

Physical Education

Advanced Subsidiary GCE

Unit G451: An Introduction to Physical Education

Mark Scheme for June 2013

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

© OCR 2013

Mark Scheme

June 2013

1. Annotations

Annotation	Meaning
\checkmark	Correct response
×	Incorrect response
BOD	Benefit of the doubt
REP	Repeat of key point in question or point already awarded
?	Unclear
L1	Level 1
L2	Level 2
L3	Level 3
KU	Knowledge and Understanding
EG	Example/Reference
TV	Too Vague
DEV	Development
SEEN	Noted but no credit given
IRRL	Significant amount of material which does not answer the question

2. Subject-specific Marking Instructions

Marking responses 'a – d'; points marked questions

An element of professional judgement is required in the marking of G451. Correct answers should always be rewarded irrespective of whether or not they appear on the mark scheme. If you are in doubt about the validity of any answer then consult your Team Leader (Supervisor) by phone, scoris messaging or e-mail.

Marking response 'e'; levels of response marked question

It is quite possible for an excellent and valid answer to contain knowledge and arguments which do not appear in the indicative content on the mark scheme. Each answer must be assessed on its own merits according to the generic descriptors and discriminators.

The levels of response descriptors are cumulative, ie a description at one level builds on or improves the descriptions at lower levels. Not all qualities listed in a level must be demonstrated in an answer for it to fall in that level.

Mark Scheme

G451

Marking response 'e'; levels of response marked question - continued

Candidates will take different approaches to achieve within the same level. Some will adopt a less focused approach but demonstrate a wide range of knowledge others may adopt a more focused approach using a narrower range of well-developed knowledge.

Approach to marking levels of response questions:

- read the candidate response in full;
- working from the top down and using a *best-fit* approach, refer to the generic descriptors and discriminators to determine the level;
- re-read the answer, annotating credit worthy aspects of the response in relation to knowledge, understanding, development, examples, etc;
- confirm or revise initial decision re level;
- determine the mark within the level as per the guidance in 10 (above and below), with reference to the discriminators, and, again, using a *best-fit* approach.

Descriptor	Award mark
Consistently meets the criteria for this level	At top of level
Meets the criteria but with some slight inconsistency	Above middle and either below top of level or at middle of level (depending on number of marks available)
Just enough achievement on balance for this level	Above bottom and either below middle or at middle of level (depending on number of marks available)
On the borderline of this level and the one below	At bottom of level

Mark Scheme

June 2013

Section A – Anatomy and Physiology

Q	uestic	on	Answer	Marks	Guid	lance
1	(a)) 4 marks for 4 from:	4	Use professional judgement in and 4	spellings of muscles in pt 3	
					Accept	Do not accept
			1. Hinge		1 Synovial hinge	Synovial on own
			2. Extension		2	
			 Rectus Femoris / Vastus Lateralis/ Vastus Medialis / Vastus Intermedius Biagon Femoria/Semimombroposus/ 		3 Quads with correctly named muscle (must be first if list)	Quadriceps on own
			 Biceps Femoris/Semimembranosus/ Semitendinosus 		4 Hamstrings with correctly named muscle (must be first if list)	Hamstrings on own

(b)	(i)	 3 marks for 3 from: Mark first three attempts only 	3	Mark first 3 attempts only			
				Accept	Do not accept		
		1. Skeletal or muscle or muscular pump		1 Muscular contractions around veins	Muscular contractions or muscles on own		
		2. (Pocket) valves		2			
		3. Respiratory (muscle) pump		3	Pulmonary pump / Respiratory muscles on own		
		4. Smooth muscle		4 Veno-constriction / increased venous tone / increased sympathetic stimulation (of veins)			
	(ii)	3 marks for 3 from: Submax 2 for points 1–5 Must hit pt 6 and/or pt 7 for max	3				
				Accept	Do not accept		
		 (Increased volume of blood entering the heart) 1 causes the (walls of the) atria to stretch 		1			
		(which) stimulates the SA node to increase heart rate or firing rate or rate of impulses		2	Increased heart rate on own		
		3 causes the (walls of the) ventricles to stretch / causes increased EDV or end diastolic volume		3 causes walls of the heart to stretch			
		 (which) causes a stronger force of contraction or increased contractility (of ventricle walls) / causes 		4			
		decreased ESV or end systolic volume 5. increase in stroke volume or SV or cardiac output or Q		5 more blood pumped out of the heart per beat = BOD	Increase in CO		
		6. increase blood or oxygen supply to muscles		6	More blood or oxygen around body		
		 increases endurance / delays fatigue or OBLA or lactate threshold / increases intensity of performance / increases removal or decreases levels of lactic acid or carbon dioxide or CO₂ 		7	Better or improved quality of performance		

