- 1 In a dance competition, two judges each award scores out of 30.
The scatter diagram shows the scores awarded to the first 10 dancers.

(a) Here are the scores for the next two dancers.

Judge A	21	7
Judge B	18	8

Plot their scores on the scatter diagram. [1]

(b) Dancers who are awarded a score of more than 20 by BOTH judges receive a medal.

For the 12 dancers, express the ratio of medal winners to non-medal winners in its simplest form.

(b) _____ : _____ [3]

(c) This chart shows the types of dance performed by the 12 dancers.

3 performed a street dance, 8 performed a jazz dance and 1 performed a tap dance.

Why is this diagram misleading?

2 The police record the speed of vehicles passing a speed checkpoint.
The speeds are recorded in the table below.

Speed (s mph)	Number of vehicles		
$0 < s \leq 20$	5		
$20 < s \leq 40$	8		
$40 < s \leq 50$	37		
$50 < s \leq 60$	47		
$60 < s \leq 80$	3		

(a) Calculate an estimate of the mean speed of the vehicles.

(a) _____ mph [4]

(b) Explain why it is not possible to use the information from this table to calculate the EXACT value of the mean speed.

3 A newborn baby has an approximate mass of 3.5 kilograms.

A human cell has an approximate mass of 2.7×10^{-11} grams.

Use these values to estimate the number of human cells in a newborn baby.

Give your answer in standard form, correct to 2 significant figures.

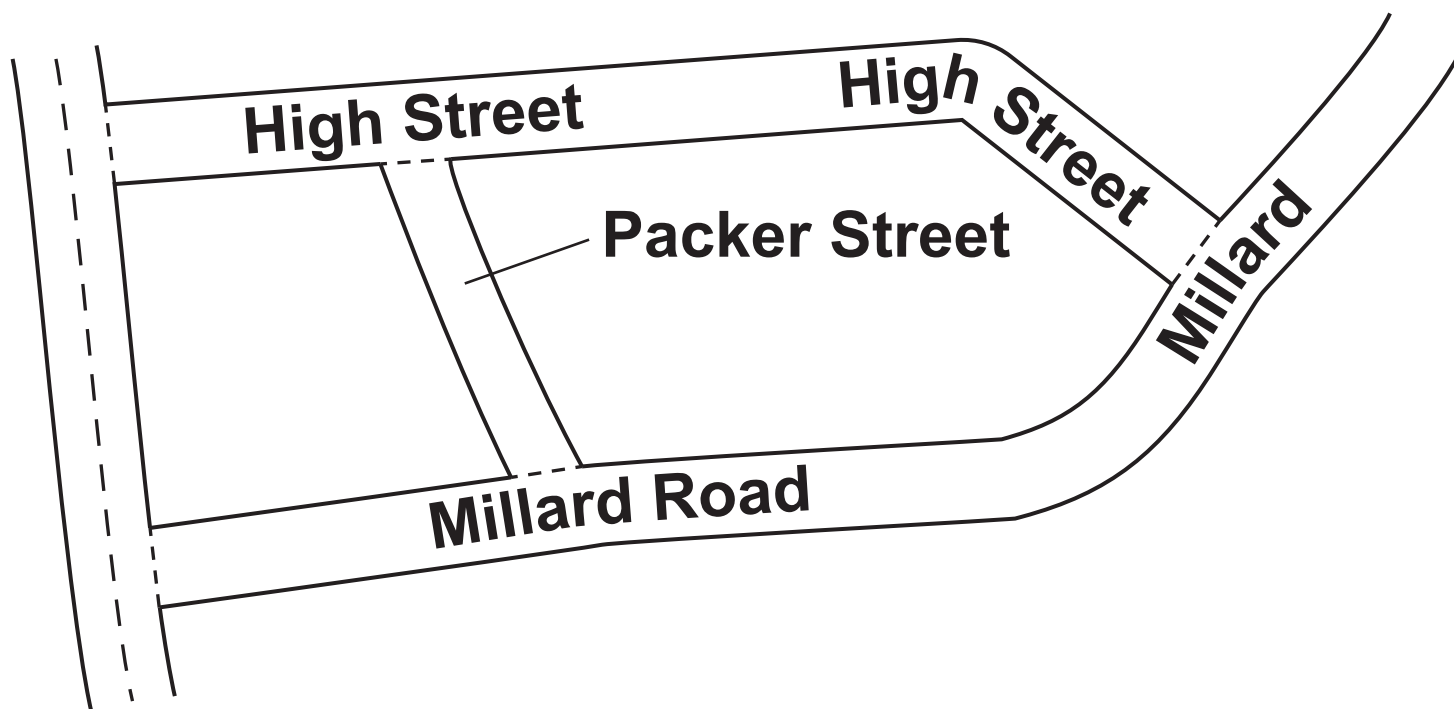

_____ **[5]**

4 Use the symbols $<$, \leq , $=$, $>$, or \geq to complete this statement.

If $x = 4.7$, TRUNCATED to 1 decimal place, then

4.7 _____ x _____ 4.8 [2]

5 This map shows part of a village.

Neil knows that Packer Street is 180 m long in real life.

