Advanced GCE

Mark Scheme for June 2014

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

Annotations

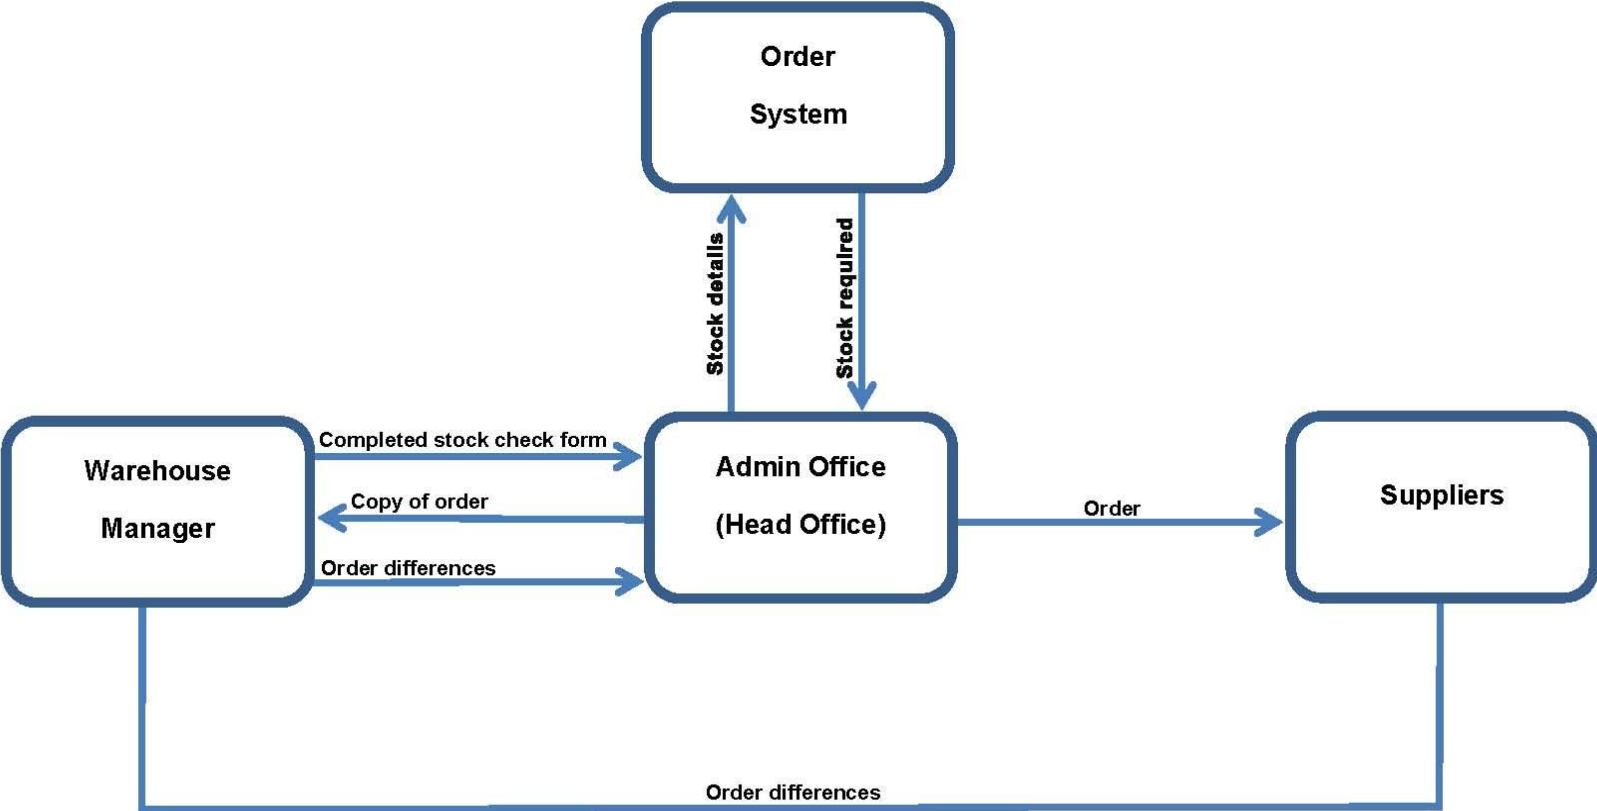

| Annotation | Meaning |
|-------------|--|
| BP | Blank Page – this annotation must be used on all blank pages within an answer booklet (structured or unstructured) and on each page of an additional object where there is no candidate response. |
| ^ | Something vital to the mark point has been omitted. |
| BOD | Benefit of the doubt given. |
| NBOD | Benefit of the doubt not given. |
| CON | Candidate contradicts him/herself. |
| NAQ | Candidate has not answered the question as set. |
| MTP | Candidate has missed the point of the question. |
| W | Candidate is working towards a mark but has not given enough to receive credit at this point. |
| NE | Not enough for the candidate to receive credit. |
| TV | Answer is too vague to receive credit. |
| FTC | Follow-through credit. When an earlier wrong answer has been penalised, this may be used to show that credit can now be given to a part of the script which depends on that earlier wrong answer. This avoids penalising a candidate twice for the same error, but should only be used where specified by the PE. |
| MAX | Shows that the maximum number of marks for a part-question or question has been awarded (even though the answer may contain further correct points). |
| R | The point repeats one already awarded credit. |
| JE | Candidate has <i>just</i> given enough to be awarded a mark. |