Mark Scheme

June 2013

Question	Answer	Marks		Guidance
Question (c) (i)	Answer 2 marks for 2 from: Mark first two attempts only 1. Linear motion (created when) a body moves with all parts moving at the same	Marks 2	Mark first two attempts Accept Theoretical description ONLY if	s only Do not accept Names of motion on own / EG of type of motion from cycling
	velocity or same speed in the same direction / the cyclist's head or torso or arms or helmet or bike frame moves in a straight or curved line		linked to " body " or " object " or eq't. 1	without description e.g. linear motion – bike frame / Theoretical description if linked to "cyclist" or "bike" on own Cyclist or bike on own
	 Angular motion (created when) a body or part of a body moves in a circle or part of a circle around a (fixed) point / the cyclist's leg moves around the (hip) joint or axis / the pedals or wheels or spokes on the bike move around a (fixed) point 		2 when a body turns about an axis	Moves at an angle / Moves in a circular motion / Cyclist or bike on own
	3. General motion (created when) there is a combination of linear and angular motion <i>I</i> the body of the cyclist moves in a straight line and the legs move around a pivot or eq. / the frame of the bike moves in a straight line and the wheels move around a fixed point or eq.		3	Cyclist or bike on own

Mark Scheme

6

Que	estion		Answer	Marks		Guidance
	(C)	(ii)	2 marks for 2 from:	2		
					Accept Correct description of law without name if in the correct order	Do not accept
			1. Newton 2: The acceleration or rate of change of momentum or velocity of an object is proportional t the (size of) force (and takes place in the direction in which the force acts))	1 change of speed = BOD	Law of Acceleration on own / F = ma on own / Momentum or velocity or speed on own (without reference to change) / The larger the force applied the greater the acceleration of a body = TV
			2. Newton 3: For every action there is an equal and opposite reaction		2 every force has an equal and opposite force	Law of Reaction on own

Question	Question Answer M		Guidance			
(c) (iii)	 1 mark for 1 from: 1. racket strings apply a force to the ball, the ball applies an equal and opposite force to the strings or vice versa / 	1		act situation with equal and om both bodies <u>at the same</u>		
	• a games player jumps and applies a (downward or		Accept	Do not accept		
	 action) force on the ground that applies a (downward of action) force on the ground that applies an equal or upward or opposite or reaction force on the player / a ball applies a force on the crossbar that applies an equal and opposite force on the ball / an athlete/swimmer pushes against the blocks, the same force will be applied back to the athlete/swimmer in the opposite direction / when a footballer strikes the ball, the same force will be applied on the player's foot in the opposite direction / when a trampolinist lands, the same force will be applied on the person, propelling them upwards 		1. any other suitable example.	Brief example without attempt at explanation e.g. bouncing a ball on own / ball hitting a crossbar on own		

			Accept	Do not accept Prevents heart disease or
4				CHD / Opposites, i.e. a lack of exercise causes
1.	(cardiac) hypertrophy / bradycardia or decreased (resting) heart rate / increased efficiency or strength of heart or stroke volume or SV / athlete's heart / improved heart or vascular function		1 more blood leaving heart per beat	Increased cardiac output or Q
2.	helps prevent cholesterol or plaque or fatty deposits forming in arteries / helps prevent atherosclerosis or narrowing of arteries		2 reduced cholesterol on own = BOD / helps prevent blockages or clogging up of arteries = BOD	
3.	helps prevent arteriosclerosis or hardening of arteries / maintains elasticity of arteries or artery walls		3	Keeps arteries flexible
4.	helps prevent heart attack or myocardial infarction or angina		4	
5.	increase in HDLs or High Density Lipoproteins		5	
6.	decrease in LDLs or Low Density Lipoproteins		6	
7.	helps prevent blood clots forming / reduce blood viscosity		7	
8.	reduce body weight or obesity or body fat / maintains healthy body weight		8	
9.	reduce blood pressure or hypertension		9	
	3. 4. 5. 6. 7. 8.	 function 2. helps prevent cholesterol or plaque or fatty deposits forming in arteries / helps prevent atherosclerosis or narrowing of arteries 3. helps prevent arteriosclerosis or hardening of arteries / maintains elasticity of arteries or artery walls 4. helps prevent heart attack or myocardial infarction or angina 5. increase in HDLs or High Density Lipoproteins 6. decrease in LDLs or Low Density Lipoproteins 7. helps prevent blood clots forming / reduce blood viscosity 8. reduce body weight or obesity or body fat / maintains healthy body weight 	 function 2. helps prevent cholesterol or plaque or fatty deposits forming in arteries / helps prevent atherosclerosis or narrowing of arteries 3. helps prevent arteriosclerosis or hardening of arteries / maintains elasticity of arteries or artery walls 4. helps prevent heart attack or myocardial infarction or angina 5. increase in HDLs or High Density Lipoproteins 6. decrease in LDLs or Low Density Lipoproteins 7. helps prevent blood clots forming / reduce blood viscosity 8. reduce body weight or obesity or body fat / maintains healthy body weight 	function 2. helps prevent cholesterol or plaque or fatty deposits forming in arteries / helps prevent atherosclerosis or narrowing of arteries 3. helps prevent arteriosclerosis or hardening of arteries / maintains elasticity of arteries or artery walls 4. helps prevent heart attack or myocardial infarction or angina 5. increase in HDLs or High Density Lipoproteins 6. decrease in LDLs or Low Density Lipoproteins 7. helps prevent blood clots forming / reduce blood viscosity 8. reduce body weight or obesity or body fat / maintains healthy body weight

