

OXFORD CAMBRIDGE AND RSA EXAMINATIONS

Thursday 21 May 2020 – Morning

A Level Physical Education

H555/01 Physiological factors affecting performance

Time allowed: 2 hours

plus your additional time allowance

**YOU CAN USE:
a calculator**

Please write clearly in black ink.

Centre number

--	--	--	--	--

Candidate number

--	--	--	--

First name(s) _____

Last name _____

READ INSTRUCTIONS OVERLEAF

INSTRUCTIONS

Use black ink. You can use an HB pencil, but only for graphs and diagrams.

Write your answer to each question in the space provided. If you need extra space use the lined pages at the end of this booklet. The question numbers must be clearly shown.

Answer ALL the questions.

Where appropriate, your answer should be supported with working. Marks might be given for using a correct method, even if your answer is wrong.

INFORMATION

The total mark for this paper is 90.

The marks for each question are shown in brackets [].

Quality of extended response will be assessed in questions marked with an asterisk (*).

ADVICE

Read each question carefully before you start your answer.

BLANK PAGE

SECTION A

Answer ALL the questions.

- 1 Explosive strength and aerobic capacity are fitness components that are used during team games. Describe a situation in a team game when each component will be used.

Explosive strength _____

Aerobic capacity _____

[2]

- 2 A coupled reaction causes the breakdown and resynthesis of ATP.

State the exothermic and endothermic reactions which show the breakdown and resynthesis of ATP.

Exothermic: $\text{ATP} \rightarrow$ _____

Endothermic: _____ $\rightarrow \text{ATP}$

[2]

3 Describe linear motion and angular motion.

Linear motion _____

Angular motion _____

[2]

4 State the metric units of measurement for displacement and acceleration.

Displacement _____

Acceleration _____

[2]

5 Define the term 'stroke volume' and give a typical resting value for a trained individual.

Definition _____

Typical resting value _____

[2]

SECTION B

Answer ALL the questions.

6 FIG. 6 shows the performance of a pull-up.

FIG. 6

- (a) Complete the table to analyse the movements at the elbow during the downward and upward phases of the pull-up. [6]

Elbow	Phase of movement	Joint movement	Agonist	Type of contraction
	Downward			
	Upward			

(b) (i) Describe the glycolytic (lactic acid) system.

[4]

(ii) Evaluate the efficiency of the glycolytic (lactic acid) system in comparison to other energy systems.

[2]

(c) Explain why heart and respiratory rates remain above resting levels during the slow component of EPOC (excess post-exercise oxygen consumption).

[4]

- (d) Describe the short-term effects of performing at high altitude on the cardiovascular and respiratory systems.

Cardiovascular _____

Respiratory _____

[4]

- 7 (a) Explain the benefits and possible drawbacks of the following nutritional ergogenic aids to improve performance.

Hydration _____

Caffeine _____

[6]

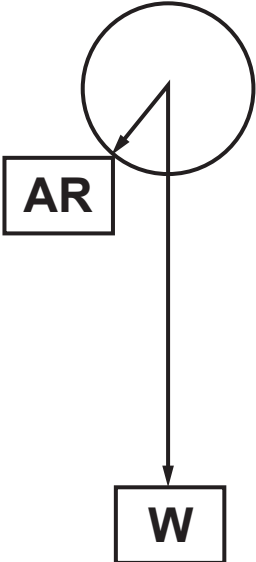

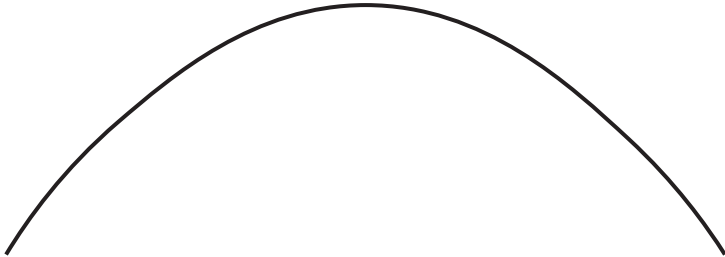

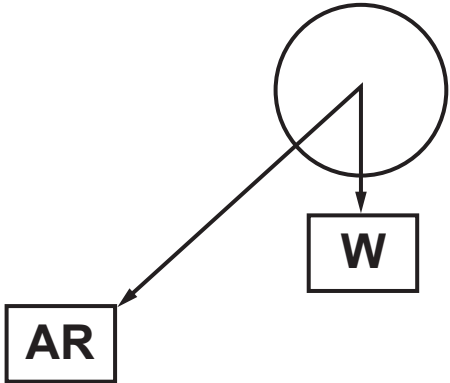

[illegible]

