- (c) Analyse the role of management styles in motivating employees in a company such as Kellogg's.
  - authoritarian style motivates staff where employees are not selfmotivated and they are wary about making their own decisions. Some employees prefer to be told what to do
  - paternalistic mangers still dictates to the employee; however, they try to encourage and motivate staff to work and think independently
  - democratic style is time consuming and takes time; however, employees feel part of the decision-making process and as a result part of Kellogg's
  - *lasisez-faire* style leaves the employees alone to make up their own choices and makes very few demands on the employees
  - management in Kellogg's can vary from authoritarian to paternalistic, democratic to *laissez-faire*. All styles should be used within such a large organisation depending on the nature of the task and the employees involved
  - the management's style and ability can have a significant impact on motivation of employees and how effectively resources may be used
  - good managers can bring about substantial productivity gains by motivating staff
  - bad managers can lead to employees feeling stressed and de-motivated, resulting in low productivity, absenteeism and high labour turnover.

Advancement in the mediums through which to communicate has improved greatly. Kellogg's overall efficiency will have improved and their customer needs met more effectively.

Advantages:

- less paper used, better for the environment
- technology can greatly speed up the communication network within Kellogg's
- communication can now operate on a global scale instantly.
- managers and employees can access information from almost anywhere
- Kellogg's can communicate better with its employees/customers; the e-mail and Internet are quick and easily accessible
- technology means that market research is carried out quicker and analysed easier.

Disadvantages:

- it will cost Kellogg's a lot of money to bring in and constantly update the latest technology
- it can also encourage a culture where little to no face-to-face contact is made
- not all communications should be sent over the Internet due to confidentiality
- employees may need to be trained on the new technology, resulting in increased costs and downtime
- technology can break down.

In conclusion the impact of technology will impact on all stakeholders and they have to be considered when considering improving technology. It is necessary in today's IT culture but Kellogg's still needs to consider the importance of meeting and discussing issues face-to-face.

As part of their discussion, candidates should consider both positive and negative aspects and come to a final judgement.

Candidates are expected to evaluate throughout their answers.

**2** (a) Explain the term span of control, using an example to illustrate your answer.

The number of subordinates whom a manager is required to supervise directly. If Samuel Jones has many subordinates answerable to him, then the span of control is said to be wide. If the number of employees is low, then the span of control is narrow. Samuel is in charge of monitoring 10 employees; therefore his span of control is wide.

e)	Evaluate the usefulness of final accounts to a business such as SJ Mechanics.	
	<ul> <li>Usefulness of Final Accounts:</li> <li>assesses overall profit – the business will be able to establish how much profit has been made and compare it with previous years and other businesses</li> <li>it will help Samuel Jones control costs – it can be used by managers to see how well a business has controlled its overheads</li> <li>it measures growth – a business can use the Income Statement to help measure its growth. A guide to a business's growth may be the value of sales compared with the previous years</li> <li>other stakeholders – suppliers may look at the information to establish how much credit to allow. Potential investors may look at it to see their potential returns</li> <li>it can show trends from year to year</li> <li>it can analyse the asset structure of the business</li> <li>it can analyse the capital structure of the business</li> <li>a statement of financial position may provide a guide to the firm's value.</li> </ul>	
	<ul> <li>However, drawbacks of Final Accounts:</li> <li>it depends greatly on the qualitative data also available to the various users</li> <li>also, the accounts may be "window dressed" – they may minimise the profit stated for tax purposes. Or businesses can manipulate data to present a healthier picture than what is reality.</li> <li>however, the value of many assets listed may not reflect the amount of money the business would receive if it were sold</li> <li>a statement of financial position is a static statement – the figures listed may only be valid for day of being published. Some figures will have to be changed.</li> </ul>