Level 3 (8–10 marks)	At Level 3 responses are likely to include:
 A comprehensive answer: detailed knowledge and understanding effective analysis/critical evaluation and/or discussion/explanation/development clear and consistent practical application of knowledge accurate use of technical and specialist vocabulary high standard of written communication. 	 detailed knowledge of the effect of being at altitude on the respiratory system knowledge of partial pressure and diffusion gradient effective discussion of the influence of being at altitude on endurance performance or sub-max intensity at the top of level: discussion of the influence of altitude on other exercise intensities
 Level 2 (5–7 marks) A competent answer: satisfactory knowledge and understanding analysis/critical evaluation and/or discussion/explanation/development attempted with some success some success in practical application of knowledge technical and specialist vocabulary used with some accuracy written communication generally fluent with few errors. 	 At Level 2 responses <u>are likely</u> to include: satisfactory knowledge of the effect of being at altitude on the respiratory system satisfactory discussion of the influence of being at altitude on physical activity and/or satisfactory discussion of long term training effects
 Level 1 (1–4 marks) A limited answer: basic knowledge and understanding little or no attempt to analyse/critically evaluate and/or discuss/explain/develop little or no attempt at practical application of knowledge; technical and specialist vocabulary used with limited success written communication lacks fluency and there will be errors, some of which may be intrusive. 	 At Level 1 responses are likely to include: basic knowledge of the effect of being at altitude on the respiratory system the influence of being at altitude on physical activity discussed with limited success and/or long term training effects discussed with some success

Question	Answer	Marks	Guidance
(e)*	Indicative content: Candidate responses are likely to include: (relevant responses not listed should be acknowledged) Numbered points = knowledge/understanding Bullet points = likely to be development	10	
	PRE-ACCLIMATISATION (= negative) The effect of altitude on the <u>respiratory</u> system		
	 Decrease in atmospheric pressure / air thinner causes increase in breath frequency or ventilation rate or minute ventilation or pulmonary ventilation hyperventilation causes an increase in water loss Decrease in pressure of oxygen (in atmospheric air compared to sea level) / less oxygen (in the air compared to sea level) Decrease in efficiency of (external) respiration or the respiratory system 		Pt 2 – accept decrease in partial pressure or decreased concentration of oxygen

Question	Answer	Marks	Guidance
	PRE-ACCLIMATISATION (PERFORMANCE WHILE AT ALTITUDE)		
	The influence of altitude on the performance of different intensities of physical activity.		
	(Sub-max exercise intensity = negative)		
	9. Aerobic or endurance or sub-max intensity performance deteriorates		
	 can not train at the intensity possible at sea level 		
	 can not train for as long as possible at sea level 		
	detraining or reversibility will occur		
	10. VO ₂ max or aerobic capacity is reduced		
	 increase in lactic acid or anaerobic work / slower removal of lactic acid 		
	 early fatigue or OBLA or lactate or anaerobic threshold 		
	e.g. cyclists in the Tour de France		
	11. Low intensity exercise less affected		
	e.g. mountain walking		
	(Max exercise intensity = mixed)		
	12. (Some) Anaerobic or power-based or high intensity performances are unaffected		
	13. (Some) Anaerobic or power-based or high intensity performances benefit from lower air resistance or lower atmospheric pressure or thinner air		
	e.g. throwing events : discus or javelin will travel further		
	e.g. jumping events : triple jump or long jump will travel further		
	e.g. sprinting events : sprinters can run faster		
	 14. (Some) In anaerobic or high intensity or speed endurance activities - performance deteriorates decreased tolerance to or buffering of lactic acid 		
	 increased levels of lactic acid inhibits or denatures enzyme action 		
	e.g . 200m or 400m or 800m		

