

Modified Enlarged 24pt

OXFORD CAMBRIDGE AND RSA EXAMINATIONS

Friday 22 May 2020 – Afternoon

GCSE (9–1) Design and Technology

**J310/01 Principles of Design and
Technology**

**Time allowed: 2 hours
plus your additional time allowance**

YOU MUST HAVE:

the Insert (inside this document)

YOU CAN USE:

a scientific calculator

a ruler (cm/mm)

geometrical instruments

Please write clearly in black ink.

Centre number

Candidate number

First name(s) _____

Last name _____

READ INSTRUCTIONS OVERLEAF

INSTRUCTIONS

Use black ink. You can use an HB pencil, but only for graphs and diagrams.

Write your answer to each question in the space provided. If you need extra space use the lined pages at the end of this booklet. The question numbers must be clearly shown.

Answer ALL the questions.

Use the Insert to answer the questions in Section B.

Where appropriate, your answer should be supported with working. Marks might be given for using a correct method, even if your answer is wrong.

INFORMATION

The total mark for this paper is 100.

The marks for each question are shown in brackets [].

Quality of extended response will be assessed in questions marked with an asterisk (*).

ADVICE

Read each question carefully before you start your answer.

SECTION A

Answer ALL the questions.

1 FIG. 1 shows a pair of trainers.

FIG. 1

(a) The trainer upper is made from a synthetic fabric.

(i) Name ONE synthetic fabric.

_____ **[1]**

(ii) Give TWO characteristic properties of synthetic fabric that make it a suitable material for the trainer upper.

1 _____

2 _____

[2]

(b) Trainer designers often consider using new and emerging technologies when designing trainer uppers and soles.

Explain TWO benefits to designers of using new and emerging technologies in the design of trainers.

1 _____

2 _____

[4]

(c) Trainers are a popular choice of footwear.

Explain ONE reason why trainers are popular with consumers.

[2]

(d) The soles of the trainers shown in FIG. 1 are made from a polymer material.

Explain ONE reason why a polymer material is suitable for the soles of trainers.

[1]

(e) Many large companies manufacture their products overseas.

Give TWO reasons why a company might manufacture products overseas.

1 _____

2 _____

[2]

(f) When products are manufactured overseas there can be social and ethical issues.

Explain TWO social or ethical issues that manufacturers should consider.

