Rewarding Learning

**General Certificate of Secondary Education
2012–2013**

Science: Single Award

Unit 3 (Physics)

Foundation Tier

[GSS31]

GSS31

WEDNESDAY 14 NOVEMBER 2012, AFTERNOON

TIME

1 hour.

INSTRUCTIONS TO CANDIDATES

Write your Centre Number and Candidate Number in the spaces
provided at the top of this page.
Write your answers in the spaces provided in this question paper.
Answer **all eight** questions.

INFORMATION FOR CANDIDATES

The total mark for this paper is 60.
Figures in brackets printed down the right-hand side of pages
indicate the marks awarded to each question or part question.
Quality of written communication will be assessed in question **8(a)**.

For Examiner's use only

1 **(a)** The table below gives some information about the planets in our Solar System.

(i) Complete the table below by naming the first planet. [1]

Planet	Distance from the Sun /million km	Surface temperature /°C
	58	430
Venus	108	470
Earth	150	22
Mars	228	−23
Jupiter	778	−150
Saturn	1427	−180
Uranus	2870	−210
Neptune	4497	−220

(ii) Using the information above suggest why humans would find it impossible to live on Venus.

_____

_____ [1]

(b) Complete the following sentences.

Choose from:

fusion : star : friction
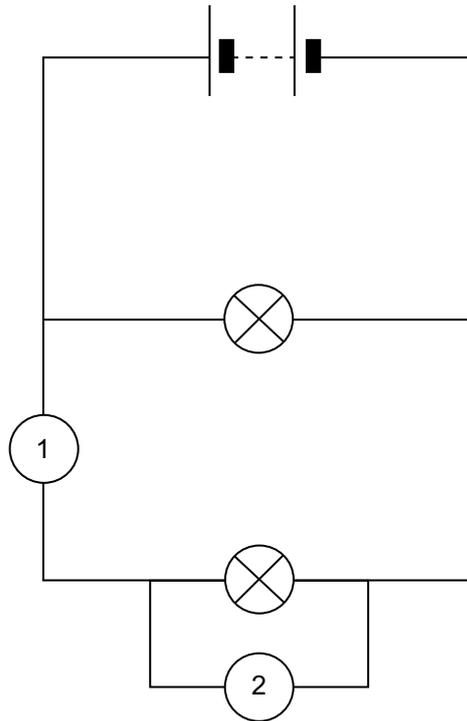

planet : gravity : fission

The Sun is our nearest _____ , it is made from a gas

called hydrogen. This gas is pulled together by the force of

_____. This gas is used to make energy in a

nuclear process called _____. [3]

BLANK PAGE

(Questions continue overleaf)

2 **(a)** The circuit below uses meters 1 and 2 to measure current and voltage.

(i) What type of meter is placed at position 1 to measure current?

Circle the correct answer.

newtonmeter : ammeter : voltmeter [1]

(ii) Complete the following sentences.
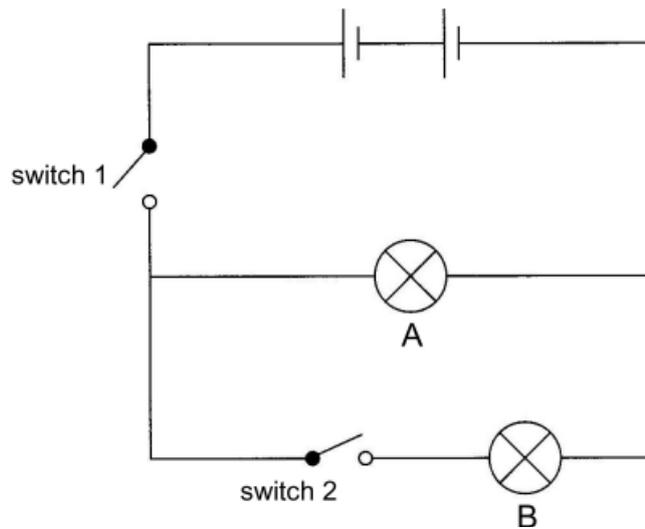

Choose from:

parallel : goes out

gets dimmer : stays lit : series

In this circuit meter 2 is connected in _____ and

the bulbs are connected in _____. If one of the

bulbs is broken the other bulb _____. [3]

(b) A student set up the following circuit.