(a) Neil measures the map.

He says

**Packer Street is 3.5cm long.
High Street is 11.2cm long.**

**Therefore, I calculate that High Street is 576m
long in real life.**

**Use Neil's figures to show that the answer to his
calculation is correct. [3]**

(b) Jodie measures the same map.

She says

I think Packer Street is longer than Neil's measurement of 3.5cm.

Therefore, High Street must be longer than 576m in real life.

**Is Jodie's reasoning correct?
Show how you decide.**

[2]

(c) On another map, Packer Street is 2.4 cm long.

Express the scale of this map in the form 1 : n .

(c) 1 : _____ [2]

- 6 In a box of mixed nuts, the total number of almonds, cashews and peanuts is 1025.
The ratio of almonds to cashews is 1 : 3.
The ratio of cashews to peanuts is 5 : 7.

Calculate the number of cashews in the box.

She posts 15 postcards to the UK on Monday.

How many of her postcards can she expect to be delivered within a week?

(a) _____ [2]

(b) Sergio is in Portugal.

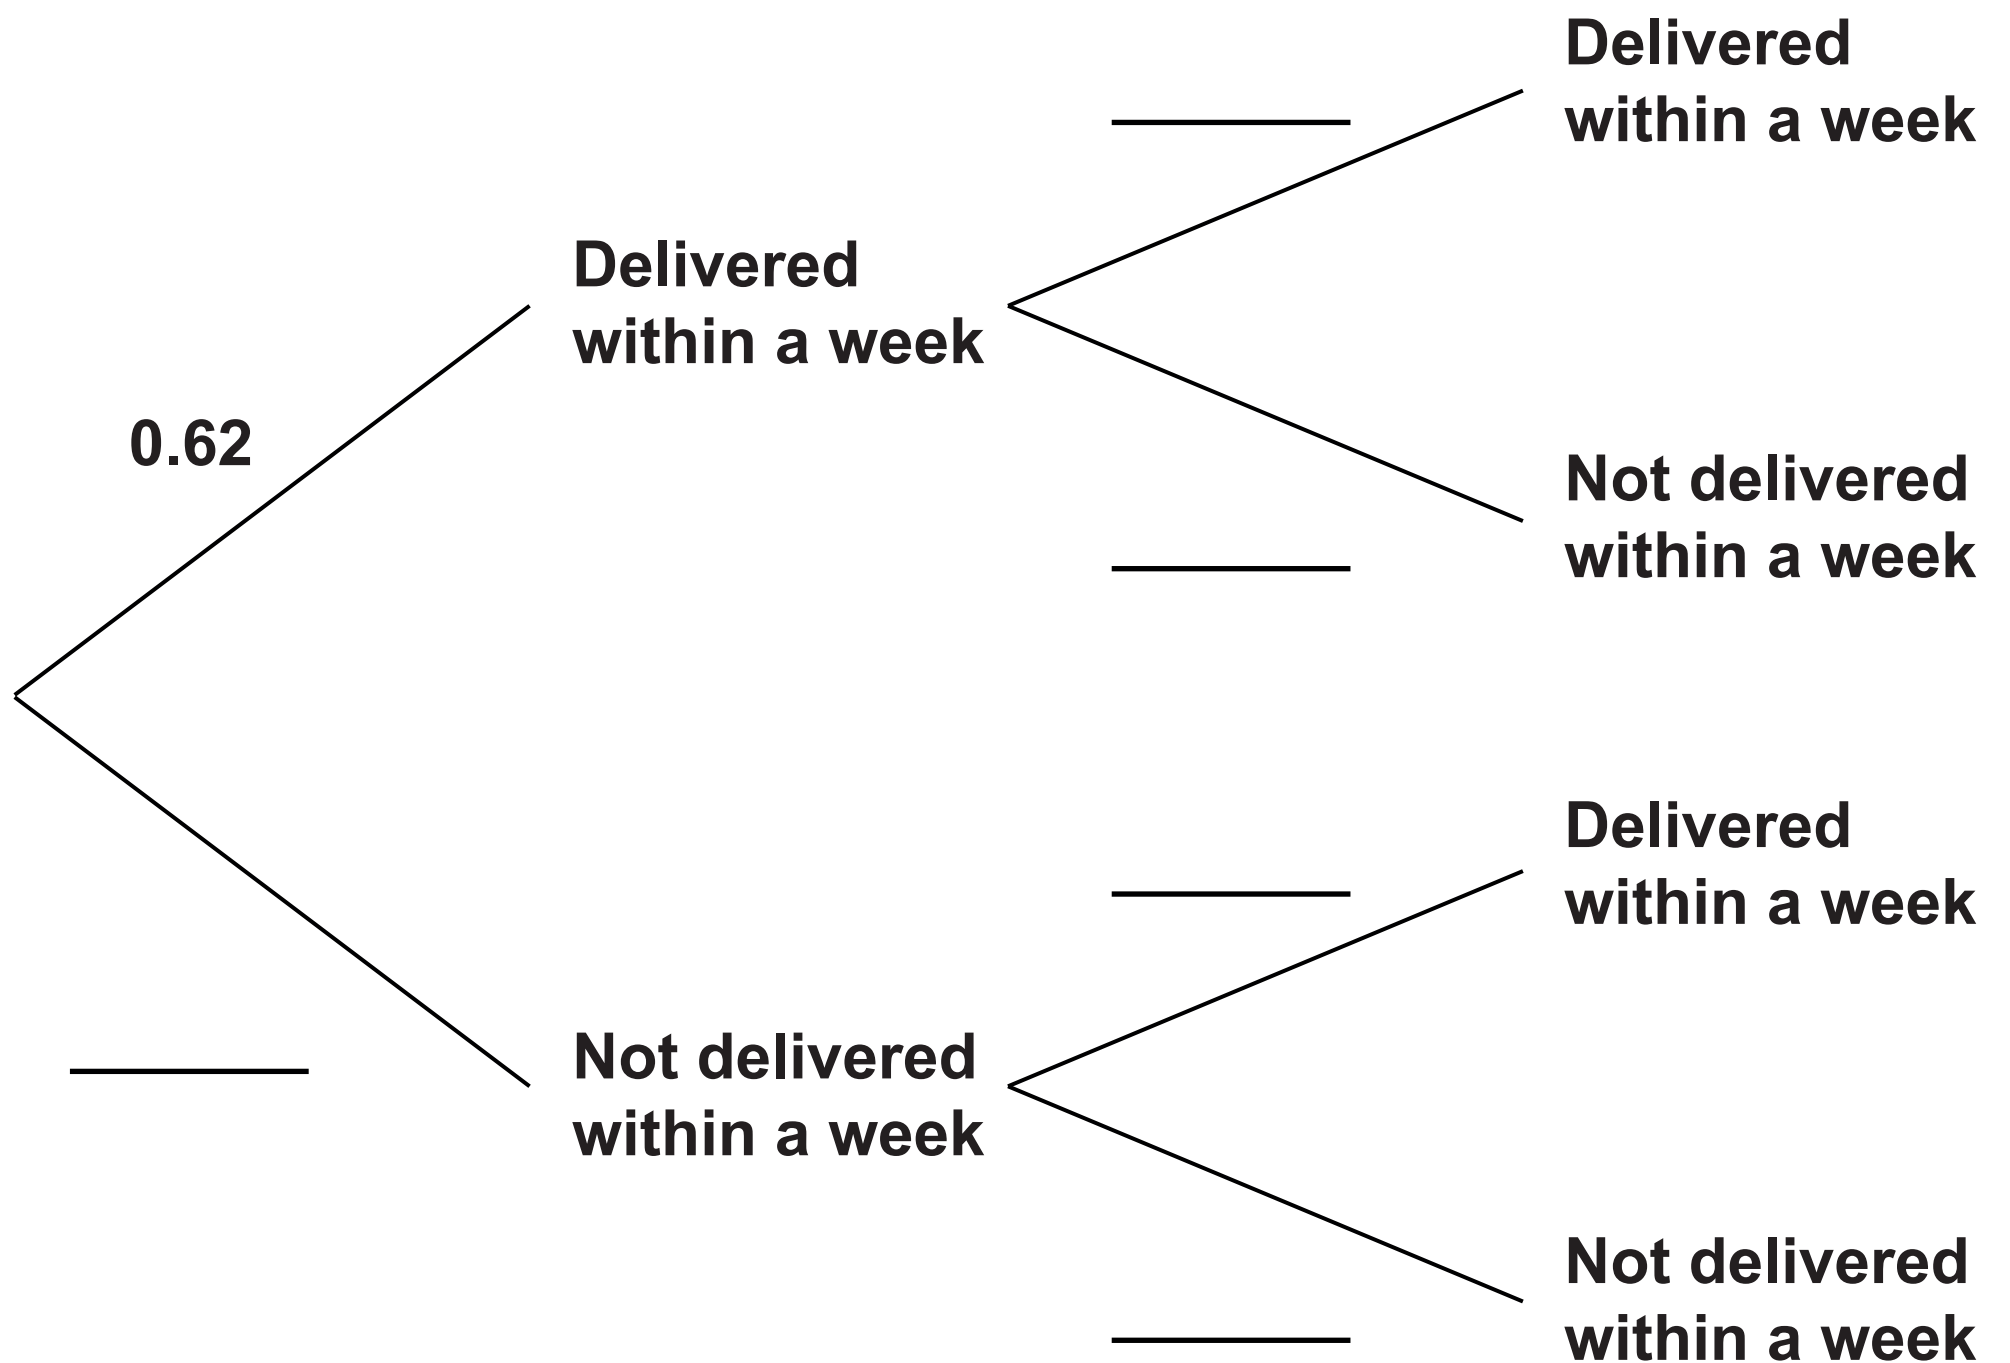

He posts one postcard to the UK on Monday.

He posts another postcard to the UK on Friday.

(i) Complete the probability tree to show the possible outcomes for the postcards. [2]