1 _____

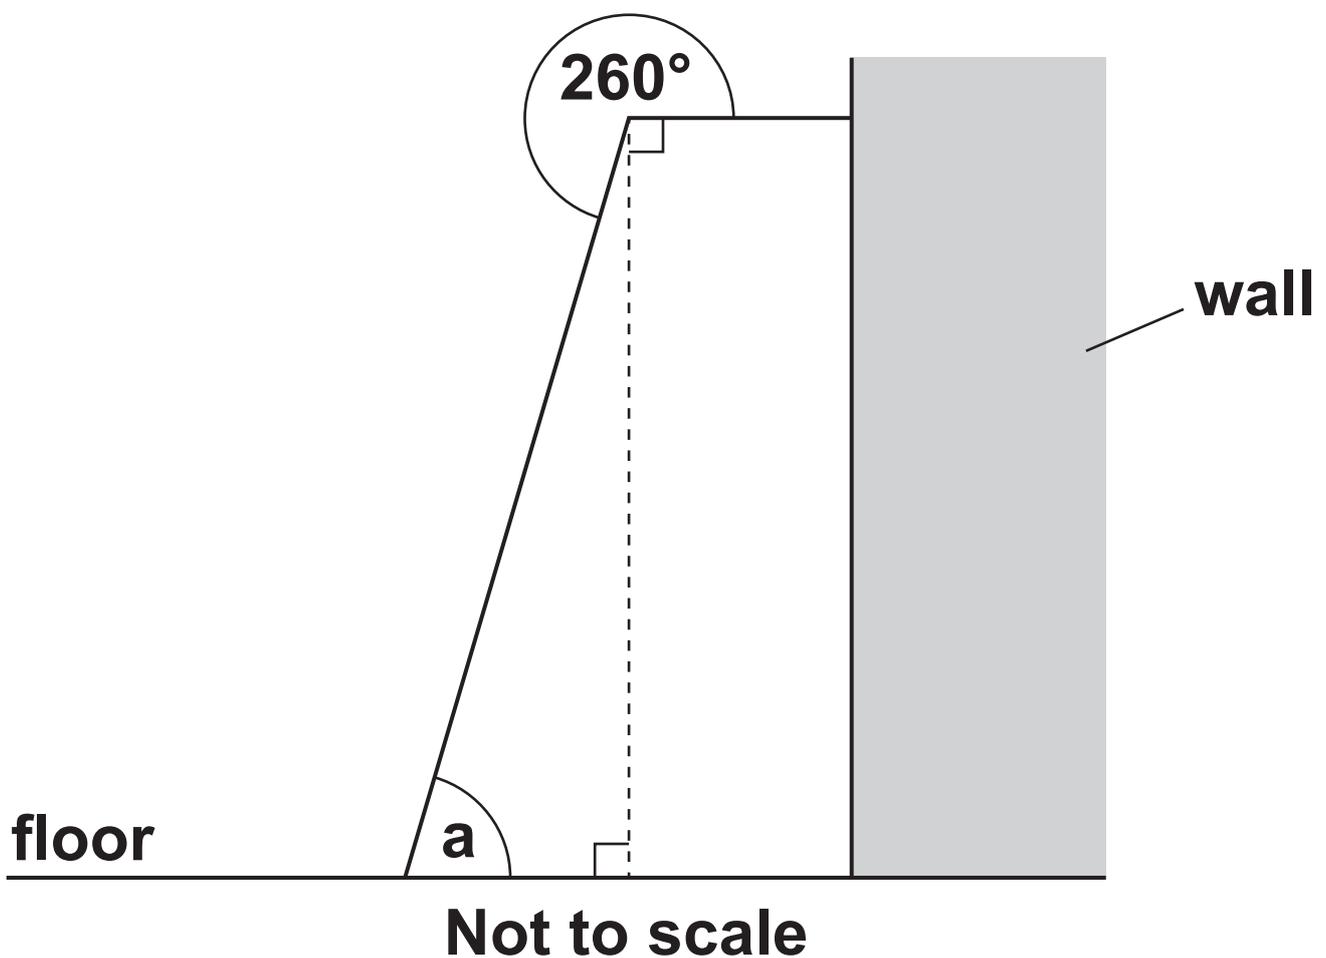

2 _____

[4]

2 A shelving unit is made from timber. It has two side frames and four shelves.

(a) FIG. 3 shows a simplified side view of the frame of the shelving unit when it is fixed to a wall.

