[AC231]

THURSDAY 15 MAY, MORNING

AC231

TIME

2 hours 30 minutes.

INSTRUCTIONS TO CANDIDATES

Write your Centre Number and Candidate Number in the spaces provided at the top of this page.

Answer **all three** questions.

Write your answers in the spaces provided.

INFORMATION FOR CANDIDATES

The total mark for this paper is 70.

Questions 1 and 2 are practical exercises each worth 25 marks.

Question 3 is a planning exercise worth 20 marks.

Quality of written communication will be assessed in **Question 3(b)**.

You may not have access to notes, textbooks and other material to assist you.

A Periodic Table of the Elements, containing some data, is included in this question paper.

For Examiner's use only

BLANK PAGE
(Questions continue overleaf)

(a) (i) You are provided with a solid, labelled A. Carry out the following tests. Record your observations in the spaces below.

Test	Observations
1 Describe the appearance of A.	[1]
2 Dissolve two spatula measures of A in approximately 50 cm ³ of water. Keep this solution for use in further tests.	[1]
3 Place 4 cm ³ of the solution from test 2 in a test tube. Add an equal volume of concentrated hydrochloric acid.	[1]
4 Place 4 cm ³ of the solution from test 2 in a test tube. Add an equal volume of 1,2-diaminoethane solution.	[1]
5 (a) Place 4 cm ³ of the solution from test 2 in a test tube. Slowly add an equal volume of sodium hydroxide solution. (b) Add a further 5 cm ³ of sodium hydroxide solution.	[2]
6 Place 4 cm ³ of the solution from test 2 in a test tube. In a fume cupboard, add an equal volume of concentrated ammonia solution.	[1]
7 Place 4 cm ³ of the solution from test 2 in a test tube. Add 1 cm ³ of barium chloride solution dropwise.	[1]

(ii) Identify A.

[2]

Examiner Only	
Marks	Remarks

Test	Observations
1 Describe the solution. Include a description of its smell.	[1]
2 Place 4 cm ³ of the solution in a test tube. Add an equal volume of potassium dichromate solution and acidify with 1 cm ³ of dilute sulfuric acid. Heat in a water bath for five minutes.	[1]
3 Place 4 cm ³ of the solution in a test tube. Add half a spatula measure of sodium hydrogencarbonate.	[2]

THURSDAY 15 MAY AND FRIDAY 16 MAY

AC231 AC232

APPARATUS AND MATERIALS LIST

Advice for centres

- All chemicals used should be at least laboratory reagent specification and labelled with appropriate safety symbols, e.g. irritant.
- For centres running multiple sessions – candidates for the later session should be supplied with clean, dry glassware. If it is not feasible then glassware from the first session should be thoroughly washed, rinsed with deionised water and allowed to drain.
- **Ensure all chemicals are in date otherwise expected observations may not be seen.**

Practical Examination 1

Each candidate must be supplied with safety goggles or glasses.

Question 1

Each candidate must be supplied with:

- one 50 cm³ burette of at least class B quality
- one 25 cm³ pipette of at least class B quality
- one 250 cm³ volumetric flask
- a safety pipette filler
- three conical flask of 250 cm³ capacity
- a funnel for filling the burette (optional)
- a white tile or white paper
- 250 cm³ beaker
- a wash bottle containing deionised water
- a retort stand and clamp
- weighing bottle (or equivalent)
- approximately 9.0 g of ammonium iron(II) sulfate
- access to an accurate balance (reading to 2 decimal places)
- glass rod
- spatula
- 250 cm³ of dilute sulfuric acid (approximately 1.0 mol dm⁻³) labelled **dilute sulfuric acid** and **caution**
- 150 cm³ of 0.02 mol dm⁻³ acidified potassium manganate(VII) labelled **potassium manganate(VII) solution**.

Practical Examination 1

Question 2

Each candidate must be supplied with:

- a small beaker
- five test tubes
- a boiling tube
- a test tube holder
- a test tube rack
- a spatula
- a stirring rod
- a heat-proof mat
- a Bunsen burner
- several plastic droppers
- deionised water
- kettle to supply hot water (optional)
- hydrated copper(II) sulfate (approximately 3.0 g) labelled **A**
- about 10 cm³ of concentrated hydrochloric acid in a stoppered reagent bottle labelled **concentrated hydrochloric acid** and **corrosive**
- about 10 cm³ of an aqueous solution of 1,2-diaminoethane (approximately 0.2M) labelled **1,2-diaminoethane**
- about 10 cm³ of an aqueous solution of sodium hydroxide (approximately 2.0M) labelled **sodium hydroxide** and **corrosive**
- a reagent bottle containing concentrated ammonia labelled **concentrated ammonia** and **irritant** (available in the fume cupboard(s)). Each candidate will only need about 10 cm³
- about 10 cm³ of aqueous solution of barium chloride (approximately 0.1M) labelled **barium chloride solution**
- about 10 cm³ of aqueous ethanoic acid (approximately 25% glacial 75% water) labelled **B**
- about 10 cm³ of aqueous potassium dichromate (approximately 0.1M) labelled **potassium dichromate** and **irritant**
- 2M sulfuric acid labelled **dilute sulfuric acid** and **caution**
- 2–3 g of sodium hydrogencarbonate

Practical Examination 2

Each candidate must be supplied with safety goggles or glasses.