Complete the table to show if the bulbs are lit or not lit for the switch positions given.
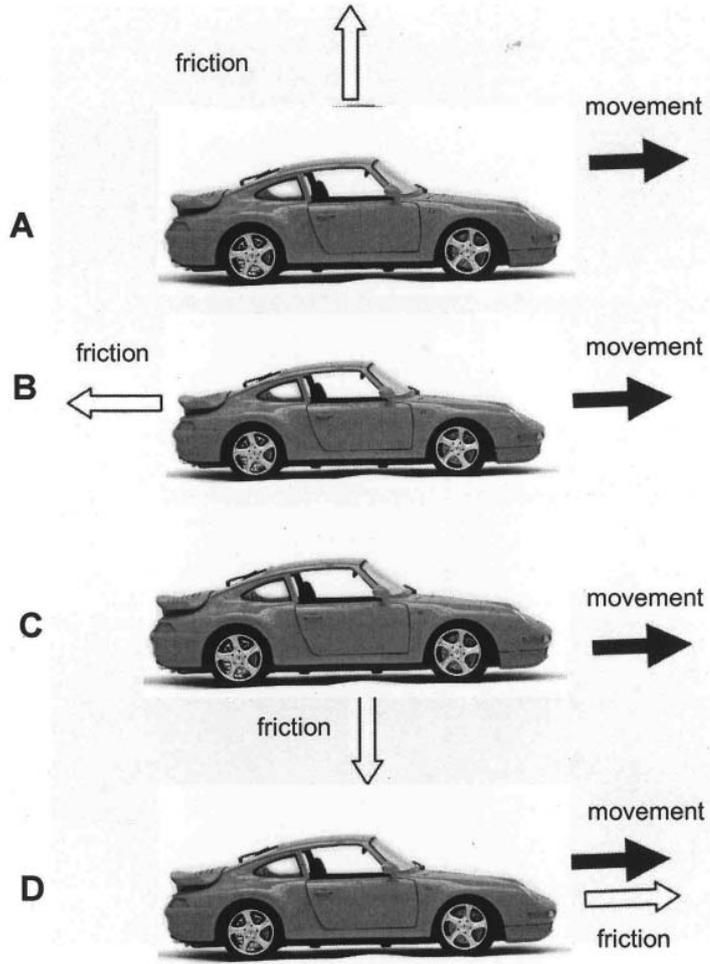

Use a tick (✓) to show if the bulb is lit and a cross (✓) if it is not lit.

Switch 1	Switch 2	Bulb A	Bulb B
open	open		
closed	open		

[2]