FIG. 3

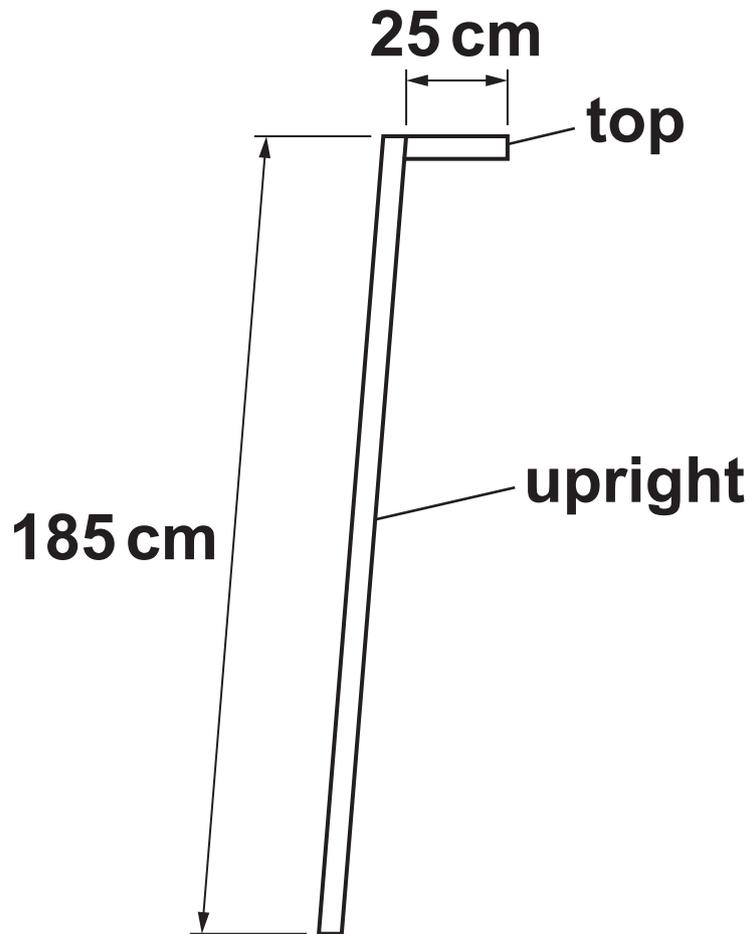

Calculate angle a.

Angle a = _____ ° [2]

- (b) Each side frame is made from two pieces of timber, the top and the upright, as shown in FIG. 4.

FIG. 4

(i) Using the dimensions in FIG. 4 convert the lengths of the top and the upright from centimetres to metres. [1]

Length of top = _____ m

Length of upright = _____ m

(ii) A manufacturer has an order for ten shelving units.

The timber needed to make the side frames for the shelving units is available in standard sized 2m lengths.

Calculate how many 2m lengths of timber are needed to manufacture the side frames required for TEN shelving units.

Number of 2m lengths required = _____ [4]

(c) The shelves are made from manufactured board.

(i) Name ONE manufactured board.

_____ [1]

(ii) Give ONE benefit of using manufactured board compared to natural timbers.

_____ [1]

(d) The materials needed to make ONE shelving unit cost £18.40.

The manufacturer adds 40% to the cost of materials to cover labour costs.

Calculate the total cost of ONE manufactured shelving unit.

Total cost = £ _____ [2]