Question	Answer	Marks	Guidance
	POST-ACCLIMATISATION (= positive) : The effect of altitude on the <u>respiratory</u> system		
	15. (after 4-6 weeks) altitude training increases efficiency of respiratory system / respiratory adaptations or acclimatisation occurs		
	 increased number or surface area of alveoli 		
	 capillarisation or increased capillary density at alveoli or muscles 		
	 increased capacity for gaseous exchange or diffusion at alveoli or muscles 		
	 increased release of EPO or erythropoietin 		
	 increased haemoglobin or red blood cell or erythrocyte content 		
	 increased oxygen carrying capacity of blood /increased oxygen to muscles 		
	 increased strength of respiratory muscles e.g. diaphragm or intercostals or SCM or scalenes or(etc) 		
	 increased lung volumes or capacity or depth of breathing or tidal volume 		
	The influence of altitude on the performance of different intensities of physical activity.		
	(PERFORMANCE ON RETURNING TO SEA LEVEL)		
	(Sub-max exercise intensity = positive)		
	16. Aerobic or endurance or sub-max intensity performance improves		
	17. VO ₂ max or aerobic capacity is increased		
	increase in aerobic work / decrease in anaerobic work		
	 delayed fatigue or OBLA or lactate or anaerobic threshold / can work for longer 		
	e.g. distance runners performing at sea level after a period at altitude		
	(Max exercise intensity = mixed)		
	18. (Some) Anaerobic or power-based or high intensity performances are unaffected		
	19. Anaerobic or max intensity performance improves		
	• muscles have increased buffering capacity or increased tolerance to lactic acid or increased capacity		
	to remove lactic acid / can work at a higher intensity for longer		
	Other possible discussion may include:		
	altitude considered over 1500m above sea level		
	2000-2500m is optimal altitude for acclimatisation		
	minimum of 28 days needed for acclimatisation		
	LHTL or Live High Train Low more beneficial (than training at altitude)		
	sea level training intensities can be maintained		
	use of altitude or hypoxic tents		
	disadvantages of being at altitude on recovery times / benefits of adaptations on recovery times		
	reference to asthma or smoking		
	Tota	30	

Mark Scheme

June 2013

Section B – Acquiring Movement Skills

Question	Answer		Guidance		
2 (a)	 4 marks for 4 from: Award mark when an explanation omits reference to slower/quicker (number of stimuli) more stimuli or choices or alternative responses or decisions – then RT slower/longer (type of skill) if skill open or complex or externally-paced - then RT slower/longer (PRP) If 'sold dummy' or given 'fake pass' / if psychological refractory period (PRP) or single channel hypothesis active - then RT slower/longer (distractions/selective attention) if there are distractions or noise / if performer unable to selectively attend / when social inhibition impedes decision making - then RT slower/longer (age)if too old or too young – then RT slower/longer / at optimum age – then RT quicker/shorter (gender) if female - slower/longer RT than males (generally) (height/hands-feet) the longer the neural pathways or taller the person – then RT glower/longer / RT of hands shorter or quicker than of feet / using dominant limb – then RT quicker/shorter 	4	Accept ref to reaction time=BOD (as it affects response time) / Opposites 1. 2. 3. 4. 5. 6. 7.	Do not accept Lists of factors with no attempt at explanation	

Mark Scheme

Question		Answer	Marks	Guidance
	8.	(warm up/temperature) if warm up completed – then RT quicker/shorter / If muscle or body temperature too high or too low - then RT slower/longer		9.
	9.	(environment) environmental conditions with explanation / (e.g.) windy conditions can impede perception or confuse - RT slower/longer		5.
	10.	(intensity/warning) if stimulus intense or if S-R bond very compatible or predictable / if warning given (e.g. 'on your marks') – then RT quicker/shorter		10. brightness/loudness for intensity
	11.	(arousal) if arousal or alertness or motivation or anxiety too high or too low - then RT slower/longer / at optimal arousal – then RT quicker/shorter		11.
	12.	(experience/anticipation) the more experienced the performer – then RT quicker/shorter if negative past experience - then RT slower/longer / if positive past experiences - then RT quicker/shorter / with (good) anticipation or expectation – then RT quicker / shorter		12. Stage of learning if accurately linked with RT longer or shorter
	13.	(drugs/tiredness) alcohol or drugs or tiredness - then RT slower/longer (or quicker/shorter depending on type of drug)		13.
	14.	(personality) (some argue that) extroverts have quicker/shorter RT than introverts (BOD)		14.
	15.	(fitness/skill) the fitter or healthier or more skilful the person is / if in autonomous phase or if motor programmes established - then RT quicker/shorter		15. reference to disability if explained

