**ECONOMICS**  
**Macroeconomics**

**MONDAY 23 MAY 2016: Morning**  
**TIME ALLOWED: 1 hour 30 minutes**  
**plus your additional time allowance**

**MODIFIED ENLARGED**

<b>First name</b>		<b>Last name</b>	
-----------------------	--	----------------------	--

<b>Centre number</b>						<b>Candidate number</b>				
--------------------------	--	--	--	--	--	-----------------------------	--	--	--	--

**YOU MUST HAVE:**  
**a calculator**

**READ INSTRUCTIONS OVERLEAF**

## **INSTRUCTIONS**

**Use black ink. You may use an HB pencil for graphs and diagrams.**

**Complete the boxes on the first page with your name, centre number and candidate number.**

**Read each question carefully before you start to write your answer.**

**Sections A and B: Answer ALL the questions in each of these sections.**

**Section C: Answer ONE question in this section.**

**Write your answer to each question in the space provided. If additional space is required, you should use the lined page(s) at the end of this booklet. The question number(s) must be clearly shown.**

## **INFORMATION**

**The total mark for this paper is 60.**

**The marks for each question are shown in brackets [ ].**

**Quality of extended responses will be assessed in questions marked with an asterisk (\*).**

## **SECTION A**

**Answer ALL the questions in this section.**

**Write your answer for each question in the box provided.**

**1 What is a recession?**

- A a decrease in a current account deficit over a sustained period**
- B a decrease in the price of the currency over a sustained period**
- C a decrease in the price level over a sustained period**
- D a decrease in real gross domestic product over a sustained period**

**Your answer**  **[1]**

**2 Which of the following would cause a shift to the right of the aggregate demand curve?**

- A a decrease in investment**
- B a decrease in the price level**
- C an increase in exports**
- D an increase in labour productivity**

**Your answer**  **[1]**

**3 Which of the following is a cause of cost-push inflation?**

- A an increase in bank lending**
- B an increase in a budget deficit**
- C an increase in the price of raw materials**
- D an increase in the value of exports sold**

**Your answer** ☐ **[1]**

- 4 The diagram below shows a change in a country's macroequilibrium price level and real GDP. Which of the following might have caused this change?

- A a decrease in business taxes, not matched by a cut in government spending
- B a decrease in raw material costs, not matched by an increase in corporate taxes
- C an increase in exports, not matched by an increase in imports
- D an increase in wages, not matched by an increase in labour productivity

Your answer ☐

[1]

**5 Which of the following consists only of injections into the circular flow of income?**

- A exports, government spending and investment**
- B government spending, investment and savings**
- C imports, investment and taxation**
- D imports, savings and taxation**

**Your answer** ☐ **[1]**

**6 Which of the following is an example of current government expenditure?**

- A government spending on building new hospitals**
- B government spending on improving mobile network coverage in rural areas**
- C government spending on increasing the number of lanes on a motorway**
- D government spending on teachers' salaries**

**Your answer** ☐ **[1]**

**7 Christine initially has a disposable income of £500 a week and spends £400. Christine's disposable income then rises to £750 a week and her spending to £500. What is Christine's marginal propensity to consume?**

- A 0.4**
- B 0.6**
- C 0.67**
- D 1.0**

**Your answer** ☐ **[1]**

**8 What do the weights in the Consumer Price Index show?**

- A changes in the price of the goods and services purchased**
- B changes in the quality of the goods and services purchased**
- C the proportion of total expenditure spent on different categories of goods and services**
- D the seasonal fluctuations in the price of clothing, food and fuel**

**Your answer** ☐ **[1]**

**9 Which of the following is NOT a feature of a 'good' tax?**

- A certainty**
- B convenience**
- C durability**
- D equity**

**Your answer** ☐ **[1]**

- 10 The table below shows the inflation rate for an economy between 2012 and 2015. What can be concluded from the information?**

<b>Year</b>	<b>Inflation rate (%)</b>
<b>2012</b>	<b>4.2</b>
<b>2013</b>	<b>2.1</b>
<b>2014</b>	<b>-0.5</b>
<b>2015</b>	<b>1.2</b>

- A The price level was lowest in 2012.**
- B The price level was lowest in 2014.**
- C The economy experienced deflation over the whole period.**
- D The value of money rose over the whole period.**

**Your answer** ☐ **[1]**

- 11 Which of the following would appear as a credit item in the trade in services balance of the UK's balance of payments?**

- A earnings on German shares owned by UK citizens**
- B expenditure by US tourists in the UK**
- C the payment by a UK firm to a Japanese firm to transport its goods**
- D the purchase of a UK firm by an Indian multinational company**

**Your answer** ☐ **[1]**

- 12 The table below shows the price indices for a country's exports and imports in 2015 and 2016.

	2015	2016
Exports	100	105
Imports	100	120

What was the country's terms of trade in 2016?