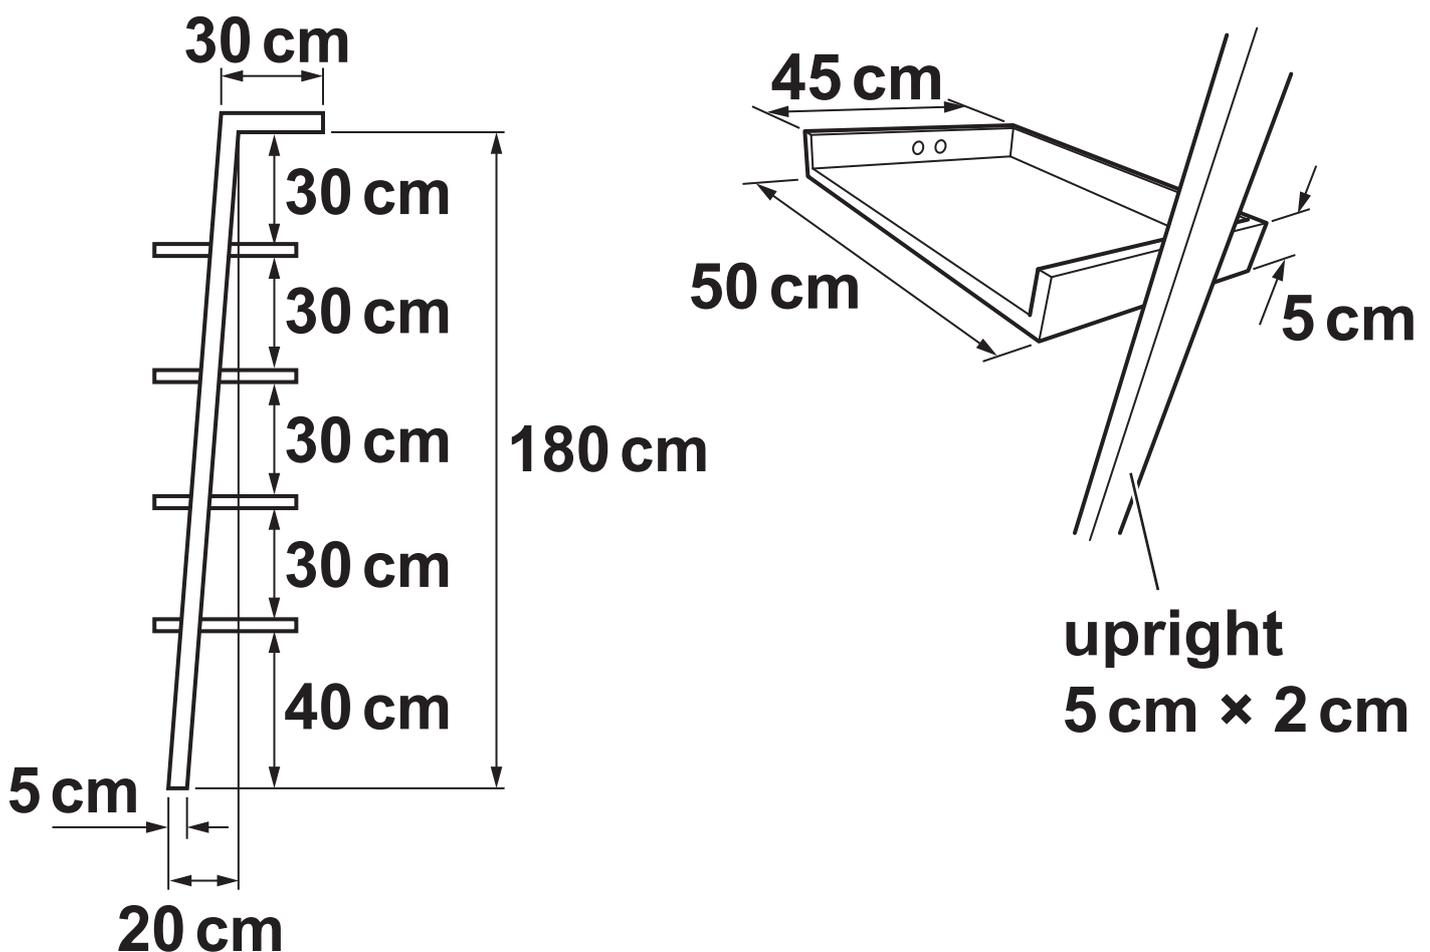

BLANK PAGE

(e) Complete the working drawing on the grid opposite to show the front and side views of the shelving unit shown in FIG. 6.

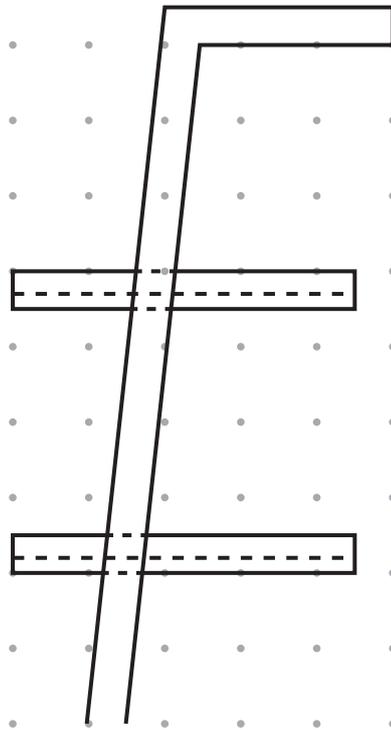

The shelf is made from 2 cm thick manufactured board.

