Candidate Number

## Science: Double Award (Modular)

Paper 3  
Foundation Tier

[G8203]

FRIDAY 15 JUNE, AFTERNOON

### TIME

1 hour.

### INSTRUCTIONS TO CANDIDATES

Write your Centre Number and Candidate Number in the spaces provided at the top of this page.

Write your answers in the spaces provided in this question paper.  
Answer **all four** questions.

### INFORMATION FOR CANDIDATES

The total mark for this paper is 80.

Quality of written communication will be assessed in question **2(a)(i)**.  
Figures in brackets printed down the right-hand side of pages indicate the marks awarded to each question or part question.

Details of calculations should be shown.

Units must be stated in numerical answers where appropriate.

For Examiner's  
use only

Total  
Marks

--

- (b) (i) In the table below tick (✓) the boxes to show whether the energy resource is renewable or non-renewable.

Energy resource	Renewable	Non-renewable
Gas		
Geothermal		
Nuclear		

[3]

- (ii) One of the energy resources above is a fossil fuel. Which one?

\_\_\_\_\_ [1]

- (c) The diagram shows:

**A** a cyclist

**B** a racing car

© Hemera / Thinkstock

**A**

**B**

- (i) Which is more stable?

Answer \_\_\_\_\_ [1]

- (ii) Give two reasons for your answer.

1. \_\_\_\_\_ [1]

2. \_\_\_\_\_ [1]

Examiner Only

Marks Remark

(d) The table shows the planets in order of their distance from the Sun.

1	Mercury
2	
3	Earth
4	
5	
6	Saturn
7	Uranus
8	

(i) Complete the table by naming the missing planets. [2]

(ii) What is at the centre of the Solar System?

\_\_\_\_\_ [1]

(iii) What is a galaxy?

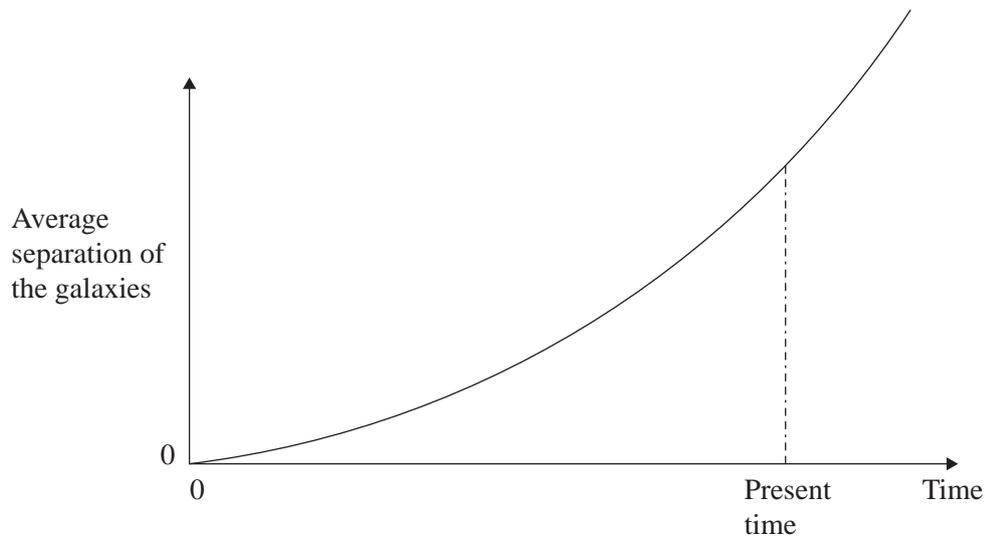

\_\_\_\_\_ [1]

(iv) The Sun is a member of a galaxy. What is the name of this galaxy?

\_\_\_\_\_ [1]

Examiner Only	
Marks	Remark

(e) The Big Bang theory explains the origin and expansion of the universe.

The graph above shows how the average separation of the galaxies has increased over time, according to the Big Bang theory.

(i) What other feature of the graph supports the Big Bang theory?

\_\_\_\_\_ [1]

(ii) Name the other scientific theory which attempts to explain the origin of the universe.

\_\_\_\_\_ [1]

(iii) State two reasons, not related to cost, why it is difficult to send a manned spacecraft to another planet outside our solar system.

1. \_\_\_\_\_

2. \_\_\_\_\_ [2]

(iv) What nuclear process in stars generates energy?

\_\_\_\_\_ [1]

Examiner Only

Marks Remark

- 2 (a) James was wearing a woollen sweater and a nylon shirt. When he removes the sweater he sees a spark.