3 The diagram below shows a car moving on a flat straight road.

friction

movement

A

friction

movement

B

movement

C

friction

movement

D

friction

© Hemera / Thinkstock

(a) Which diagram **A**, **B**, **C** or **D** shows the correct direction in which friction acts?
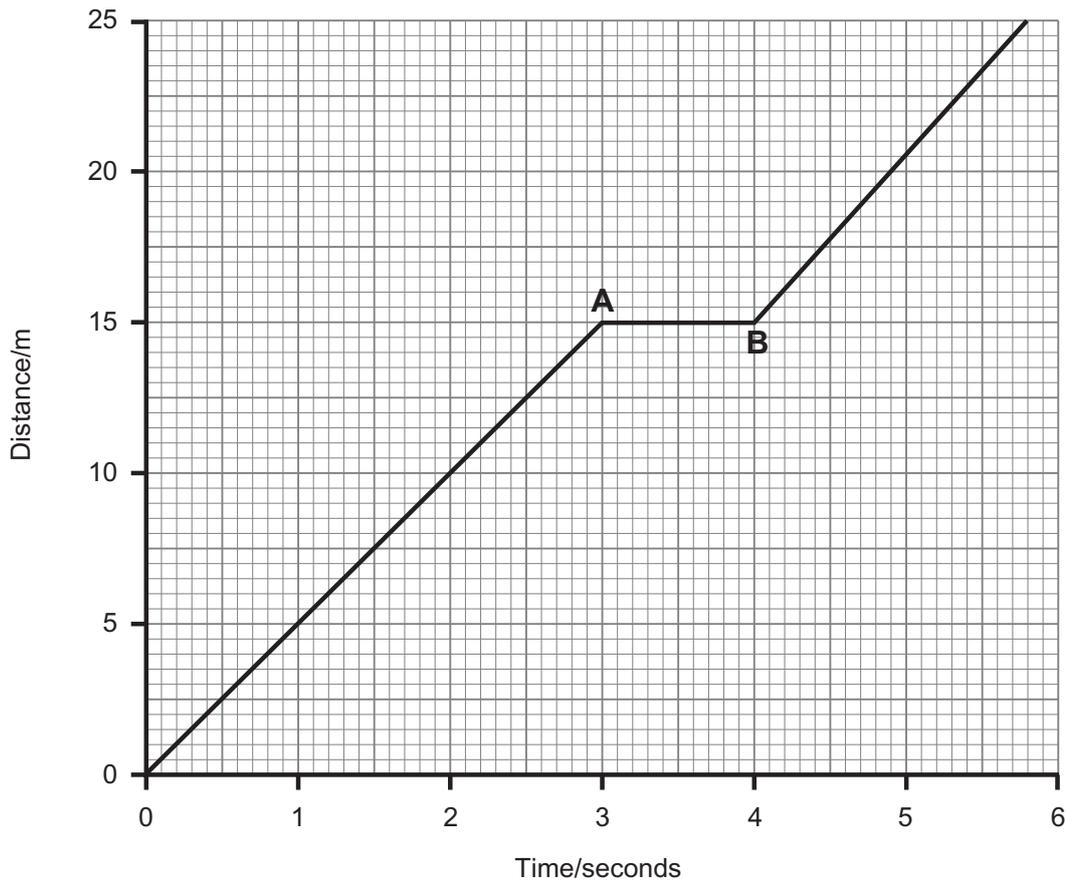

Answer _____ [1]

(b) Complete the sentence below.

Friction is a _____ which _____

moving objects. [2]

(c) Shown below is a distance–time graph for a car.

(i) Describe the motion of the car from **A** to **B**.

Choose from:

stopped : steady speed : accelerating

Answer _____ [1]

(ii) Use the graph to find the distance the car travels in the first two seconds.

Answer _____ m [1]

(iii) Use the equation:

$$\textbf{speed} = \frac{\textbf{distance}}{\textbf{time}}$$
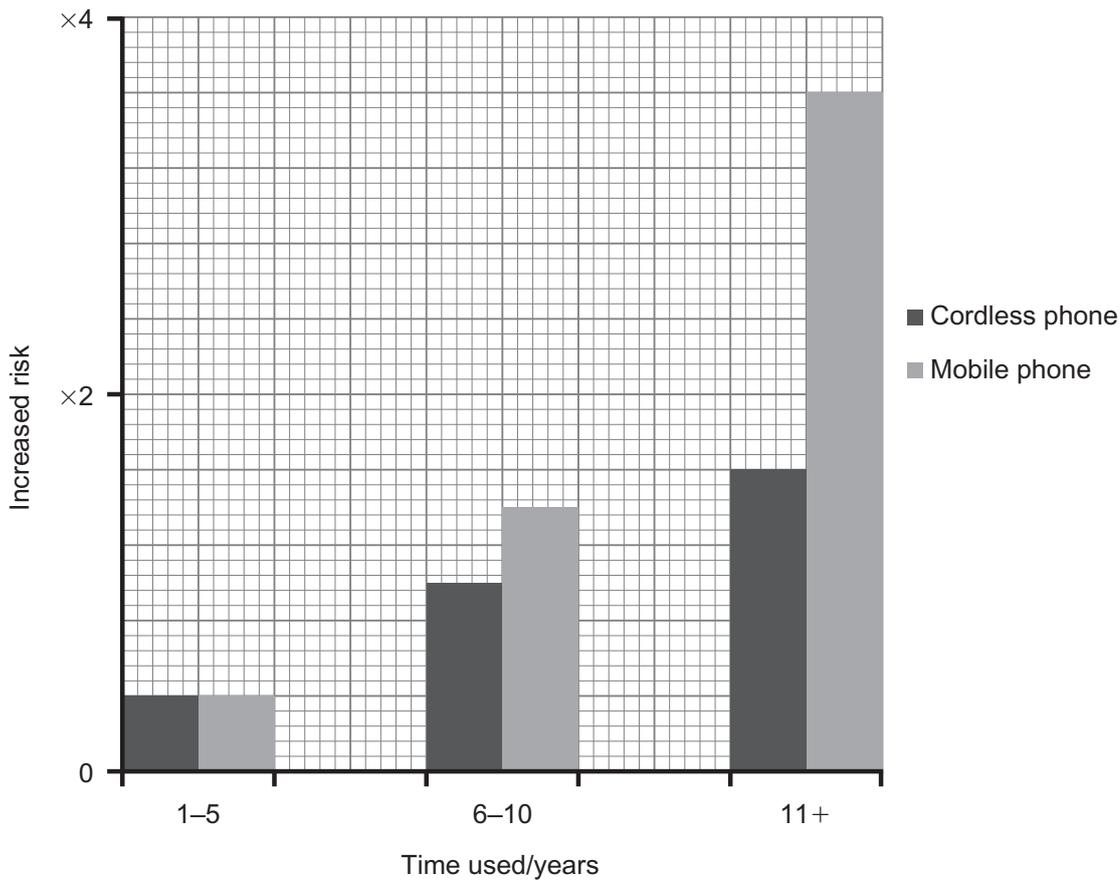

to calculate the speed of the car in the first two seconds.

Answer _____ m/s [1]

8316.07**R**   7   **[Turn over**

4 **(a)** The bar graph below shows how the use of two types of phone increases the risk of developing cancer.

(i) State **two** trends shown by this graph.
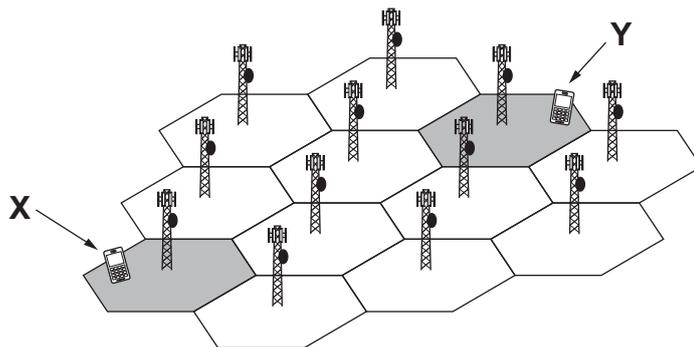

1. _____

_____

2. _____

_____ [2]

(ii) Name the part of the body most likely to develop cancer when using these phones.

_____ [1]

The diagram below shows a mobile phone network.

© CCEA GCSE Single Award in Science Foundation Tier by A McFarland, C Murphy & J Napier, page 113, published by Hodder Education, 2009. ISBN 9780340974728. "Reproduced by permission of Hodder Education".

(b) Using the diagram explain fully how a signal goes between phone **X** and phone **Y**.

_____

_____

_____ [2]

(c) Given below are some types of electromagnetic radiation and some uses. Using lines link each type to **one** common use.

Radiation		Use

| X-rays | | to treat cancer |

| infrared | | T.V. remote controls |

| | | sun tanning |

| gamma rays | | to look at broken bones |

[3]

Examiner Only

Marks	Remark

5 **(a)** The table below shows the braking distance at different speeds.