The grid points are 1 cm apart. Use the scale 1:10. [4]

FIG. 6

The individual shelf is 50 cm wide, 45 cm deep and 5 cm high.

FRONT VIEW

SIDE VIEW

SCALE 1:10

3 A bicycle is suitable for use on and off road.

(a) In the table below, state the type of motion that takes place for each description. [2]

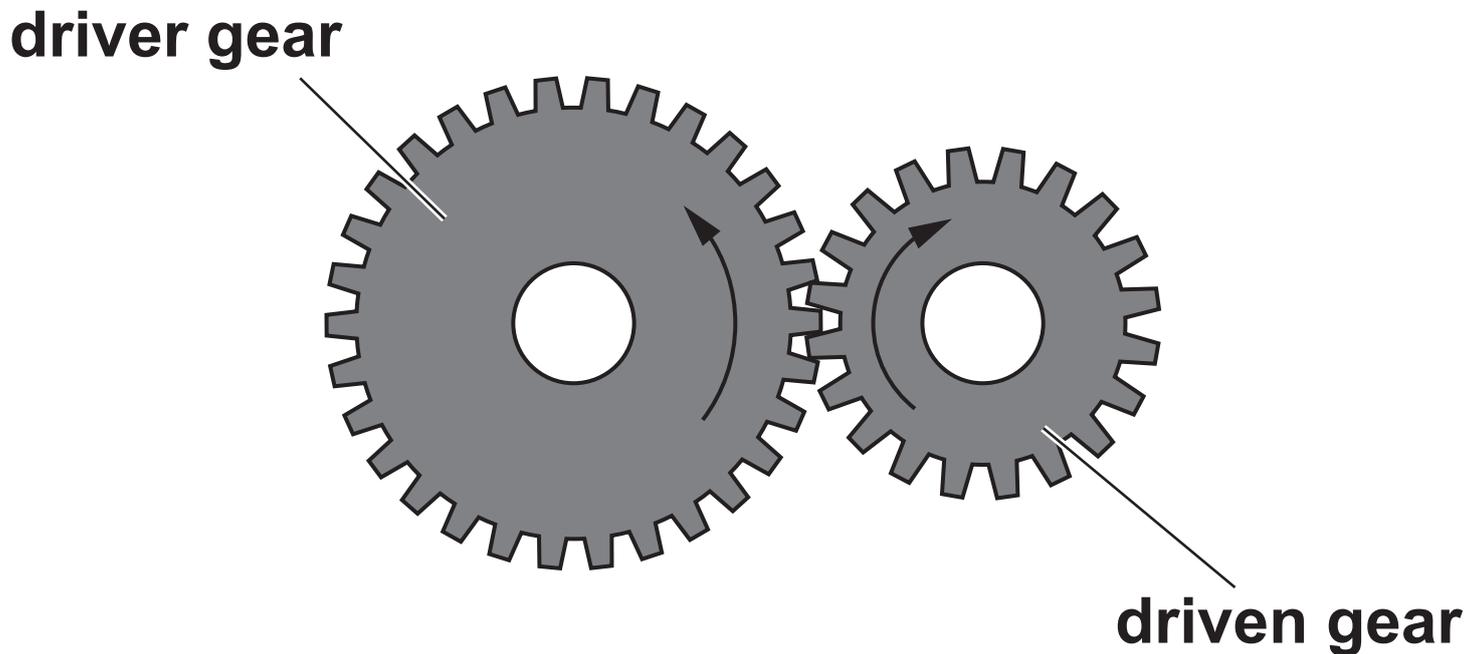

Description of motion	Type of motion
The bicycle wheels turn around.	
The bicycle moves along the road in a straight line.	

(b) Explain ONE reason why gears are used on bicycles.

[2]

(c) (i) FIG. 9 shows a simple gear train.