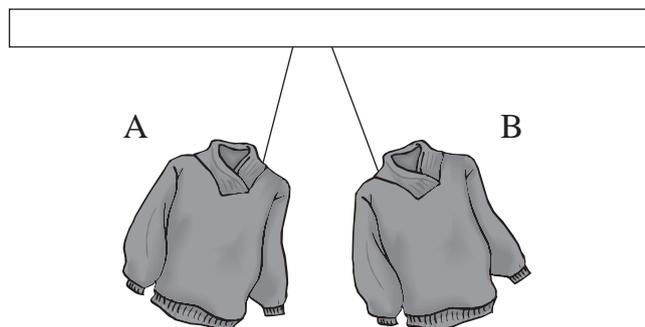

- (i) Explain fully in terms of charge movement how the sweater became charged.

\_\_\_\_\_ [2]

Quality of written communication [1]

When two charged sweaters (A and B) were suspended on threads they moved apart as shown below.

- (ii) What does this indicate about the charges on the sweaters?

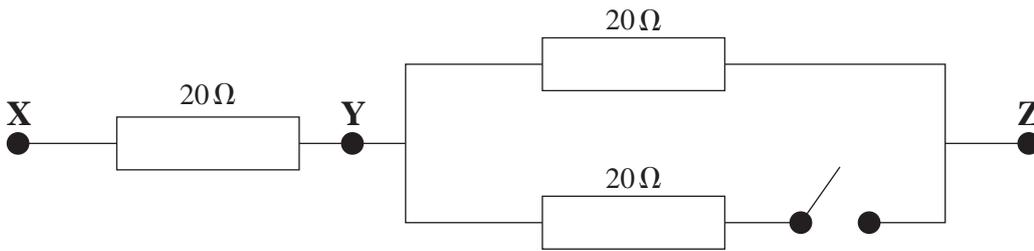

\_\_\_\_\_ [1]

- (iii) Explain your answer to part (ii).

\_\_\_\_\_ [1]

Examiner Only	
Marks	Remark
○	○

(b) Three  $20\ \Omega$  resistors are connected as shown below.

Complete the following table to show the total resistance between the different points for the switch settings indicated.

Points	Switch	Resistance in $\Omega$
Y and Z	Closed	
X and Z	Open	
X and Z	Closed	

[3]

(c) (i) The power rating of an electric hob is  $1.5\ \text{kW}$ . How much energy is used (in kWh) if it is switched on for 2 hours?

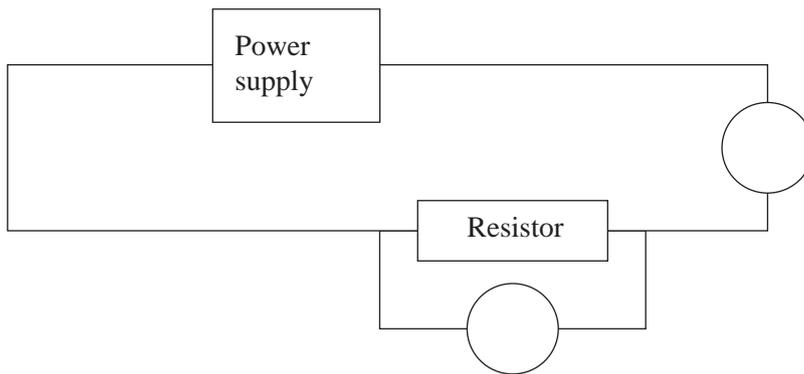

Electric energy = \_\_\_\_\_ kWh [1]

(ii) What is the cost of switching on the hob for 2 hours if one kWh of electricity costs 13p?

Cost = \_\_\_\_\_ p [1]

Examiner Only	
Marks	Remark

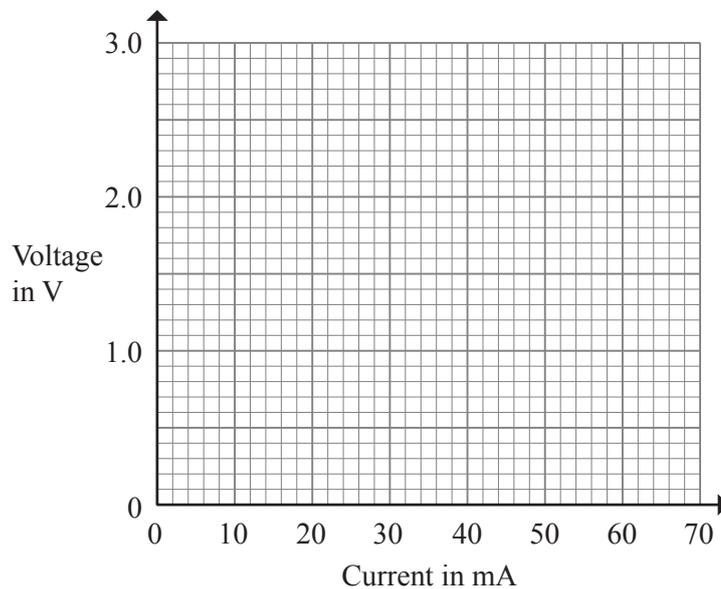

- (d) James uses the following circuit to investigate the variation of current with voltage for a resistor.