Question 1

Each candidate must be supplied with:

- one 50 cm³ burette of at least class B quality
- one 25 cm³ pipette of at least class B quality
- one 250 cm³ volumetric flask
- a safety pipette filler
- three conical flask of 250 cm³ capacity
- a funnel for filling the burette (optional)
- a white tile or white paper
- one beaker of 250 cm³ capacity
- a wash bottle containing deionised/distilled water
- a retort stand and clamp
- weighing bottle (or equivalent)
- approximately 9.0 g of ammonium iron(II) sulfate
- access to an accurate balance (reading to 2 decimal places)
- glass rod
- spatula
- 250 cm³ of dilute sulfuric acid (approximately 1.0 mol dm⁻³) labelled **dilute sulfuric acid** and **caution**
- 150 cm³ of 0.02 mol dm⁻³ acidified potassium manganate(VII) labelled **potassium manganate(VII) solution**.

Practical Examination 2

Question 2

Each candidate must be supplied with:

- a small beaker
- five test tubes
- a boiling tube
- a test tube holder
- a test tube rack
- a spatula
- a stirring rod
- a heat-proof mat
- a Bunsen burner
- several plastic droppers
- deionised water
- kettle to supply hot water (optional)
- hydrated nickel(II) sulfate (approximately 3.0 g) labelled **X**
- about 10 cm³ of an aqueous solution of edta (approx 0.1M) labelled **edta**
- about 10 cm³ of an aqueous solution of 1,2-diaminoethane (approximately 0.2M) labelled **1,2-diaminoethane**
- about 10 cm³ of an aqueous solution of sodium hydroxide (approximately 2.0M) labelled **sodium hydroxide**
- a reagent bottle containing concentrated ammonia labelled **concentrated ammonia** and **irritant** (available in the fume cupboard(s)). Each candidate will only need about 10 cm³
- about 10 cm³ of aqueous solution of barium chloride (approximately 0.1M) labelled **barium chloride solution**
- about 10 cm³ of aqueous ethanoic acid (approximately 25% glacial 75% water) labelled **Y**
- about 10 cm³ of potassium dichromate (approximately 0.1M) labelled **potassium dichromate** and **irritant**
- 2M sulfuric acid labelled **dilute sulfuric acid** and **caution**
- 2–3 g of sodium hydrogencarbonate

THURSDAY 15 AND FRIDAY 16 MAY

Confidential Instructions to the Supervisor of the Practical Examination

INSTRUCTIONS TO THE SUPERVISOR OF THE PRACTICAL EXAMINATION

General

1. The instructions contained in this document are for the use of the Supervisor **and are strictly confidential**. Under no circumstances may information concerning apparatus or materials be given before the examination to a candidate or other unauthorised person.
2. In a centre with a large number of candidates it may be necessary for two or more examination sessions to be organised. **It is the responsibility of the schools to ensure that there should be no contact between candidates taking each session.**
3. A suitable laboratory must be reserved for the examination and kept locked throughout the period of preparation. Unauthorised persons not involved in the preparation for the examination must not be allowed to enter. Candidates must not be admitted until the specified time for commencement of the examination.
4. The Supervisor must ensure that the solutions provided for the candidates are of the nature and concentrations specified in the Apparatus and Materials List.
5. **The Supervisor is to be granted access to the Teacher's Copy of the Question Paper, showing parts of questions 1 and 2 only, on Monday 12 May 2014.** The Supervisor is asked to check, at the earliest opportunity, that the experiments and tests in the question paper may be completed satisfactorily using the apparatus, materials and solutions that have been assembled. **This question paper must then be returned to safe custody** at the earliest possible moment after the Supervisor has ensured that all is in order. **No access to the question paper should be allowed before 12 May 2014.**
6. In the case of centres who have candidates entered for both practical examinations, the Supervisor must **return all unused scripts of Practical Examination 1** to the Examinations Officer immediately on completion of the examination. **The contents of this examination must be kept confidential until the completion of Practical Examination 2.**
7. Pipettes and burettes should be checked before the examination, and there should be an adequate supply of spare apparatus in case of breakages. The Apparatus and Materials List should be regarded as a minimum and there should be no objection to candidates being supplied with more than the minimum amount of apparatus and materials.
8. **Candidates may not use text books and laboratory notes for reference during the examination, and must be informed of this beforehand.**

9. Clear instructions must be given by the Supervisor to all candidates at the beginning of the examination concerning appropriate safety procedures and precautions. Supervisors are also advised to remind candidates that all substances in the examination must be treated with caution. **Only those tests specified in the question paper should be attempted. Candidates must not attempt any additional confirmatory tests.** Anything spilled on the skin should be washed off immediately with plenty of water. The use of appropriate eye protection is essential.
10. Supervisors are reminded that they may not assist candidates during the examination. However, if in the opinion of the Supervisor, a candidate is about to do something which may endanger him/herself or others, the Supervisor should intervene. A full written report must be sent to CCEA at once.
11. Upon request, a candidate may be given additional quantities of materials (answer paper, reagents and unknowns) without penalty. No notification need be sent to CCEA.
12. The examination room must be cleared of candidates immediately after the examination.
13. No materials will be supplied by CCEA.