Subject-specific Marking Instructions

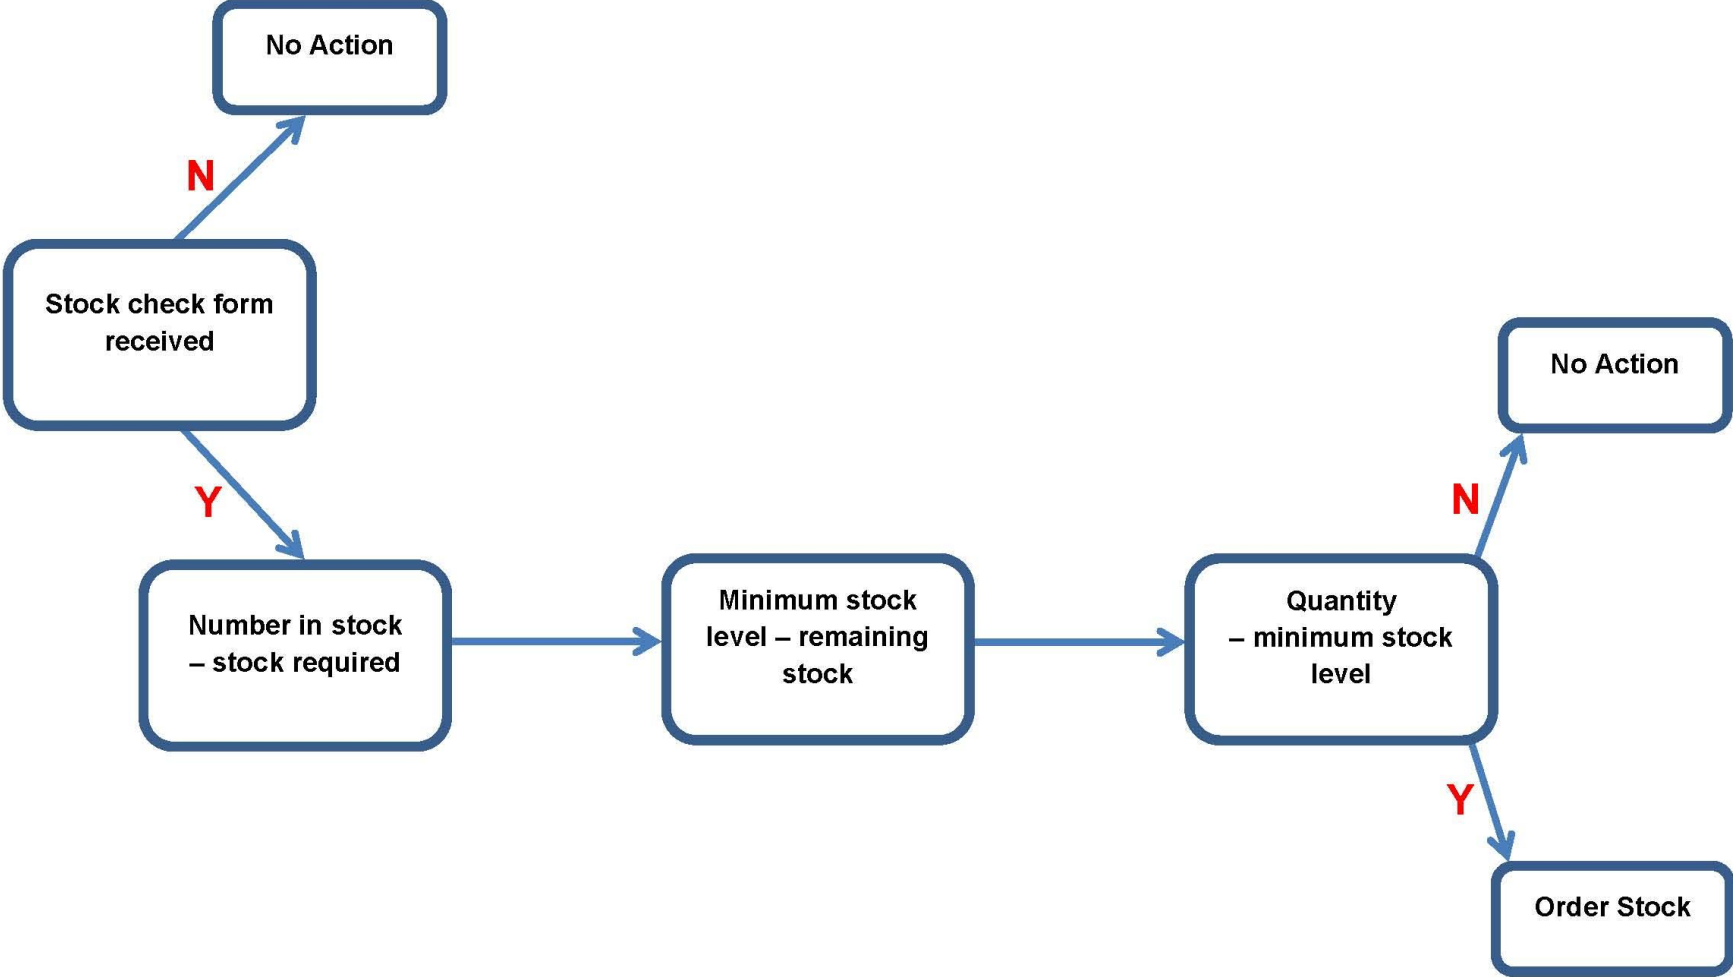

There are 100 marks available for this test. They are allocated as follows:

- Tasks 2, 3 and 4 30
- Section A of the test paper 50
- Section B of the test paper 20

| Task | Answer | Marks | Guidance | | | | | | | | |
|------|---|-------|----------|---|--|---|--|---|--|----|--|
| 2 | <p>12 marks available for L0 DFD (see attached example)</p> <p>1 mark available for each of: Warehouse (manager) clearly identified - W Supplier clearly identified - SU Administration office/staff clearly identified – A Order system clearly identified - O Logical order of processes - L Consistency - C</p> <p>1 mark for each correct flow of information - F (Max 7)</p> <table border="1" data-bbox="367 691 1144 935"> <thead> <tr> <th data-bbox="367 691 524 722">Mark</th> <th data-bbox="524 691 1144 722"></th> </tr> </thead> <tbody> <tr> <td data-bbox="367 722 524 794">1</td> <td data-bbox="524 722 1144 794">Some comment on method(s) used to develop L0 DFD</td> </tr> <tr> <td data-bbox="367 794 524 866">2</td> <td data-bbox="524 794 1144 866">A strength / weakness in method(s) used identified</td> </tr> <tr> <td data-bbox="367 866 524 935">3</td> <td data-bbox="524 866 1144 935">A strength and weakness in method(s) used identified</td> </tr> </tbody> </table> | Mark | | 1 | Some comment on method(s) used to develop L0 DFD | 2 | A strength / weakness in method(s) used identified | 3 | A strength and weakness in method(s) used identified | 15 | <p>Max 12 for L0 DFD</p> <p>Max 3 for evaluation (AO4)</p> |
| Mark | | | | | | | | | | | |
| 1 | Some comment on method(s) used to develop L0 DFD | | | | | | | | | | |
| 2 | A strength / weakness in method(s) used identified | | | | | | | | | | |
| 3 | A strength and weakness in method(s) used identified | | | | | | | | | | |