Label the ammeter and voltmeter with the correct symbols. [2]

- (e) The results are given below.

Voltage in V	0	0.8	1.2	1.6	2.0	2.8
Current in mA	0	20	30	40	50	70

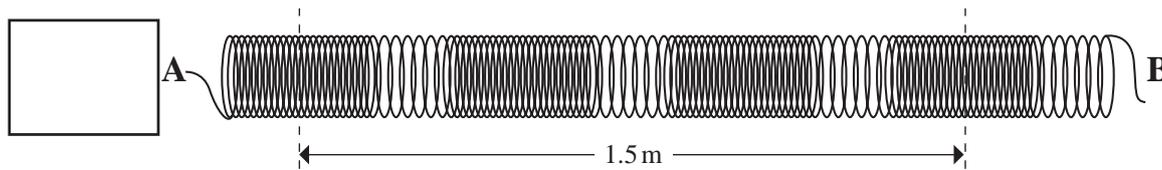

- (i) Plot the points on the grid. [1]
- (ii) Draw the best fit straight line through the points. [1]

Examiner Only	
Marks	Remark

3 (a) Shauna uses a stretched slinky to make longitudinal waves.

(i) What do the longitudinal waves transfer from **A** to **B**?

\_\_\_\_\_ [1]

(ii) In the box, draw a double-headed arrow to indicate the direction Shauna would have to move end **A** to make longitudinal waves. [1]

(iii) Shauna sends 18 waves along the slinky in 6 seconds.  
How many waves does she make in 1 second?

\_\_\_\_\_ [1]

(iv) Use your answer to part (iii) to state the frequency of the waves.

Frequency = \_\_\_\_\_ Hz [1]

(v) What is the wavelength of the longitudinal waves?

Wavelength = \_\_\_\_\_ m [1]

(vi) Use your answers to parts (iv) and (v) to calculate the speed of the longitudinal waves.

**You are advised to show your working out.**

Speed = \_\_\_\_\_ m/s [3]

(vii) Give another example of a longitudinal wave.

\_\_\_\_\_ [1]

Examiner Only	
Marks	Remark
○	○

(b) Transverse waves can also be made with a slinky spring.

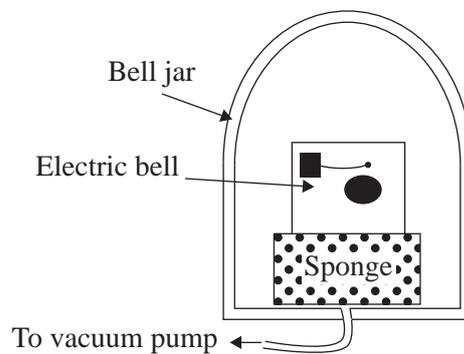

- (i) How would the vibrations of the slinky spring be different if Shauna made a transverse wave?

\_\_\_\_\_ [1]

- (ii) Give another example of a transverse wave.

\_\_\_\_\_ [1]

(c) An electric bell is set ringing inside a bell jar.

When the hammer strikes the gong, sound is produced.

- (i) Why is sound produced by the gong?

\_\_\_\_\_ [1]

- (ii) What happens to the loudness of the sound from the gong when the vacuum pump is switched on?

\_\_\_\_\_ [1]

- (iii) What does this experiment demonstrate about sound waves?

\_\_\_\_\_ [1]

- (iv) If the experiment is repeated without the sponge, the sound of the electric bell can always be heard. Explain why this is so.

\_\_\_\_\_  
\_\_\_\_\_ [1]

Examiner Only

Marks Remark

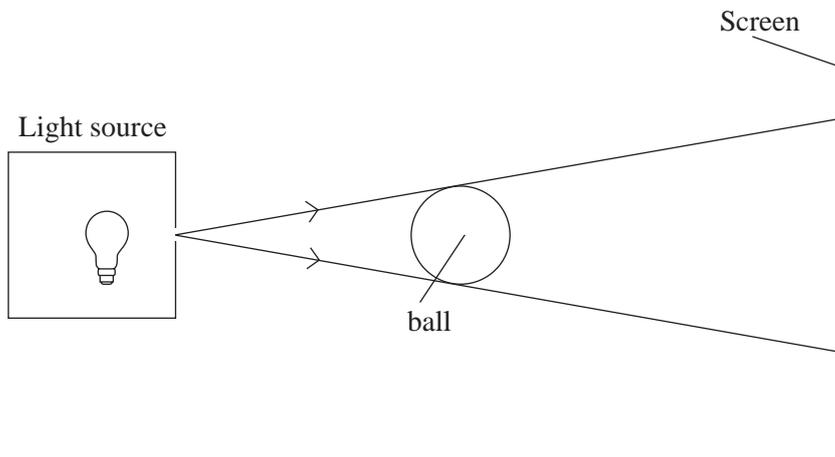

- 4 (a) (i) Indicate with a tick (✓) in the table below whether the object is luminous or non-luminous.