FIG. 9

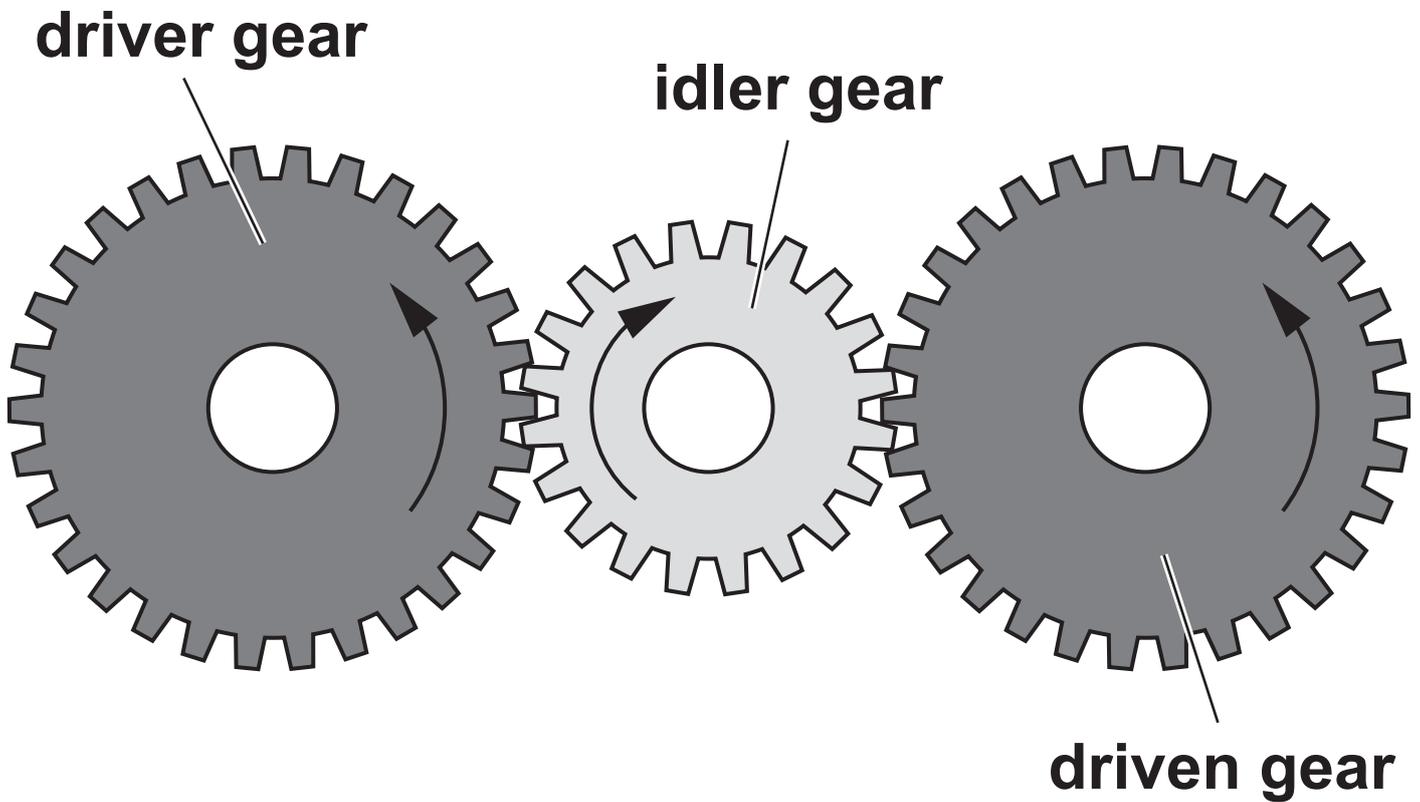

State what effect increasing the size of the driver gear will have on the driven gear.

_____ [1]

(ii) FIG. 10 shows a different gear train.

FIG. 10

Look at FIG. 10 and describe the main function of an idler gear.

[1]

(d) The seat and handlebars of a bicycle are adjustable.

Explain ONE benefit of this adjustability to the user.

[2]

(e) The table below shows the most suitable bicycle size based on people's height.