| Task | | Answer | Marks | Guidance |
|------|--|---|-------|----------------------|
| 3 | | 1 mark for: Consistency All flows labelled Each decision box having 2 exit flows (max 2) No action from each decision box (max 2) Mathematical logic correct Each process (max 5) | 10 | See attached example |

| Task | | Answer | Marks | Guidance |
|------|--|---|-------|--|
| 4 | | <p>1 mark available for each of:</p> <ul style="list-style-type: none"> • Customer details • Machines hired + Price per hire + Dates hired • Services supplied + Quantity • VAT + Total for month • Date of invoice + month <p>+ 1 from:</p> <ul style="list-style-type: none"> • Use of colour/font/white space • Logical order of information • Identification of TU • All data/information shown is appropriate with no omissions/extra data required | 5 | <p>1 mark available for each – Max 5</p> <p>Do not accept pre-populated/examples of completed invoice</p> <p>First one required plus any three other plus one from last four</p> |

SECTION A

NOTE: TU = Tools Unlimited

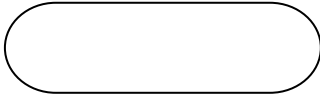

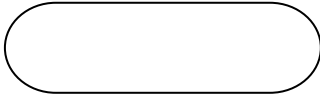

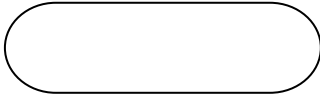

| Question | | | Answer | Marks | Guidance |
|----------|---|----|--|-------|--|
| 1 | | | Reduce errors (1 st) Validation of inputs / all calculations automated (1) To upgrade applications software (1 st) using the same vendors (1) | 4 | 2 from list given Max 2 per description |
| 2 | | | Definition Functional requirements are what the user (1) wants the system to do (1) Examples To calculate stock levels (1) To keep a database of customers/ suppliers(1) Customers/suppliers to have unique numbers (1) To carry out searches based on unique numbers (1) To hold supplier details including stock/machines/consumables supplied (1) To record payments / keep accounts (1) To produce reports (1) Bookings be able to be accessed by admin staff taking hire bookings (1) | 6 | Max 4 for examples from TU |
| 3 | a | | Vendor (1st) of applications software / operating system (1) to be kept the same (1) newer versions (1) | 3 | |
| | b | i | Hardware | 1 | Correct answer only |
| | b | ii | eg Provide a handheld tablet (1 st) for the warehouse manager (1) to submit the stock check form electronically (1) | 3 | To be awarded marks for this part of the question b(i) must be correct |

| Question | Answer | Marks | Guidance |
|----------|--|-------|---|
| 4 | <p>Stock orders / the amount of stock required (1) cannot be read due to illegible handwriting (1) This has led to the incorrect amount of consumables being ordered (1) so customers requirements cannot be met (1)</p> | 4 | |
| 5 | <p>To produce reports (1st) the total number of hires for each hire period (mid-week or weekend) on a monthly basis / the amount of revenue that each machine brings to the business / breakdown of the number of hires for each machine, on a monthly basis / list of account customers who have outstanding invoices on a weekly basis. (1)</p> <p>A daily stock check form (1st) be sent electronically / including pre-populated fields (1)</p> | 4 | Max 2 marks per requirement |
| 6 | <p>Advantages eg: System is developed to meet needs of TU (1) no unwanted/un-needed features (1) Has specified features (1) system functions exactly as needed (1) TU owns the software (1) so could sell to other tool hire businesses to recoup cost (1)</p> <p>Disadvantage eg: If the analysis is incorrect / anything is missed out (1) the system is not fit for purpose (1) If the developers go out of business (1) can be difficult to get support (1)</p> | 4 | <p>Max 2 per explanation</p> <p>1 advantage Max 2 1 disadvantage Max 2</p> |