Question				ance
Question (b)	 Answer 4 marks for 4 from: Mark first four definite attempts Need strategy + brief description for each mark 1. Give reward / give award or certificate or fruit (description) e.g. award or certificate or fruit / to make them want to continue or work harder / to increase confidence / when they show healthy behaviour 2. Positive reinforcement / give praise or positive feedback or a satisfier (description) e.g. praise /positive feedback / a satisfier/ when healthy behaviour shown / to strengthen SR bond / to raise confidence or raise self-esteem or make them want to continue 3. Negative reinforcement / withdraw negative or unpleasant stimulus or annoyer or negative feedback / (description) withdraw negative stimulus or annoyer or negative feedback / when healthy behaviour shown / to strengthen (correct) SR bond / to raise confidence or self- esteem 4. Punishment / tell them off / withdraw privileges (description) to break undesired SR bond / when unhealthy lifestyle shown / to stop dysfunctional or unpealthy behaviour / so they try again 	4	Accept alternative suitable attempts at description. Reference to sport or skills (which can lead to BAHLs) 1. egs of rewards as either strategy or description e.g. certificate to increase confidence (✓) OR reward such as give a certificate (✓) 2. Praise etc as either strategy or description/s e.g. positive reinforcement to raise confidence (✓) OR positive reinforcement such as praise (✓) 3. Annoyer etc as either strategy or description e.g. negative reinforcement when healthy behaviour shown (✓) OR negative reinforcement by withdrawing unpleasant stimulus(✓) 4. tell them off / withdraw privileges etc as either strategy or description e.g. punish when unhealthy behaviour shown (✓) OR punish such as withdraw privileges (✓)	anceDo not accept"so they are motivated" – as description / Same factor as both strategy AND description / Extrinsic/intrinsic motivationSame factor as both strategy AND descriptionSame factor as both strategy AND descriptionReinforcement on ownSame factor as both strategy AND descriptionImage: Same factor as both strategy AND descriptionSame factor as both strategy AND description

June 2013

Same factor as both strategy

Same factor as both strategy

Peers or friends or family on

AND description

AND description

own

	5.	Educate /inform / tell them (description-)about healthy lifestyles or health benefits / about dangers of smoking etc / information must be relevant to young peoples' needs / young people must be able to relate to info	5.
	6.	Goal or target setting (description) that is SMART or achievable / can raise confidence / can give aim or direction or success or incentive or something to work towards	6.
	7.	 (make participation) fun / enjoyable / engaging / interesting / put on taster sessions / use variety of activities (description) enjoyment / to achieve or feel confident or want to continue / don't get bored / to avoid drive reduction / put on taster sessions / use variety of activities / different to what they've done before / social interaction / with friends 	 7. Fun / enjoyment etc as either strategy or description e.g. make activities fun so young people enjoy them
	8.	Peers (pressure) / friends / make social (description) to conform or be part of group / want to continue / social interaction / be with friends	8.
	9.	significant others / role models (description) someone to look up to or copy or be inspired by or aim to be like / to gain or maintain interest / participation more likely if young people can identify with role model	9.

Mark Scheme

June 2013

Question	Answer	Marks	Guid	lance
Question (C)	 6 marks for 6 from 1. (Law of) Effect 2. (Law of) Exercise 3. (Law of) Readiness (Law of Effect – effect on SR bond/learning) 4. Reinforcement or praise or satisfaction or pleasure or enjoyment or success or positive feedback - strengthens (S-R bond) or helps learning /causes behaviour to be repeated Annoyance or lack of enjoyment or failure - weakens (S-R bond) or hinders learning (Law of Exercise – effect on SR bond/learning) 5. Repeating or rehearsing or practising movement or skill – strengthens (S-R bond) or helps learning / Tiredness or information overload or incorrect practice or lack of practise – weakens (S-R bond) or hinders learning (Law of Readiness – effect on SR bond/learning) 6. Need appropriate physical or mental capability or maturity -to strengthen (S-R bond) or help learning/ If too young or immature or perceptually 	6	Accept 1. 2. 3. Only accept description when linked with correctly named law 4. 5. 6.	Do not accept Do not accept DNA description of effect on SR bond without correctly named law
	 practice or lack of practise – weakens (S-R bond) or hinders learning (Law of Readiness – effect on SR bond/learning) 6. Need appropriate physical or mental capability or maturity -to strengthen (S-R bond) or help learning/ 		6.	