Height in centimetres (cm)	Bicycle size
148 cm – 151 cm	XX-Small
152 cm – 159 cm	X-Small
160 cm – 167 cm	Small
168 cm – 174 cm	Medium
175 cm – 182 cm	Large
183 cm – 190 cm	X-Large
191 cm – 198 cm	XX-Large

There are 12 inches in one foot (ft) and 2.54 cm in one inch.

Calculate the most suitable bicycle size for a person whose height is 5 ft 10 inches.

Show your working.

Most suitable bicycle size _____ [3]

- (f) Products such as a bicycle need to have structural strength.**

Identify TWO methods that designers use to ensure the structural strength of a product.

1 _____

2 _____

[2]

- (g) Bicycle frames are often made from alloys or composite materials.**

(i) Explain what an alloy is.

_____ **[2]**

(ii) Give ONE example of a composite material.

_____ **[1]**

SECTION B

Answer ALL the questions.

For ALL questions in Section B you MUST refer to the INSERT which contains images and information about products you could find in a gym.

4 Refer to PAGES 14–15 of the Insert.

(a) IMAGES A and B show a smart watch which can be used to monitor your heart rate.

(i) Give TWO reasons why smart watches are increasingly popular with consumers.

1 _____

2 _____

[2]

(ii) The strap of the smart watch is made from a thermo polymer.

Name a thermo polymer.

_____ **[1]**

(b) A designer wants to create a smart watch aimed at the elderly market.

Give TWO methods of research the designer could carry out to make sure the product is successful for this user group.

1 _____

2 _____ **[2]**

(c) IMAGE C shows the packaging for a pair of trainers made from cardboard.

(i) Give TWO properties of cardboard that make it suitable for use in the manufacture of packaging.

1 _____

2 _____

[2]

(ii) There is a need for packaging to be more sustainable.

Explain, using an example, how designers are creating more environmentally friendly packaging.

[3]

You need to answer questions 5 and 6 in relation to ONE of the products listed below covering an area you have studied in depth.

Information about the products is contained in the INSERT.

Before you choose a product, read all parts of questions 5 and 6.

You MUST tick ONE box below to indicate your chosen product.

- Product 1: Point of sale display (papers and boards)**
- Product 2: Leggings (fibres and fabrics)**
- Product 3: Weights machine (design engineering)**
- Product 4: Step block (polymers)**
- Product 5: Dumbbell (metals)**
- Product 6: Locker (timbers)**

5 Study and use the images and information about your chosen product given in the Insert.

(a) (i) Identify the scale of production that could be used to manufacture your chosen product **COMMERCIALY.**

Scale of production _____

Explain why this scale of production is suitable for your chosen product.

[3]

(iii) Describe how jigs, formers or templates would be used to achieve consistency and quality during commercial production of your chosen product, including the use of digital technology if appropriate.

[3]

(b) Raw materials are sourced, extracted and converted into useable forms to manufacture products.

For ONE specific material from your chosen product:

Describe the specific source of the raw material and how it is processed or converted into a useable form. [6]

Name of material: _____

Description: _____

(c) When designing products for use in a gym environment, ergonomics and anthropometrics must be considered.

(i) Identify TWO ergonomic features of your chosen product.

1 _____

2 _____

[2]

(ii) Give TWO examples of anthropometric data that the designer of your chosen product could have used.

1 _____

2 _____

[2]

6 You should use THE SAME product you chose for Question 5 to answer this question.

(a) The choice of suitable materials and surface finish for products is important.

Give TWO reasons why the material(s) or surface finish used in your chosen product is suitable for its intended purpose.

1 _____

2 _____

[2]

(b) Describe how either a surface finish or graphics/logo could be applied to your chosen product.

[3]

(c)*The marketing and branding of products such as those used in gyms and sporting environments influence consumer decisions.

Discuss why marketing and branding is important in the design of products.

Use examples you are familiar with to support your answer. [8]