| Question | Answer | Marks | Levels of Response | | | | | | | | | | | | |
|----------|---|---|--|------|------------|--|---|------|---|---|-----|--|---|-----|--|
| 7 | <p>Answers may include:</p> <p>Advantages A rapport can be developed with the staff / owner of TU Questions can be altered based on responses Additional questions can be asked to clarify points / gain extra information</p> <p>Disadvantages Can be time-consuming and expensive Can get misleading or insufficient information if questions are not correct / appropriate It may not be possible to interview everyone</p> <p>Examples eg Different sites so would be time consuming Small business so productivity / tasks would take longer Different users have different needs from system Not all staff at TU are computer literate</p> | 12 | <table border="1"> <thead> <tr> <th data-bbox="1276 236 1384 300">Band</th> <th data-bbox="1384 236 1496 300">Mark Range</th> <th data-bbox="1496 236 2074 300"></th> </tr> </thead> <tbody> <tr> <td data-bbox="1276 300 1384 695">H</td> <td data-bbox="1384 300 1496 695">9-12</td> <td data-bbox="1496 300 2074 695"> Candidates will show a clear understanding of the question and include a detailed discussion, including the advantages and disadvantages of using interviews as an investigation method. Examples will relate to TU The information will be presented in a structured and coherent form. There will be few if any errors in spelling, grammar and punctuation. Technical terms will be used appropriately and correctly. </td> </tr> <tr> <td data-bbox="1276 695 1384 1059">M</td> <td data-bbox="1384 695 1496 1059">5-8</td> <td data-bbox="1496 695 2074 1059"> Candidates will show an understanding of the question. A discussion including the advantage(s) and disadvantage(s) of using interviews as an investigation method will be given. Discussion may be one sided. Some examples given relate to TU The information will be presented in a structured format. There may be occasional errors in spelling, grammar and punctuation. Technical terms will be mainly correct. </td> </tr> <tr> <td data-bbox="1276 1059 1384 1393">L</td> <td data-bbox="1384 1059 1496 1393">0-4</td> <td data-bbox="1496 1059 2074 1393"> Candidates will demonstrate a limited understanding of the question. Information may be a list of points, with little or no explanations. Examples, if given, may not relate to TU Information will be poorly expressed and there will be a limited, if any, use of technical terms. Errors of grammar, punctuation and spelling may be intrusive. </td> </tr> </tbody> </table> | Band | Mark Range | | H | 9-12 | Candidates will show a clear understanding of the question and include a detailed discussion, including the advantages and disadvantages of using interviews as an investigation method. Examples will relate to TU The information will be presented in a structured and coherent form. There will be few if any errors in spelling, grammar and punctuation. Technical terms will be used appropriately and correctly. | M | 5-8 | Candidates will show an understanding of the question. A discussion including the advantage(s) and disadvantage(s) of using interviews as an investigation method will be given. Discussion may be one sided. Some examples given relate to TU The information will be presented in a structured format. There may be occasional errors in spelling, grammar and punctuation. Technical terms will be mainly correct. | L | 0-4 | Candidates will demonstrate a limited understanding of the question. Information may be a list of points, with little or no explanations. Examples, if given, may not relate to TU Information will be poorly expressed and there will be a limited, if any, use of technical terms. Errors of grammar, punctuation and spelling may be intrusive. |

