

Cambridge Technicals Health and Social Care

Unit 4: Anatomy and physiology for health and social care

Level 3 Cambridge Technical in Health and Social Care
05830 – 05833

Mark Scheme for January 2019

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

© OCR 2019

Annotations

Annotation	Meaning
	Tick – correct answer
	Cross – incorrect answer
	Development of point (use only on questions where stated in the mark scheme)
	Level 1
	Level 2
	Level 3
	Benefit of doubt (This does count as a mark – so do not ‘tick’ as well)
	Omission mark
	Too vague
	Repeat
	Noted but no credit given

Question			Answer	Marks	Guidance
1	(a)	(i)	<p>One mark for each correct identification. Three required.</p> <p>A = cerebral cortex</p> <p>B = cerebellum</p> <p>C = hypothalamus</p>	<p>3 (3x1)</p>	<p>Annotation: The number of ticks must match the number of marks awarded.</p> <p>For incorrect answers use the cross or appropriate annotation from the following:</p> <div style="border: 1px solid black; padding: 5px; display: inline-block;"> ^ TV REP SEEN </div> <p>No other answers are acceptable.</p>
	(a)	(ii)	<p>One mark for a correct identification. One required.</p> <p>It controls autonomic functions such as heart rate <input checked="" type="checkbox"/></p> <p>It controls speech and language <input type="checkbox"/></p> <p>It coordinates movement of muscles <input type="checkbox"/></p> <p>It coordinates speech and language <input type="checkbox"/></p>	<p>1 (1x1)</p>	<p>No other answers are acceptable.</p> <p>If more than one box is ticked: 0 marks</p>
	(b)	(i)	<p>One mark for correct identification. One required.</p> <ul style="list-style-type: none"> • Myelin sheath <p>Also accept:</p> <ul style="list-style-type: none"> • Schwann cell 	<p>1 (1x1)</p>	<p>For incorrect answers use the cross.</p> <p>Do not accept myelin</p>

					Content	Levels of response
2	(b)	(ii)*	<p>Lifestyle changes to include:</p> <ul style="list-style-type: none"> • Changes in diet e.g. eat balanced diet with low salt and low fat – relatively easy to follow diet plans-for people who eat foods high in salt and fat this have positive outcome for reducing hypertension or help lose weight-could be income dependent as fresh / healthier foods e.g. fruit and vegetables seen as more expensive. People may struggle to prepare healthy meals or stick to dietary plans • Changes in exercise routine e.g. taking regular exercise - help to prevent weight gain-promote weight loss- lower BMI -if already obese will have positive outcomes and reduce hypertension. Links with dietary changes-could be a problem if medical condition prevents from undertaking exercise routine. People maybe too embarrassed to exercise or struggle with motivation • Changes in social activities e.g. stop smoking, reduce alcohol intake, reduce caffeine intake-heavy smokers or heavy drinkers will see biggest improvements. Might struggle to quit due to addiction/dependency or due to peer pressure • Changes in lifestyle routine e.g. getting sufficient sleep, reducing 	6	<p>This is a levels of response question – marks are awarded on the quality of the response given. The focus of the question is evaluate.</p> <p>Annotation: The number of ticks will not necessarily correspond to the marks awarded.</p> <p>Level 3 checklist:</p> <ul style="list-style-type: none"> • At least two aspects for lifestyle change • both positives and negatives • well-developed, clear and logically structured • factually accurate & relevant • correct use of terminology • QWC – high <p>Level 2 checklist:</p> <ul style="list-style-type: none"> • Two aspects of lifestyle change • both positives and negatives of one aspect of lifestyle change • mostly relevant and accurate information • QWC - mid <p>Level 1 checklist:</p> <ul style="list-style-type: none"> • limited / basic evaluation • basic information • positive or negative aspect of one lifestyle change • limited structure, may be list like or muddled • QWC – low 	<p>Level 3 [5-6 marks] Answers provide a detailed evaluation of at least two lifestyle changes using accurate terminology and following a logical sequence. Both positives and negatives will be given. Sentences and paragraphs are relevant with accurate use of appropriate terminology. There may be occasional errors of grammar, punctuation and spelling.</p> <p>Level 2 [3-4 marks] The answer provides a sound evaluation of possible lifestyle changes. Positive and negative for one change. Answers will be factually accurate. There may be some errors of grammar, punctuation and spelling.</p> <p>Sub-max 2 if no evaluation</p> <p>Level 1 [1-2 marks] Answer provides a limited or basic evaluation with either positive or negative aspect of one lifestyle change. May be a description / identification only. Answers may be list like, muddled, demonstrating little knowledge or understanding. Errors of grammar and spelling may be noticeable and intrusive.</p> <p>0 marks – response not worthy of credit. SEEN for a zero mark response</p>

Question	Answer/indicative content	Marks	Guidance	
			Content	Levels of response
	stress, regular health checks especially blood pressure monitoring-dependent on stressful jobs-can be difficult for some people to make such lifestyle changes due to need for income			For life changes to be credited there has to be identification of how it will be changed e.g. reduction in alcohol consumption
