Advanced Subsidiary GCE

**Mark Scheme for June 2019**

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

© OCR 2019

Annotations available in RM Assessor

Annotation	Meaning
	Correct response
	Incorrect response
	Omission mark
	Benefit of doubt given
	Contradiction
	Rounding error
	Error in number of significant figures
	Error carried forward
	Level 1
	Level 2
	Level 3
	Benefit of doubt not given
	Noted but no credit given
	Ignore

Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

<b>Annotation</b>	<b>Meaning</b>
<b>DO NOT ALLOW</b>	Answers which are not worthy of credit
<b>IGNORE</b>	Statements which are irrelevant
<b>ALLOW</b>	Answers that can be accepted
( )	Words which are not essential to gain credit
—	Underlined words must be present in answer to score a mark
<b>ECF</b>	Error carried forward
<b>AW</b>	Alternative wording
<b>ORA</b>	Or reverse argument

**Subject-specific Marking Instructions****INTRODUCTION**

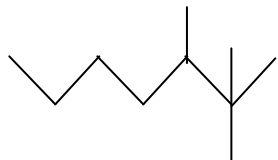

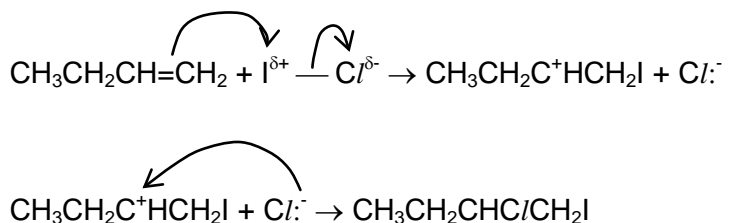

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

Question			Answer	Mark	AO element	Guidance
1	(a)	(i)	$C_{10}H_{22} \rightarrow C_4H_8 + C_6H_{14}$ ✓	1	1.2	Molecular formulae of both products required
1	(a)	(ii)	 ✓	1	2.5	<b>IGNORE</b> non-skeletal representation used as working and not rubbed out if a correct skeletal representation is present
1	(b)		Collecting tube must be full of water ✓ (otherwise) gaseous products/gas will not collect in tube ✓ Bung is required to hold delivery tube in heated tube ✓ (otherwise) gaseous products/gas will escape (into atmosphere) ✓	4	3.3 3.4 3.3 3.4	<b>ALLOW</b> answers drawn and/or written onto the diagram
1	(c)		Propene ✓	1	2.1	<b>ALLOW</b> propylene
1	(d)		There is a lack of free rotation about the C=C ✓ The groups on each carbon atom (of the double bond) are different ✓	2	1.1 x 2	<b>ALLOW</b> no rotation <b>DO NOT ALLOW</b> 'movement' unless qualified by 'rotational' <b>IGNORE</b> 'E/Z'
1	(e)		 $CH_3CH_2CH=CH_2 + I^{\delta+} - Cl^{\delta-} \rightarrow CH_3CH_2C^+HCH_2I + Cl:^-$ $CH_3CH_2C^+HCH_2I + Cl:^- \rightarrow CH_3CH_2CHClCH_2I$ ✓ for partial charges and curly arrow on ICl ✓ for full charges ✓ for other two curly arrows	3	1.2 x 3	Curly arrows should start (when projected back if necessary) on the relevant bond (or the minus charge or lone pair of Cl <sup>-</sup> ) and end (when projected forward if necessary) on the atom concerned or the bond about to be formed.  <b>ALLOW</b> Cl: <sup>-</sup> with or without lone pair in step 1