| Question | Answer | Marks | Guidance |
|----------|--|-------|--|
| 8 | <p>Advantages eg: Disruption kept to a minimum (1) as system will be implemented over a weekend / when TU is closed (1) System is implemented very quickly (1) so issues with old system can be reduced (1)</p> <p>Disadvantage eg: All current data could be lost (1) if any bugs/errors not found during testing (1) Planning for this implementation method (1) must be thorough (1) Staff may not be familiar with the system (1) if they have not been fully trained (1)</p> | 4 | Max 2 per description 1 advantage Max 2 1 disadvantage Max 2 |
| 9 | i | 1 | Correct answer only |
| | ii | 4 | To be awarded marks for this part of the question (i) must be correct 2 from list, Max 2 per action |

Section B

| Question | | Answer | Marks | Guidance | | | | | | | | |
|--------------------------|--|---|---------------------|----------------------|-----------------|---|------------|---|--------------------------|--|---|---|
| 10 | i | 3 from: If maintenance needed at a later date / post implementation (1) the developer would be able to see how the software was constructed (1) as it is very unlikely that the developer doing the maintenance (1) would be the same as that who developed the system initially (1) | 3 | | | | | | | | | |
| 10 | ii | To ensure most up-to-date version is used (1) to be able to track changes (1) made through different versions (1) | 3 | | | | | | | | | |
| 11 | i | <table border="1"> <thead> <tr> <th>Label (1 mark each)</th> <th>Symbol (1 mark each)</th> </tr> </thead> <tbody> <tr> <td>External Entity</td> <td></td> </tr> <tr> <td>Data Store</td> <td></td> </tr> <tr> <td>Flow of data/information</td> <td></td> </tr> </tbody> </table> | Label (1 mark each) | Symbol (1 mark each) | External Entity |  | Data Store |  | Flow of data/information |  | 4 | Symbol must be labelled correctly to be awarded label mark. |
| Label (1 mark each) | Symbol (1 mark each) | | | | | | | | | | | |
| External Entity |  | | | | | | | | | | | |
| Data Store |  | | | | | | | | | | | |
| Flow of data/information |  | | | | | | | | | | | |

| Question | | | Answer | Marks | Guidance |
|----------|--|----|--|-------|----------------------------|
| 11 | | ii | Storyboards Rich picture diagram Systems flowcharts Entity-relationship diagrams Data dictionary Decision tree/tables Structured English | 2 | 2 from list 1 mark each |

| Question | Answer | Marks | Levels of Response | | |
|----------|--|-------|--------------------|------------|--|
| 12 | <p>Answers may include:</p> <p>Description A diagrammatical way of defining of the structure of data and the relationships between entities and relationships Generally accepted as ERD's and data dictionaries</p> <p>Advantages eg Can be easily converted to a database if done correctly as primary and foreign keys are used to create links Clients can understand diagrams Moves on from creating DFD – entities and data stores can relate between DFD and ERD Does allow changes to be made by client and queries to be hardcoded</p> <p>Disadvantages eg May be difficult for clients to understand Large systems can be difficult to represent If errors are made defining entities / relationships then the system will not work as intended System can be too complicated / require too many entities If developer does not keep referring back to user requirements then system may not meet the needs of the client</p> | 8 | Band | Mark Range | |
| | | | H | 6-8 | Candidates will show a clear understanding of the question and include detailed evaluation including the advantages and disadvantages of the use of logical data modelling. The information will be presented in a structured and coherent form. There will be few if any errors in spelling, grammar and punctuation. Technical terms will be used appropriately and correctly. |
| | | | M | 3-5 | Candidates will show an understanding of the question and include an evaluation including the advantage(s) and disadvantage(s) of the use of logical data modelling. Evaluation may be limited or one-sided. The information will be presented in a structured format. There may be occasional errors in spelling, grammar and punctuation. Technical terms will be mainly correct. |
| | | | L | 0-2 | Candidates will demonstrate a limited understanding of the question. Information may be a list of advantages or disadvantages, with little explanation. Information will be poorly expressed and there will be a limited, if any, use of technical terms. Errors of grammar, punctuation and spelling may be intrusive. |
