a lower specific heat capacity than water.
- D Aluminium is a better insulator of heat than water.
- 33 Which diagram shows a circuit that will allow the lamps to be switched on and off independently?

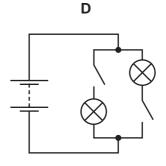

Www.PapaCambridge.com

xtrapapers.com

34 The diagram shows four electric kettles plugged into a 4-way adaptor. An extension lead connects the adaptor to a single mains plug. The mains plug is designed to work without a fuse.
extension lead
mains plug
adaptor

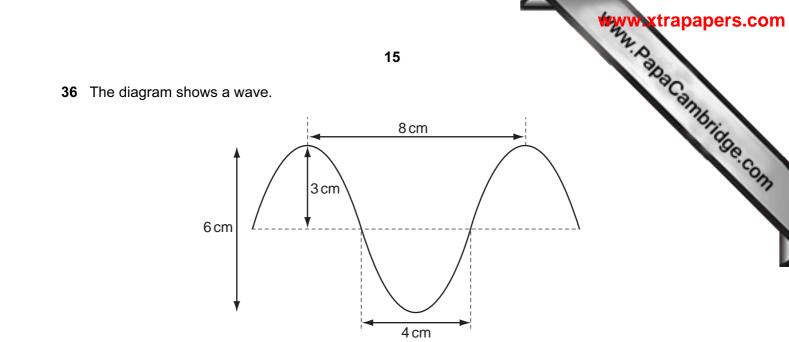

Why is this use of the adaptor dangerous?

- A The extension lead connecting the adaptor to the mains plug will overheat.
- **B** The heating elements in the kettle will overheat.
- **C** The leads connecting the kettles to the adaptor will overheat.
- **D** The water in the kettles will overheat.
- **35** A circuit consists of three resistors, X, Y and Z, connected to a battery as shown in the diagram.

The potential difference across resistor Y is measured.

In which position should the voltmeter be connected to do this?

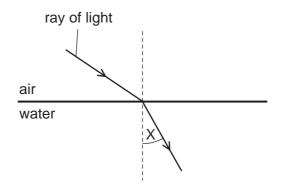

What are the amplitude and the wavelength of this wave?

	amplitude/cm	wavelength/cm
Α	3	4
в	3	8
С	6	4
D	6	8

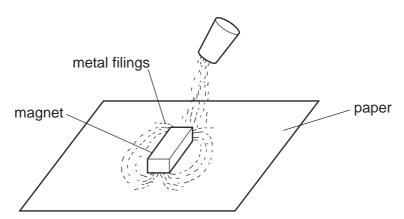

37 The diagram shows a ray of light passing from air into water.

What is the name of angle X?

- A the angle of incidence
- B the angle of reflection
- **C** the angle of refraction
- **D** the critical angle

shown cambridge com 38 The pattern of field lines around a bar magnet on a sheet of paper can be shown metal filings on to the paper.

From which metal could the filings be made?

- Α aluminium
- В copper
- С iron
- D zinc
- 39 Compared with beta-particles and gamma-rays, alpha-particles
 - **A** are the only radiation to carry a charge.
 - have the greatest ionising effect. В
 - С have the greatest penetrating effect.
 - have the smallest mass. D
- 40 A small amount of a substance contains 72 billion radioactive atoms. The half-life of the substance is 4 hours.

How many radioactive atoms would remain after 12 hours?

- 6 billion Α
- 9 billion В
- С 18 billion
- D 24 billion