- A 0.875
- B 1.143
- C 87.5
- D 114.3

Your answer

[1]

- 13 Two countries X and Y both produce mobile phones and corn. The quantity of the two goods produced by both countries when they divide their resources equally between the two goods is shown in the table below.**

<b>Country</b>	<b>Mobile phones</b>	<b>Corn (units)</b>
<b>X</b>	<b>10</b>	<b>40</b>
<b>Y</b>	<b>5</b>	<b>20</b>

**What can be concluded from this information?**

- A Country X has the comparative advantage in the production of corn.**
- B Country Y has the absolute advantage in the production of corn.**
- C Trade would benefit Country Y but not Country X.**
- D Trade would not benefit either country.**

**Your answer**  **[1]**

- 14 The exchange rate between the pound sterling and the US dollar is initially £1 = \$1.5. A UK firm sells a product in the USA for \$300. The exchange rate changes to £1 = \$1.2 and the firm keeps the dollar price unchanged. What will be the price of the product in pounds?**

- A £200**
- B £250**
- C £300**
- D £360**

**Your answer**  **[1]**

**15 Which of the following combination of changes is likely to increase the international competitiveness of a country's products?**

	<b>Labour productivity</b>	<b>Country's currency</b>
<b>A</b>	<b>decreases</b>	<b>appreciates</b>
<b>B</b>	<b>decreases</b>	<b>depreciates</b>
<b>C</b>	<b>increases</b>	<b>appreciates</b>
<b>D</b>	<b>increases</b>	<b>depreciates</b>

Your answer

[1]

## SECTION B

Answer ALL the questions in this section.

### China joins the elite

At the end of 2015, China's currency, the renminbi, was added to the International Monetary Fund's elite basket of international currencies. It joined the US dollar, the European Union's euro, the UK's pound and the Japanese yen as a currency that can be used to settle debts between countries. 5

China is the world's second largest economy in terms of gross domestic product (GDP). Fig. 1 shows the GDP and GDP per capita, measured by the output method, for five countries in 2014. Four of these countries have reserve currency status. Germany is the leading economy in the eurozone. 10

**Fig. 1 GDP and GDP per capita  
in selected countries in 2014**

COUNTRY	GDP IN US DOLLARS (TRILLIONS)	GDP PER CAPITA (US \$)
China	10.36	13 200
Germany	3.87	46 200
Japan	4.60	37 500
UK	2.95	39 800
USA	17.35	54 400

In 2014, the US economy accounted for 22% of global GDP. China's contribution to global GDP was 12.2% and it is growing. In addition, the performance of the Chinese economy is having an increasing influence 15

on the global economy. It is for this reason that a number of governments showed concern about the slowdown in China's economic growth in 2014 and 2015. It was thought that this slowdown might have an impact on employment and unemployment in other countries. Fig. 2 shows the number of people employed and unemployed in five countries in 2014. 20

**Fig. 2 Numbers employed and unemployed in millions in selected countries in 2014**

	<b>China</b>	<b>Germany</b>	<b>Japan</b>	<b>UK</b>	<b>USA</b>
<b>Number employed (millions)</b>	<b>768.00</b>	<b>42.75</b>	<b>62.73</b>	<b>30.08</b>	<b>146.64</b>
<b>Number unemployed (millions)</b>	<b>32.00</b>	<b>2.25</b>	<b>2.28</b>	<b>1.92</b>	<b>9.36</b>

China's investment overseas has been increasing. In 2014, China invested \$1.6 billion in Germany and more than three times that amount in the UK. China is also becoming more involved in international trade. Fig. 3 provides information on exports to China in 2014. 25

**Fig. 3 Selected countries' exports to China in 2014**

	<b>Exports to China as a % of the country's total exports</b>
<b>Germany</b>	<b>5.8</b>
<b>Japan</b>	<b>18.3</b>
<b>UK</b>	<b>4.7</b>
<b>USA</b>	<b>7.6</b>

**In 2014, China overtook the USA to become the largest economy in terms of GDP adjusted for differences in the cost of living. It is uncertain, however, how the two economies will compare in the future. In 2015, US economic performance did improve. The USA's unemployment rate fell to a seven-year low and was expected to continue on a downward trend into 2016. The strengthening of the US domestic economy led the Federal Reserve Bank (the central bank for the USA) to increase the rate of interest in December 2015.**

**30**

**35**

**40**

**One of the reasons why China may perform better than the USA is the proportionately greater amount that China spends on capital goods. A cut in direct taxes in the USA could, however, increase investment in the USA.**

**45**

**16 (a) State ONE method, other than the output method, of measuring GDP.**

\_\_\_\_\_ [1]

**(b) Explain what is meant by ‘GDP per capita’. (line 9)**

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_ [2]

**(c) Using Fig. 2, calculate Germany’s unemployment rate in 2014.**

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_ [2]

- (d) Using information from the case study, compare how Germany and the UK are likely to be affected by a slowdown in the growth of the Chinese economy.**

## **SECTION C**

**Answer Question 17 OR Question 18.**

**17\* In 2015, the Turkish economy experienced an unemployment rate of 9.3% and an inflation rate of 7.4%.**

**Evaluate, using an appropriate diagram(s), the extent to which it is possible for a government to reduce unemployment without causing a rise in the price level. [20]**

**OR**

**18\* The UK government planned to reduce the budget deficit of £87.3bn in 2014–15 to £75.3bn in 2015–2016, mainly through reduced government spending.**

**Evaluate, using an appropriate diagram(s), the effect of a reduction in the budget deficit on an economy. [20]**