Question	Answer	Marks	Guid	ance
(d)	6 marks for 6 from: 3 max for explanation/s without egs or egs without	6	It must be clear/obvious which explained	element of model is being
	 explanation/s (Input from display) environment or information e.g. players / ball 		Accept Same or different eg/s throughout 1. surroundings	Do not accept
	 (Sense organs) receive or detect take in stimuli or information / vision or eyes / audition or ears / proprioception or kinaesthesis / info from muscles, tendons & joints 		2.	information from the senses
	 e.g. eyes see ball coming 3. (Perceptual mechanism) interpretation / judgement /selective attention / making sense of sensory information or the situation / e.g. recognise object as a ball /focus on ball / interpretation of the spin etc / 		 3. work out what you want or need to do considers past experience/s / Looks at options available (BOD) 	perceive situation on own
	 decision making / selecting or forming motor plan or programme / involves memory or DCR process e.g. decision (to move hands) to catch ball 4. (Effector mechanism) transfers or transmits decision or information or motor programme or impulse (from brain) to muscles e.g. sent (via nervous system) to limb/s 5. (Muscular system) muscle movement (to catch ball) e.g. arm muscles move arm into position 		elements of memory process 4. 5. carries out movement 6.	'muscles told what to do'=TV
	 (Response) end product or movement or outcome e.g. ball is caught 			

June	201	3
------	-----	---

Level 3 (8–10 marks)	At Level 3 are likely to include:
A comprehensive answer:	
 detailed knowledge and understanding 	all types of guidance
 effective analysis/critical evaluation and/or 	effective evaluation of most types of guidance
discussion/explanation/development	• use of guidance in relation to skills and lifestyle successfully
 clear and consistent practical application of knowledge 	attempted
 accurate use of technical and specialist vocabulary 	at the top of level:
high standard of written communication.	effective evaluation of all types of guidance
Level 2 (5–7 marks)	At Level 2 <u>are likely</u> to include:
A competent answer:	
 satisfactory knowledge and understanding 	 satisfactory evaluation of most types of guidance
 analysis/critical evaluation and/or 	use of guidance in relation to lifestyle attempted
discussion/explanation/development attempted with some success	use of guidance in relation to skills attempted
 some success in practical application of knowledge 	
• technical and specialist vocabulary used with some accuracy	
written communication generally fluent with few errors.	
Level 1 (1–4 marks) A limited answer:	At Level 1 responses are likely to include:
 basic knowledge and understanding 	limited evaluation of types of guidance
 little or no attempt to analyse/critically evaluate and/or 	 use of guidance in relation to skills only or lifestyle only
discuss/explain/develop	attempted
 little or no attempt at practical application of knowledge 	
 technical and specialist vocabulary used with limited success 	
 written communication lacks fluency and there will be errors, 	
some of which may be intrusive.	
(0 marks) No response or no response worthy of credit.	

Mark Scheme

Question	Answer	Marks	Guidance
(e)*	Indicative content: Candidate responses are likely to include: (relevant responses not listed should	10	
	be acknowledged) Numbered points = KU Bullet points = likely devt of knowledge		
	1. Visual guidance		
	 (description) demonstration / learner watches model / pictures / charts / video / DVD / 		
	court or pitch markings / markers / guidance lines / boxes		
	e.g. (skill) accept any suitable skill example		
	e.g. (BAHL) accept any suitable BAHL example		
	Bandura's model		
	+ve Evaluation - visual		
	2. builds mental picture / gives visual representation / lets learner know what 'skill' or 'behaviour		
	looks like		
	3. increases understanding of movement requirements or healthy living		
	corrects errors / motivates		
	e.g. (skill) accept any suitable skill example		
	e.g. (BAHL) accept any suitable BAHL example		
	4. effective in early or cognitive phase of learning		
	5. effective if relevant aspects of skill emphasised		
	6. effective if copying role model or significant other		
	7. effective if copying someone of similar ability or same gender		
	-ve Evaluation - visual		
	8. not effective if wrong model or poor demo or poor practice or poor lifestyle shown (which may		
	be copied) / demo must be correct for desired performance or behaviour (to be copied)		
	static displays lose impact		
	e.g. (skill) accept any suitable skill example		
	e.g. (BAHL) accept any suitable BAHL example		
	9. demo mustn't be too complex or detailed / not effective if overload occurs		
	10. no feedback – so less effective for autonomous learners		
	 so correct SR bonds not reinforced 		
	 so incorrect SR bonds not weakened 		
	11. should be followed by or linked with verbal guidance		

G451

Question	Answer	Marks	Guidance
	 12. Verbal guidance (description) instructions / talking it through / telling or advising or explaining to learner what to do / feedback e.g. (skill) accept any suitable skill example e.g. (BAHL) accept any suitable BAHL example 		
	 +ve Evaluation - verbal 13. builds on knowledge gained by visual guidance / good when used with visual guidance corrects errors / motivates / to learn basic body position (cognitive) 14. helps to focus on key aspects or important cues 15. effective or best for competent or more advanced or autonomous learners 16. helps understanding of tactics or strategies or more complex information or technical detail give strategies to help understanding e.g. (skill) accept any suitable skill example 		
	 e.g. (BAHL) accept any suitable BAHL example -ve Evaluation - verbal 17. not effective if too much information given or if information overload occurs can be confusing for cognitive learners / must be kept simple for cognitive learners learners can become bored 18. not effective if incorrect or unclear information given 19. not effective if too much negative feedback or criticism given 20. some skills are too complex for verbal guidance alone e.g. (skill) accept any suitable skill example e.g. (BAHL) accept any suitable BAHL example 		
	21. learner may not have the maturity to understand		