Speed km/hr	Braking distance/m
15	1
30	5
45	12

Draw   a **bar graph** for the braking distance on the grid below.

[2]

(b) The table below shows how the braking and thinking distances can be affected by the number of people in a car at different speeds.

Speed km/hr	braking distance/m		thinking distance/m	
	car and driver only	car, driver and three passengers	car and driver only	car, driver and three passengers
15	1	3	3	3
30	5	7	6	6
45	12	14	8	8
60	21	23	11	11

(i) Calculate the **stopping** distance for a car with a driver and three passengers travelling at 60 km/hr.

Answer _____ m [1]

(ii) Explain fully what is meant by the term 'braking distance'.

_____

_____ [1]

(iii) In what way, if any, does the thinking distance change if the car has passengers?

_____

_____ [1]

(c) The table below is used by crash investigators to work out how fast a car was travelling before a collision. They do this by measuring the length of a skid.

Length of skid /m	Initial speed on different surfaces km/hr		
	Dry tarmac	**Wet tarmac**	**Ice**
1	13.4	11.8	6.2
2	18.8	16.7	8.7
3	23.1	20.5	10.7
4	26.7	23.6	12.3
5	29.8	26.4	13.4

(i) Suggest **two** factors which must have been kept the same to make sure the results were valid.

1. _____

2. _____ [2]

(ii) How many **times** longer is a skid on ice compared to a skid on dry tarmac at 13.4 km/hr?

_____ [1]

**(iii)** State **two** conclusions that can be seen from the results in the table.

1. _____

2. _____ [2]

BLANK PAGE

(Questions continue overleaf)

6 **(a)** Slinky springs are often used to demonstrate waves as shown in the diagrams **A** and **B** below.

© CCEA GCSE Single Award in Science Foundation Tier by A McFarland, C Murphy & J Napier, page 109, published by Hodder Education, 2009. ISBN 9780340974728. "Reproduced by permission of Hodder Education".

(i) Name the type of wave represented by diagram **A**.

_____ [1]

(ii) Describe fully how point **X** moves as the wave passes along the slinky in diagram **A**.

_____

_____ [2]

(iii) What is the amplitude of the wave represented by diagram **B**?

Answer _____ m [1]

(iv) What is the wavelength of the wave represented by diagram **B**?

Answer _____ m [1]

(b) Wave **B** produces 20 complete waves in 5 seconds.

Calculate the frequency of the wave.

Answer _____ Hz [1]

