G041/01 How Organisations use ICT

Candidates answer on the Question Paper.

#### **OCR** supplied materials:

 Instructions for Candidates G041/01/IC (inserted)

### Other materials required:

 Candidate's pre-prepared materials for pre-release tasks 1, 2 and 3 **Duration:** 1 hour 30 minutes

Candidate forename				Candidate surname			
Centre numb	per			Candidate nu	ımber		

## **INSTRUCTIONS TO CANDIDATES**

- The Insert will be found inside this document.
- Write your name, centre number and candidate number in the boxes above. Please write clearly and in capital letters
- Use black ink. HB pencil may be used for graphs and diagrams only.
- Answer all the questions.
- Read each question carefully. Make sure you know what you have to do before starting your answer.
- Write your answer to each question in the space provided. Additional paper may be used if necessary but you must clearly show your candidate number, centre number and question number(s).
- Attach your pre-prepared material for tasks 1–3.
- Do not write in the barcodes.

#### INFORMATION FOR CANDIDATES

- The number of marks is given in brackets [ ] at the end of each question or part question.
- The total number of marks for this paper is **100**.
- This document consists of 12 pages. Any blank pages are indicated.

#### **SECTION B**

You do not need the case study or your notes to answer these questions.

7

# **Westwood Food Delivery**

Westwood Food Delivery is an online supermarket. Before placing an order, customers must set up an account on the company's website by entering their email address and a password. Customers then order their groceries by selecting each item and adding it to a basket. When all required items are in the basket, the customer enters the delivery address and selects a timed delivery slot. This can be at any time of the day or night. They pay for the order by entering their credit/debit card details on the checkout page.

Westwood Food Delivery's whole operation is computerised and runs 24 hours a day. The company has a huge warehouse where all the groceries are stored and the orders are picked and packed. For each order the computer system selects each item from a storage bay and places it in a tray. The trays travel along conveyor belts to a worker who checks the items against the customer order on a screen and packs it in crates ready for delivery. Each crate has an electronic tag that includes the customer order number. When this passes a reader, the delivery address is looked up and the crate is routed to the correct delivery vehicle.

Westwood Food Delivery requires customers to provide an email address.

Describe <b>two</b> ways that Westwood Food Deliveries could use email to communic customers.	ate with
1	
2	

Westwood Food Delivery uses a computerised system to process customer orders.

(b) Explain one disadvantage to the company of using the computerised system.  Westwood Food Delivery is a 24 hour operation. This means that employees are required to shifts, so that sufficient packers and delivery drivers are available to fulfil orders at any time of day or night.  (a) Explain one positive effect on employees of this type of working.	(a)	Explain <b>two</b> benefits to the company of using the computerised system.