1	*(h)	<p>Please refer to the marking instructions on page 4 of this mark scheme for guidance on how to mark this question.</p> <p><b>Level 3 (5-6 marks)</b>          Gives a balanced and <u>detailed</u> account of the adv and disadv of biofuels  <i>(detailed means more than a simple statement).</i></p> <p><i>There is a well-developed line of reasoning which is clear and logically structured.</i></p> <p><b>Level 2 (3-4 marks)</b>          Gives a balanced account of the advantages and disadvantages of biofuels.  <b>OR</b>          Gives a detailed account of the advantages and outlines the disadvantages of biofuels, or vice versa.</p> <p><i>There is a line of reasoning presented with some structure. The information presented is relevant and supported by some evidence.</i></p> <p><b>Level 1 (1-2 marks)</b>          Gives some of the advantages of biofuels.  <b>OR</b>          Gives some of the disadvantages of biofuels.</p> <p><i>There is an attempt at a logical structure with a line of reasoning. The information is in the most part relevant.</i></p> <p><b>0 marks</b>          No response or no response worthy of credit.</p>	6	1.2 x 3 2.5 x 3	<p><i>Indicative Scientific points include:</i></p> <p><b>Advantages (compared with fossil fuels)</b></p> <ul style="list-style-type: none"> <li>• renewable</li> <li>• the CO<sub>2</sub> they produce when burnt is the CO<sub>2</sub> the plants absorbed while growing/they are carbon neutral/less greenhouse gases/less global warming</li> <li>• can be produced from waste (that would otherwise go to landfill)</li> <li>• sustainable</li> <li>• can be used as a straight replacement for diesel</li> <li>• (biodiesel is) biodegradable (if spilled)</li> <li>• (virtually) no sulfur/less SO<sub>2</sub>/less acid rain</li> <li>• less particulates/less damage to lungs</li> <li>• less CO/less poisonous emissions</li> <li>• less HC emissions/less photochemical smog/less respiratory problems</li> </ul> <p><i>(Ignore references to cost)</i></p> <p><b>Disadvantages (compared with fossil fuels)</b></p> <ul style="list-style-type: none"> <li>• not a straight replacement for petrol/car engines need to be modified (to use fuels of high ethanol concentration)</li> <li>• land used to grow crops for fuels can't be used to grow crops for food</li> <li>• not carbon neutral as CO<sub>2</sub> is still produced when producing and transporting the fuel</li> <li>• more NO<sub>x</sub></li> <li>• (NO<sub>x</sub> causes, so) more tropospheric ozone/more respiratory problems</li> </ul> <p><i>(Ignore references to cost)</i></p>
---	------	--	---	--------------------	---

Question		Answer	Mark	AO element	Guidance
2	(a)	anode (+) $2Cl^- \rightarrow Cl_2 + 2e^-$ ✓ cathode (-) $2H_2O + 2e^- \rightarrow 2OH^- + H_2$ ✓	2	2.3 x 2	<b>ALLOW</b> multiples or halves of equations <b>ALLOW</b> $2Cl^- - 2e^- \rightarrow Cl_2$ <b>ALLOW</b> $2H^+ + 2e^- \rightarrow H_2$ <b>ALLOW</b> 'e' for 'e <sup>-</sup> ' <b>IGNORE</b> state symbols
2	(b)	(i) It is the oxidation state/number of the chlorine/Cl (in chloric(I) acid)/the OS/N of chlorine/Cl is +1 ✓	1	1.2	Both oxidation state and species required If OS/N is given it must be +1 NOT 1+
2	(b)	(ii) It is easier to transport/store/handle/less toxic (ORA) ✓ because it is a solid and chlorine is a gas ✓	2	2.3 x 2	The reason must be linked to the state and compared with the chlorine
2	(c)	(i) <b>FIRST CHECK THE ANSWER ON THE ANSWER LINE</b> <b>If answer = <math>2.48 \times 10^{-5}</math> (mol dm<sup>-3</sup>) to 3 s.f. award 4 marks</b>  Amount $S_2O_3^{2-}$ = $(12.4 / 1000 \times 0.000100) = 1.24 \times 10^{-6}$ (mol) ✓ Amount of $Cl_2$ = $(1.24 \times 10^{-6} / 2) = 6.20 \times 10^{-7}$ (mol) ✓ Concentration of $Cl_2$ = $(6.2 \times 10^{-7} \times 1000 / 25) = 2.48 \times 10^{-5}$ (mol dm <sup>-3</sup> ) ✓  Appropriate number of s.f. = 3 ✓	4	2.4 x 4	Award fourth mark independently for any number to 3sf that results from a shown calculation.  <b>ALLOW ECF</b>