(c) Explain the impact of regular exercise on the lifestyle diseases of coronary heart disease (CHD) and asthma.

[4]

- 8 (a) FIG. 8 shows free body diagrams of two balls in flight, and the flight path of ball A.

FIG. 8

Ball	Free body diagram	Flight path
A		 <p>Parabolic</p>
B		<p>(i) sketch flight path here</p>

- (i) Sketch the flight path of ball B in the box in Fig. 8. [1]

- (ii) Explain the differences between the free body diagrams of ball A and ball B.

[4]

(iii) Describe the factors, other than mass, that impact on the air resistance of a ball in flight.

[4]

(b) Explain the following terms, using a practical example for each:

Balanced force _____

Unbalanced force _____

[4]

- (c) Define the term 'angular velocity'. Give an equation for its calculation and state the units it is measured in.

Definition _____

Equation _____

Units _____

[3]

- (d) When a right-handed golfer hooks a shot, the ball deviates to the left.

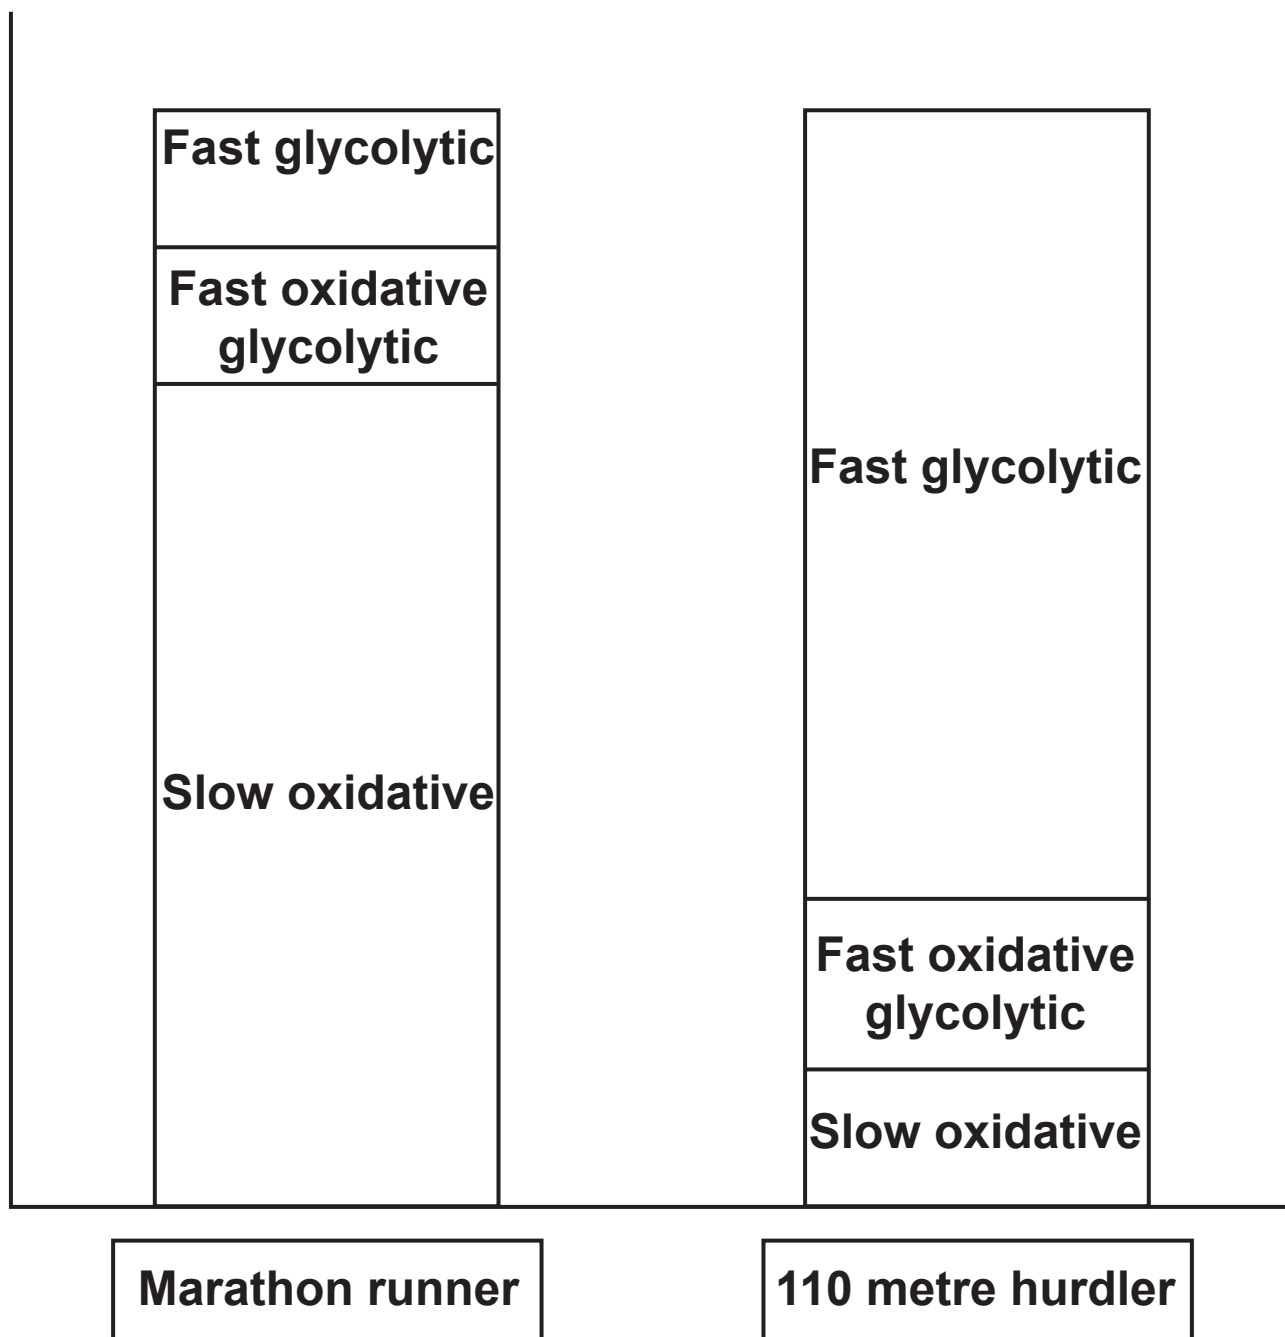

Explain how the golfer creates a hook shot and its effect on the flight path of the ball.

_____ [4]

SECTION C

9* FIG. 9 shows the differences in the muscle fibre types of two elite athletes.

FIG. 9

Explain why both elite athletes benefit from the make-up of their specific muscle fibre types.

Describe when the different fibre types may be recruited during these events.

Describe and evaluate the factors that affect strength, applying your knowledge to the marathon runner and the hurdler. [20]

[illegible]

[illegible]

[illegible]

END OF QUESTION PAPER

ADDITIONAL ANSWER SPACE

If additional space is required, you should use the following lined page(s). The question number(s) must be clearly shown in the margin(s).

[illegible]

Copyright Information

OCR is committed to seeking permission to reproduce all third-party content that it uses in its assessment materials. OCR has attempted to identify and contact all copyright holders whose work is used in this paper. To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced in the OCR Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download from our public website (www.ocr.org.uk) after the live examination series.

If OCR has unwittingly failed to correctly acknowledge or clear any third-party content in this assessment material, OCR will be happy to correct its mistake at the earliest possible opportunity.