G451

Question		Answer	Marks	Guidance
	22.	Manual guidance		
		• (description) physical support or help (by teacher or coach) / moving joints or limbs through		
		movement / physically manipulating body		
	23.	Mechanical guidance		
		 (description) using equipment or apparatus (to help performance and/or participation) 		
		e.g. twisting belts / arm bands or floats / scrum machine / stabilisers / belay ropes or other eg		
				Points 24-32
		Evaluation – manual and mechanical		can be credited
	24.	effective in early or cognitive phase of learning		for both manual
		 corrects errors / learn (basic) body position (cognitive) 		and mechanical
	25.	gives confidence		
	26.	may encourage or motivates people to take up or continue exercising		
	27.	encourages correct proprioception or kinaesthesis or timing / helps give a feel for the movement		
		e.g. gives right feeling of movement when beginning exercising on a bike or other suitable e.g.		
	28.	increases safety in potentially risky activities / good for practising dangerous skills		
		e.g. (skill) accept any suitable skill example		
		e.g. (BAHL) accept any suitable BAHL example		
	-1/0	Evaluation manual and mechanical		
	29.	Not effective if: too much help given / used for too long /		
	20.	 performer can become over-reliant / remove asap to avoid over-reliance 		
	30.	can limit proprioceptive or kinaesthetic experience/s		
	31.	learner must trust coach		
	32.	difficult to use manual/mechanical guidance for BAHL		
	33.	learner may be uncomfortable with proximity of coach (manual)		
	55.	learner may be uncomortable with proximity of coach (manual)		

Mark Scheme

June 2013

Section C – Socio-Cultural Studies relating to participation in physical activity

Question	Answer	Marks	Guidance
3 (a)	 5 marks for 5 from: (Stratford) regeneration or renewal or upgraded amenities for (deprived) area / (increased) sense of community or social integration in local area (facilities) legacy of world class or specialist facilities / upgrading of (existing) facilities (participation) increased participation (in sport and physical activity) / more balanced active and healthy lifestyles / improved health or fitness (infrastructure) new or improved infrastructure / new or better communications or transport network / upgraded stations or airports (economy) good for economy / business or profit (from tourism) / new businesses created (employment) employment opportunities / job creation / skill development (for local people) (disability) greater respect for disability sport /reduced discrimination or stereotyping (SW / NB) shop window effect / showcasing of UK or London / world saw (best of) UK / nation building / increased prestige or status or image or esteem of UK (pride) national pride or patriotism 	5	AcceptDo not accept1. 're-urbanisation' of worn-down area=BOD / housing (from Olympic village)New or more facilities2. Named world class facility e.g. Olympic Stadium / velodromeNew or more facilities3. Less sedentary lifestylesMore classes4. better road or rail networkImproved or upgrade health service5. Tourists spent money=BODTourism on own6.7.8. other showcased areas e.g. Weymouth9.

------	-----	---

BUT – modern technology can:	10.
 10. lead to injury or violence e.g. from bladed boots / due to use of rugby shoulder pads which may make some players fee invincible 11. lead to cheating e.g. drugs 12. disrupt or slow down 'game' e.g. time taken for DVD playback 13. be an unfair advantage / be expensive / be dependent on sponsor e.g. F1 technology / technology not equally available to all such as high tech bikes 14. reduce traditional ethic or nature of sport / can lead to 'win at all costs' ethic e.g. use of high tech equipment at junior or local level / TV or internet or modern media that has made sport a global 'product' 	11. 12. 13. Some countries can't afford modern technology (with eg) 14.

Level 3 (8–10 marks)	At Level 3 responses are likely to include:
 A comprehensive answer: detailed knowledge and understanding effective analysis/critical evaluation and/or discussion/explanation/development clear and consistent practical application of knowledge accurate use of technical and specialist vocabulary high standard of written communication. 	 detailed description of causes (players & spectators) consistent and effective evaluation of solution/s (P & S) other solutions effectively described/discussed (P & S) both aspects of question (causes & solutions) addressed with appropriate balance
 Level 2 (5–7 marks) A competent answer: satisfactory knowledge and understanding analysis/critical evaluation and/or discussion/explanation/development attempted with some success some success in practical application of knowledge technical and specialist vocabulary used with some accuracy written communication generally fluent with few errors. 	 At Level 2 responses are likely to include: satisfactory description of causes (P & S) attempt at evaluation of solutions (P & S) satisfactory discussion/description of other solutions (P & S) both aspects of question (causes & solutions) addressed, though not necessarily with balance OR: detailed description of causes (players & spectators) solutions effectively described/discussed (P & S) both aspects of question (causes & solutions) addressed with appropriate balance
Level 1 (1–4 marks) A limited answer: basic knowledge and understanding	 At Level 1 responses are likely to: basic description of causes (P & S)
 little or no attempt to analyse/critically evaluate and/or discuss/explain/develop little or no attempt at practical application of knowledge; technical and specialist vocabulary used with limited success written communication lacks fluency and there will be errors, some of which may be intrusive. 	 little or no evaluation of solutions solutions described in basic / limited way (P & S) unequal balance between question parts, or only one part of question (causes & solutions) answered
(0 marks) No response or no response worthy of credit.	