(c) Use the equation:
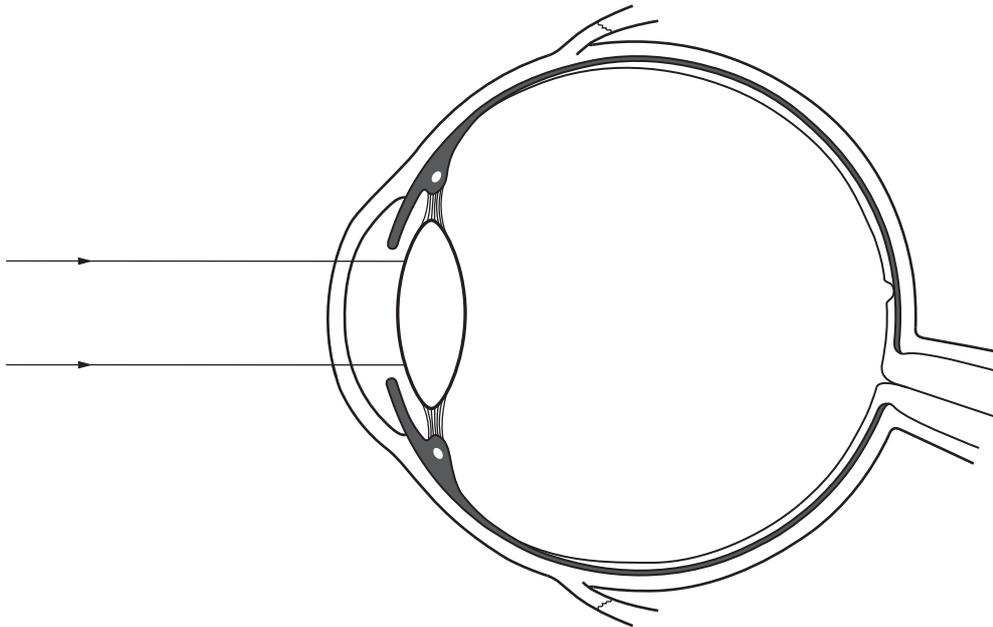

$$\textbf{speed} = \textbf{frequency} \times \textbf{wavelength}$$

to calculate the speed of a wave with a frequency of 20 Hz and a wavelength of 90 m.

(Show your working out.)

Answer _____ m/s [2]

7 **(a)** The diagram below shows two parallel rays of light entering the eye. Complete the diagram to show the path of the rays in the formation of a clear image.

[2]

(b) **(i)** Short sight is a common eye defect. Explain fully the cause and effect of short sight.

_____

_____

_____

_____ [3]

(ii) Name the type of lens used to correct short sight.

_____ [1]

8316.07**R**   **16**

8 **(a)** The photograph below shows the radioactive source found in a smoke alarm.

Describe a simple experiment to show which type of radiation (alpha, beta or gamma) is emitted by the radioactive source in the smoke alarm.

Your answer should include one way to ensure valid results.

In this question you will be assessed on your written communication skills including the use of specialist scientific terms.

_____

_____

_____

_____

_____

_____

_____

_____

_____

_____

[6]

(b) The equipment shown below is used in industry to monitor the thickness of aluminium foil.
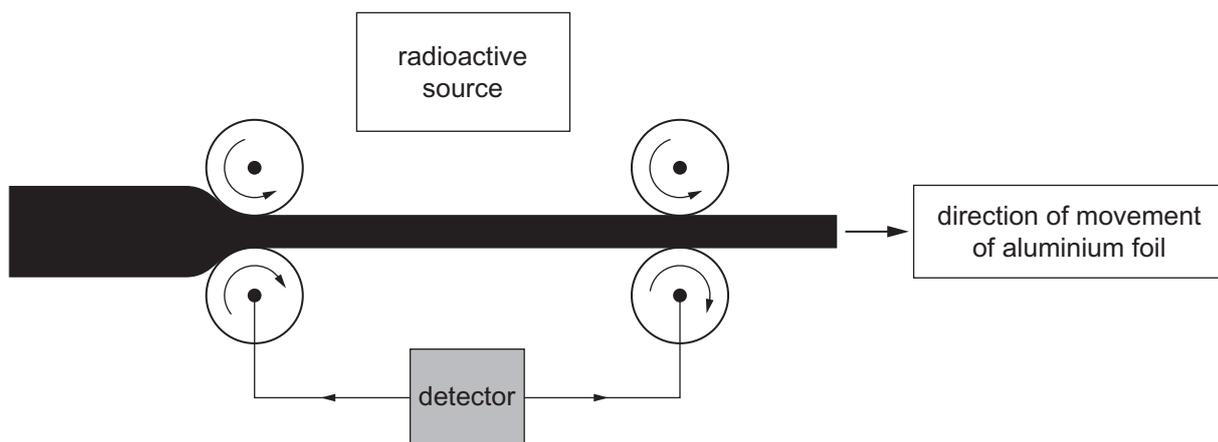

The table below gives possible radioactive sources which could be used.

Radioactive source	Radiation emitted	Half-life
A	alpha	1000 years
B	beta	1000 years
C	beta	2 minutes
D	gamma	4 years

(i) Explain fully what is meant by the term 'half-life'.

_____

_____ [2]

(ii) Which source, **A**, **B**, **C** or **D** would be best to monitor the thickness of the aluminium? Explain your answer.

Source _____ [1]

Explanation _____

_____

_____ [2]

THIS IS THE END OF THE QUESTION PAPER
