MARK SCHEME for the May/June 2015 series

0607 CAMBRIDGE INTERNATIONAL MATHEMATICS

0607/41

Paper 4 (Extended), maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2015 series for most Cambridge IGCSE[®], Cambridge International A and AS Level components and some Cambridge O Level components.

Abbreviations

cao	correct answer only
dep	dependent
FT	follow through after error
isw	ignore subsequent working
oe	or equivalent
SC	Special Case
nfw	not from wrong working
soi	seen or implied

Qu.	Answer	Mark	Part Marks
1			
(a)	8	1	
(b)	10	1	
(c)	6	1	
(d)	4.5	2	B1 for [LQ =] 3.5 or [UQ =] 8
(e)	5.375	1	
2	Correctly equating one set of coefficients Correct method to eliminate one variable $x = 1.5$ $y = -2$	M1 M1 B1 B1	or making x or y the subject of one equation or substituting into other equation or sketch of their two lines If 0 scored, SC1 for correct substitution into one of original equations to find other variable
3			
(a)	20	1	
(b)	13.225	2	or M1 for $(264.5 \text{ or } 260 \text{ or } 269) \div \textit{their (a)}$ oe
4			
(a)	Reflection $x = -1$ oe	1 1	Any combination of transformations scores 0
(b)	$(-1, 4), (-1, 2), (0, 2)$	3	M2 for any rotation 90° clockwise If 0 scored, SC2 for rotation 90° anti-clockwise about $(-1, 6)$ or SC1 for any rotation 90° anti-clockwise
(c)	Reflection $y = x + 7$ oe	1 1FT	Any combination of transformations scores 0 FT if SC2 scored in (b) to $y = -x + 5$