Question	Answer	Marks	Guidance
Question (e)*	Answer Indicative content: Candidate responses are likely to include: (relevant responses not listed should be acknowledged) Numbered points = knowledge/understanding Bullet points = likely development of knowledge Causes of violence: Players and Spectators 1. frustration / anger • with match officials e.g. accept suitable example • standard of play or own performance e.g. accept suitable example • score or result e.g. accept suitable example • score or result e.g. accept suitable example 2. 'cheating' or rule breaking or gamesmanship e.g. 'diving' or 'sledging' or bad tackle other suitable example 3. importance of result / pressure to win / passion to win / Lombardianism / so much at stake • emotional intensity / adrenalin flowing / high arousal / "pumped" • pre-match psyche-up • position in league or cup or level of competition • monetary reward e.g. if World Cup match or Cup Final or other suitable example 4. provocation or abuse or chanting or retaliation or intimidation • by opponents/from team mates/from crowd	Marks	Guidance Points 1-6 can be credited for both players and spectators – but bear in mind 'variety' when awarding level and mark
	 6. rivalry / local derby / team loyalty / tradition racism or religion pre-match media hype / irresponsible coverage by media in lead up to game e.g. accept suitable example 		

Mark Scheme

Question	Answer	Marks	Guidance
	Causes of violence: Players (continued)		
	7. (potential) 'weapons'		
	sticks or clubs		
	e.g. as in hockey or ice hockey or baseball or other suitable example		
	8. nature of game / tradition of violence		
	 rules might allow or encourage (certain levels of) violence / body checking or contact as part of game 		
	e.g. ice hockey or rugby or American Football or other suitable example		
	 media or crowd might expect or want a 'hard' or physical 'contest' 		
	9. kit or equipment		
	that de-humanises or protects		
	eg American Football or other suitable example		
	10. anger management problems / psychology or emotion of certain players		
	e.g. Luis Suarez biting Branislav Ivanovic or other suitable example		
	11. drugs / steroids		
	Causes of violence: Spectators (continued)		
	12. alcohol or drugs		
	people lose their 'inhibitions' or become more brave		
	13. overcrowding / poor spectator provision		
	 poor policing or stewarding. 		
	14. hooligans (at football) / looking for a fight		
	organised violence or fights		
	Imited alternative outlets for energy		
	eg accept suitable example		
	15. mass culture / tribal nature of event		
	peer pressure		
	 loss of individual identify or diminished responsibility (within crowd) / pack mentality 		
	16. violence on pitch		

G451

Question	Answer	Marks	Guidance
	Possible solutions: Players		
	17. Change or adapt rules		
	18. More severe or more 'painful' Punishments or bans		Accept relevant
	e.g. 10-match ban for Suarez / removal or dropping from teams or leagues or competitions or heavy		alternative
	fines other suitable example		solutions that
	19. Education		candidates
	 emphasis on fair play / emphasis on being a role model 		suggest
	emphasise harm that can be done by violence		
	20. More or better qualified officials / more authority for officials		
	21. Technology		
	e.g. TMO / DVD playback		
	 for fairer outcomes (and so less frustration or anger) 		
	 as used in Rugby Union or goal line technology in Association Football 		
	22. Use of Psychology		
	e.g. calming down / anger or stress management		
	Possible solutions: Spectators		
	23. Stricter deterrents or punishments		
	e.g. remove (season) tickets or passports		
	24. Control of or ban alcohol		
	searches at gates		
	 early kick off times (before pubs open long) / later opening time (not directly after game) 		
	25. Improve spectator facilities		
	26. Separation of fans		
	 home and away fans to leave ground separately 		
	27. Use of CCTV or other security measures		
	 to spot or record incidents / to record events (for potential evidence) 		
	28. (more) Police/stewards/security		
	 better training / better relationships with spectators 		
	 sharing of information between police forces or areas within country or between countries 		
	29. Promotion of event as (family) entertainment		
	family sections in stadia		
	provision of entertainment (for children).		
	e.g. mascots / competitions / festivals / 'fun days'		
	30. responsible media coverage