Object	Luminous	Non-luminous
Star		
Moon		
Planet		
White paper		

[4]

The diagram below shows a shadow of a ball being formed on a screen by a point source of light.

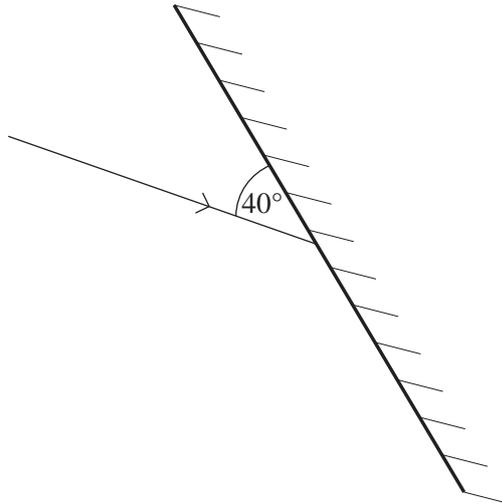

- (ii) Which statement below best describes the shadow formed on the screen?

- A The shadow is uniformly black.  
 B The shadow contains partial shadow AND uniformly black shadow.  
 C The entire shadow is partial shadow.

Answer \_\_\_\_\_ [1]

Examiner Only	
Marks	Remark
○	○

A ray of light is incident on a plane mirror as shown.

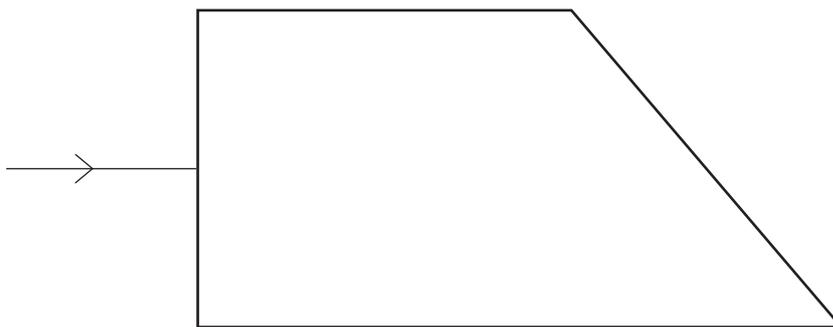

(b) (i) Draw and label the normal. [1]

(ii) What size is the angle of reflection?

Angle of reflection = \_\_\_\_\_  $^\circ$  [1]

Different shapes of glass prism are often used to change the direction of light rays.

(c) (i) Continue the path of the ray shown until it emerges into the air.

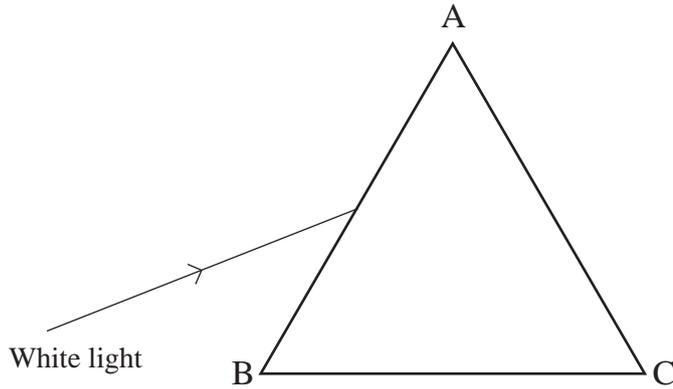

[3]

(ii) Does the speed of light increase, decrease or remain the same as it enters the glass?

\_\_\_\_\_ [1]

Examiner Only	
Marks	Remark

White light enters a prism.

The prism is used to split white light into its component colours.

(d) (i) What is this process called?

\_\_\_\_\_ [1]

(ii) List the component colours produced **beginning with** the colour nearest the corner C.

\_\_\_\_\_ [2]

(iii) What name is given to this group of colours?

\_\_\_\_\_ [1]

Examiner Only	
Marks	Remark

The box contains the names of some electromagnetic waves.

Ultraviolet	Gamma rays	Microwaves	Radio waves	Infrared
-------------	------------	------------	-------------	----------

(e) (i) Which one has the shortest wavelength?

\_\_\_\_\_ [1]

(ii) Which one comes from a coal fire?

\_\_\_\_\_ [1]

(iii) Which one can be used to sterilise medical equipment?

\_\_\_\_\_ [1]

(iv) Which one can cause skin cancer?

\_\_\_\_\_ [1]

(v) Which one has the longest wavelength?

\_\_\_\_\_ [1]