2	(c)	(ii)	<p><b>Any three from:</b></p> <p>(in 1) a 25 cm<sup>3</sup> measuring cylinder – use a measuring/graduated/volumetric pipette (instead) ✓</p> <p>(in 2) rinse out a burette with de-ionised water – use the sodium thiosulfate/standard solution (instead) ✓</p> <p>(in 3) record the initial burette reading to the nearest 0.1 cm<sup>3</sup> – should be to the nearest 0.05/±0.05 (instead) ✓</p> <p>(in 5) add a few drops of starch indicator – (this should not be added before titrating –) add when addition of sodium thiosulfate has caused iodine/brown colour to become (pale) yellow/straw-coloured (instead) ✓</p>	3	3.3x 2 3.4	<b>ALLOW</b> just 'pipette' (in 1)
2	(d)		<p>Reducing agent: SO<sub>2</sub></p> <p>Explanation: the oxidation state (number) of the sulfur/S (in SO<sub>2</sub>) increases (goes) from +4 to +6 (in SO<sub>4</sub><sup>2-</sup>) ✓</p>	1	2.6	<p><b>ALLOW</b> sulfur dioxide</p> <p><b>ALLOW</b> the oxidation state (number) of the bromine (Br) (in Br<sub>2</sub>) decreases (goes) from 0 to -1 (in Br<sup>-</sup>)</p> <p>Both reducing agent and explanation required for mark</p>
2	(e)		(dark) red/brown liquid ✓	1	1.2	<b>ALLOW</b> red/brown/orange but no other colour
2	(f)	(i)	cream(-coloured)/off-white precipitate/ppt/solid ✓	1	1.2	<p><b>IGNORE</b> initial colours and changes of colour on standing</p> <p>No other colour(s) should be mentioned</p>

2	(f)	(ii)	<p><b>FIRST CHECK THE ANSWER ON THE ANSWER LINE</b> <b>If answer = rounds to 97(%) to 2 or more s.f. award 3 marks</b></p> <p>amount of Br<sup>-</sup> in 25.0 cm<sup>3</sup> sample = (25.0 / 1000 x 0.0260) = 6.50 x 10<sup>-4</sup> mol amount of AgBr produced = 6.50 x 10<sup>-4</sup> mol ✓</p> <p>M(AgBr) = (107.9 + 79.9) = 187.8 g mol<sup>-1</sup> maximum mass of AgBr = (6.50 x 10<sup>-4</sup> x 187.8) = 0.122(07) (g) ✓</p> <p>% yield = [(0.118 / 0.122) x 100] = 97% ✓</p>	3	2.7 x 3	<b>ALLOW</b> answer to 2 or more s.f. (96.7213...) <b>ALLOW ECF</b>
---	-----	------	---	---	---------	--

Question		Answer	Mark	AO element	Guidance
3	(a)	${}^2_1\text{H} + {}^2_1\text{H} \rightarrow {}^4_2\text{He} \checkmark$	1	2.6	<b>ALLOW</b> atomic/mass numbers (only if correct) to be written to rhs of both H/He
3	(b)	The student is correct AW (because) The lines are in exactly the same positions/frequencies/ match up $\checkmark$  The energy transitions are the same $\checkmark$  Each element has unique energy levels <b>AW</b> $\checkmark$	3	3.1  3.2  3.2	Must say 'student is correct' AW to score three marks.  <b>ALLOW</b> energy is quantized
3	(c)	<b>FIRST CHECK THE ANSWER ON THE ANSWER LINE</b> <b>If answer = % <math>{}^{113}\text{In} = 4\%</math> <math>{}^{115}\text{In} = 96\%</math> award 2 marks</b>  [112.90x] + [114.90(100-x)] / 100 = 114.82 $\checkmark$ 112.90x + 11490 – 114.90x = 11482 -2x = -8 x = 4 % ${}^{113}\text{In} = 4$ % ${}^{115}\text{In} = 96 \checkmark$	2	2.6 x 2	
3	(d)	(i) $5p^1 \checkmark$	1	1.1	
3	(d)	(ii) Indium has/there are delocalised electrons $\checkmark$	1	1.1	<b>IGNORE</b> it has metallic bonding
3	(d)	(iii) <u>Strong</u> attraction between <u>oppositely</u> charged ions (in a giant structure) $\checkmark$	1	1.1	<b>ALLOW</b> ' <u>strong</u> attractions in <u>ionic</u> bonding'
3	(e)	(Student is incorrect about $\text{InH}_3$ ) $\text{InH}_3$ has (only) <u>3 bond pairs</u> (of electrons) $\checkmark$  (equal repulsion between b-p) gives <u>trigonal planar shape/bond angles <math>120^\circ</math></u> $\checkmark$  $\text{NH}_3$ has <u>3 b-p and 1 l-p</u> $\checkmark$	3	3.2  3.2  1.2	

