Mark Scheme for June 2015

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

2	(a)	With reference to the illustrations above, explain how successfully the architect overcame the problems he faced when designing the Erechtheion.	[25]																					
		<p>The Erechtheion was designed to hold the most sacred image of Athena Polias and incorporate the ancient sites within the temple precinct. To achieve this, the architect used considerable ingenuity. The difficulties faced by the architect focus on two important issues:</p> <ul style="list-style-type: none"> • the topography of the site; • the sacred nature of the site. <p>Topography of the site:</p> <ul style="list-style-type: none"> • site on different levels; • site slopes downwards from south to north. <p>Solutions:</p> <ul style="list-style-type: none"> • The north porch was increased in size; the columns were made long and slender; • North porch was 'balanced' by much smaller south porch which faces the Parthenon. <p>Sacred nature of the site. The sacred sites included:</p> <ul style="list-style-type: none"> • Athena's olive tree; • Poseidon's salt water spring; • the tomb of Kekrops. 		<p>A successful response will address the extent to which the architect managed to overcome the problems to produce an effective design.</p> <p>AO1 = 10</p> <table> <tr> <td>Level 5</td> <td>9 – 10</td> </tr> <tr> <td>Level 4</td> <td>7 – 8</td> </tr> <tr> <td>Level 3</td> <td>5 – 6</td> </tr> <tr> <td>Level 2</td> <td>2 – 4</td> </tr> <tr> <td>Level 1</td> <td>0 – 1</td> </tr> </table> <p>AO2 = 15</p> <table> <tr> <td>Level 5</td> <td>14 – 15</td> </tr> <tr> <td>Level 4</td> <td>10 – 13</td> </tr> <tr> <td>Level 3</td> <td>6 – 9</td> </tr> <tr> <td>Level 2</td> <td>3 – 5</td> </tr> <tr> <td>Level 1</td> <td>0 – 2</td> </tr> </table>	Level 5	9 – 10	Level 4	7 – 8	Level 3	5 – 6	Level 2	2 – 4	Level 1	0 – 1	Level 5	14 – 15	Level 4	10 – 13	Level 3	6 – 9	Level 2	3 – 5	Level 1	0 – 2

		<p>Solutions:</p> <ul style="list-style-type: none"> • The number of cults to be housed within the temple and the temple precinct made it necessary to have a number of rooms of different sizes and orientations. • Salt-water spring accommodated with a hole in the floor and a hole in the roof. • The west wall bridged the tomb of Kekrops. • There were engaged columns on the west side to match the ground level on the east side. • The architect tried to unify the whole structure by having a continuous frieze – sculpted figures attached to background of dark Eleusinian stone.
