

OCR

Oxford Cambridge and RSA

Wednesday 13 January 2016 – Afternoon**LEVEL 1/2 CAMBRIDGE NATIONAL AWARD/CERTIFICATE IN
ENGINEERING MANUFACTURE****R109/01** Engineering materials, processes and production

Candidates answer on the Question Paper.

OCR supplied materials:

None

Other materials required:

None

Duration: 1 hour

Candidate forename		Candidate surname	
-----------------------	--	----------------------	--

Centre number						Candidate number				
---------------	--	--	--	--	--	------------------	--	--	--	--

INSTRUCTIONS TO CANDIDATES

- Use black ink. HB pencil may be used for graphs and diagrams only.
- Complete the boxes above with your name, centre number and candidate number.
- Answer **all** the questions.
- Write your answer to each question in the space provided.
- Do **not** write in the bar codes.

INFORMATION FOR CANDIDATES

- The total number of marks for this paper is **60**.
- The number of marks for each question is given in brackets [] at the end of the question or part question.
- Dimensions are in millimetres unless stated otherwise.
- Your quality of written communication will be assessed in questions marked with an asterisk (*).
- This document consists of **8** pages. Any blank pages are indicated.

2

Answer **all** questions.

1 Alloys, ferrous metals, non-ferrous metals and polymers are types of engineering materials.

(a) Complete the table below by giving **two** examples of each type of material.

Material type	Examples	
Alloy		
Ferrous metal		
Non-ferrous metal		
Polymer		

[8]

(b) Describe what is meant by the term 'alloy'.

.....

..... [2]

2 (a) Describe what is meant by the term 'thermochromic material'.

.....
..... [2]

(b) Give **three** reasons why cast iron is used to make machine bases.

1
2
3 [3]

(c) State **two** materials that can be supplied in powder form.

1
2 [2]

(d) Describe **one** destructive testing process on an engineering material.

.....
.....
.....
..... [3]

3 (a) (i) Name the engineering component shown in Fig. 1 below.

Fig. 1

..... [1]

(ii) Explain how this engineering component would be used to join two sheet metal parts together.

.....
.....
.....

..... [3]

(b) Give **two** other methods of joining sheet metal parts.

1

2 [2]

(c) Forging is a metal forming process.

Describe **two** benefits of using forging to make metal parts.

1 [2]

2 [2]

5

4 Fig. 2 is a line diagram of an injection moulding machine.

Fig. 2

(a) (i) Name the **four** parts of the injection moulding machine that have been labelled in Fig. 2.

- A
 - B
 - C
 - D
- [4]

(ii) Name **three** other plastics moulding processes.

- 1
 - 2
 - 3
- [3]

(b) Give **three** reasons why plastics might be preferred to metals for making engineered products.

- 1
 - 2
 - 3
- [3]

5 Computer numerically controlled (CNC) machines are widely used in engineering production.

(a) (i) Water jet cutting and milling are carried out on CNC machines.

Describe **one** advantage of water jet cutting when compared to milling.

.....
.....
..... [2]

(ii) Explain what is meant by the term 'multi-axis machining centre'.

.....
.....
.....
.....
.....
..... [3]

(b) Name **two** additive manufacturing processes.

1
2 [2]

(c) Explain how designers use modern technologies to develop new engineered products faster.

.....
.....
.....
.....
..... [3]

6 (a) (i) Explain what is meant by the term 'global manufacturing'.

.....
.....
..... [2]

(ii) Give **two** reasons why a company might use global manufacturing.

1
.....
2
..... [2]

(b)* Discuss the effects on the workforce of introducing modern technologies into engineering manufacture.

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
..... [6]