Question			Answer	Mark	AO element	Guidance
4	(a)	(i)	C–F is most polar ✓  (because) F is (the) most <u>electronegative</u> ✓	2	3.1  3.2	<b>ALLOW</b> order of bond polarities C-F>C-Cl>C-Br for MP1 <b>ALLOW</b> order of electronegativity F>Cl>Br for MP2
	(a)	(ii)	C–Br is broken ✓  (because the C–Br is the) <u>weakest bond</u> AW ✓	2	3.2 x 2	<b>ALLOW</b> order of bond enthalpies/strengths C-F>C-Cl>C-Br for MP2
4	(b)		<b>FIRST CHECK THE ANSWER ON THE ANSWER LINE</b> <b>If answer = C<sub>2</sub>Br<sub>2</sub>F<sub>4</sub> award 2 marks</b>  molar ratio of C:Br:F 9.2 / 12.0 : 61.5 / 79.9 : 29.3 / 19.0 0.77 0.77 1.54 1 : 1 : 2 <b>OR</b> empirical formula = CBrF <sub>2</sub> ✓  empirical mass = 129.9 M <sub>r</sub> = 259.8 (259.8 / 129.9) = 2 molecular formula = C <sub>2</sub> Br <sub>2</sub> F <sub>4</sub> ✓	2	2.4  2.8	
4	(c)		<b>FIRST CHECK THE ANSWER ON THE ANSWER LINE</b> <b>If answer = (+) 346 (kJ mol<sup>-1</sup>) (3 or more s.f.) award 3 marks</b>  Energy needed to break one C-Cl bond (E = hν) = 6.63 x 10 <sup>-34</sup> x 8.67 x 10 <sup>14</sup> = 5.75 x 10 <sup>-19</sup> (J) ✓  Energy needed to break one mole of C-Br bonds = 5.75 x 10 <sup>-19</sup> x 6.02 x 10 <sup>23</sup> = 346042 (J) ✓ = (+) 346 kJ mol <sup>-1</sup> ✓	3	2.4	The working for an incorrect answer <b>MUST</b> be checked in detail.  Do be aware that candidates may well multiply/divide the numbers in a different order (or even combine steps) to that shown in the answer column so the order of/the numbers in this method of working may not necessarily be seen. However, candidates should show evidence (explicit or implicit) of using E = hν (✓), and multiplying by both the Planck constant and the Avogadro constant (✓) and converting between J and kJ (✓).

Question		Answer	Mark	AO element	Guidance
4	*(d)	<p><i>Please refer to the marking instructions on page 4 of this mark scheme for guidance on how to mark this question.</i></p> <p><b>Level 3 (5-6 marks)</b>            Gives <u>details</u> of adv <b>and</b> disadv of O<sub>3</sub>  <i>(details means correctly specifies tropos and stratos)</i>  <b>AND</b>            Describes the <u>catalytic</u> role of NO<sub>2</sub> in O<sub>3</sub> destruction supported by reference to equations  <b>AND</b>            Refers to NO<sub>2</sub> and O<sub>3</sub> reacting/forming photochemical smog in the tropos</p> <p><i>Well-developed reasoning, clear, logically structured.</i></p> <p><b>Level 2 (3-4 marks)</b>            Gives the adv <b>and</b> disadv of O<sub>3</sub>  <b>AND</b>            Describes the <u>catalytic</u> role of NO<sub>2</sub> in O<sub>3</sub> destruction supported by some reference to equation(s)</p> <p style="text-align: center;"><b>OR</b></p> <p>Gives <u>details</u> of the adv <b>and</b> disadv of O<sub>3</sub>  <b>AND</b>            Describes the disadv of NO<sub>2</sub> in the tropos and/or stratos.</p> <p><i>Reasoning with some structure.
