Mark Scheme for January 2017

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

Question		Answer	Marks	Guidance
3	b	<p>Responses include:</p> <ul style="list-style-type: none"> • turnover is comparatively high • lack of continuity for the business • high cost of recruitment • increased training costs. <p>Exemplar response: Turnover is very high (1) suggesting that there are problems within the workforce (1)</p>	2	<p>Contains 1 embedded mark from unit 1</p> <p>One mark for a correct identification plus a further one mark for an explanation</p> <p style="text-align: right;">ARA</p>
3	c	<p>Responses Include:</p> <ul style="list-style-type: none"> • low level of wages paid • poor morale • other available employment • non-flexible working • poor management • staff are bored • staff are not motivated. <p>Exemplar response: <i>IceCrazy</i> employs a lot of seasonal workers (1) and may therefore only pay minimum wage (1). If other employers are offering higher wages this will lead to staff leaving (1).</p>	3	<p>One mark for a correct identification plus up to two further marks for explanation.</p> <p style="text-align: right;">ARA</p>
4	a	<p>Indicative content:</p> <ul style="list-style-type: none"> • Market Penetration 	1	<p>For one mark.</p> <p>Mark as incorrect if more than one item is circled</p>

Question		Answer	Marks	Guidance
4	b	<p>Responses Include:</p> <ul style="list-style-type: none"> Helps analyse the overall position of the business By dividing into four categories forces management to consider a range of options, not just focus on one Helps assess the level of risk. <p>Exemplar response: By splitting business strategies into these four categories (L1) The Ansoff matrix will help Sameer and Janice to assess the level of risk (L1) associated with opening up a larger ice cream café (L2). The Ansoff matrix helps establish that this option represents market penetration (L2) because a bigger café is still selling the same product to the same market, which is the least risky of the four categories (L2).</p>	4	<p>Levels of response</p> <p>Level 2 (3-4 Marks) Candidate explains the benefit(s) to <i>IceCrazy</i> of using Ansoff's Matrix.</p> <p>Level 1 (1-2 Marks) Candidate explains benefit(s) of Ansoff's Matrix with no use of context.</p> <p style="text-align: right;">ARA</p>
5		<p>Use level of response criteria.</p> <p>Responses include:</p> <ul style="list-style-type: none"> selection of target market extent to which market is growing establishing USP/features of product appropriate pricing strategies promotion very tight budget. <p>Exemplar response: The first thing that Sameer will need to understand is the target market (L1) for the new products. This is because these low fat "healthier" products will appeal to different groups of people (L2) to their existing luxury ice cream. This means that different strategies will need to be used to ensure that the new range penetrates this market and ultimately has demand and sells well (L3) The new product range represents diversification for the</p>	12	<p>NB: This question includes one embedded marks for applying knowledge from Unit 1 LO2 Functional areas.</p> <p>Levels of response</p> <p>Level 4 (10 - 12 marks) Candidate evaluates the factors that <i>IceCrazy</i> will need to consider when launching the new product range</p> <p>Level 3 (7 - 9 marks) Candidate analyses factor(s) that <i>IceCrazy</i> will need to consider when launching the new product range</p> <p>Level 2 (4 – 6 marks) Candidate explains factor(s) that <i>IceCrazy</i> will need to consider when launching the new product range.</p> <p>Level 1 (1 – 3 marks) Candidate identifies relevant factor(s) to consider when launching a new product.</p>

Question	Answer	Marks	Guidance
	<p>company (L1) and should be seen by the company as part of a strategy to achieve competitive advantage (L2). To ensure that the products are well received Sameer will need to identify and promote the key features of the product (L1), which are low fat, low sugar therefore low calorie (L2). This will establish brand identity, which is particularly important in this very competitive market (L3).</p> <p>Good promotion is a very important factor (L1) and part of this, when launching a new product is pricing strategies (L1). Sameer could consider low introductory prices to encourage restaurant managers to try the new products in their restaurants (L2). A key factor for Sameer is getting the product into the restaurants and if he achieves this and the good quality/good taste of the product is recognised by customers, then the likelihood of re-ordering even if prices go up, are high (L3).</p> <p>Finally, the method of promotion is very important (L1). <i>IceCrazy</i> already has a website and uses social media (L2) and these should be extensively used for the new products. Further advertising must also be considered, such as e-mail campaign, leaflet drop to restaurants (L2), but Sameer does need to be aware of the cost of this and stay within his budget (L3)</p> <p>All these factors are very important and I think that promotion is the most significant because it informs potential new customers about the product. However, he must properly consider who his target audience is to promote to the right people; focus on the key features of the product in this promotion and make the price attractive, to ensure the success of the venture (L4).</p>

Question	Answer	Marks	Guidance
	<p>It is important to consider the capital cost of each option when choosing between options (L1). On the face of it Option 2 looks like the right decision because it is the cheapest of the three options (L2) and could be funded from reserves. The payback period, although not the shortest, is in the middle of the 3 options at 5 years and the ARR is a very healthy 51%. (L2). The level of risk factor for option 2 is therefore low. In addition to this, qualitative evidence in the article from Reuters, shows that there is a demand for healthier options in this market (L2). My recommendation, would therefore, be for <i>IceCrazy</i> to implement option 2 because it will return increased profits from a small capital investment, without the need for borrowing. It helps secure the long-term future of the company by increasing the number of customers that regularly buy from them, whilst moving into a market that is growing (L3).</p> <p>However, I think that <i>IceCrazy</i> should also consider option 1, which although the Boston Matrix would put this option as a question mark, the Ansoff Matrix establishes it as low risk because it achieves growth by selling existing products in an existing market (L2). Additional borrowing would be required which increases risk for the business. However, the current lease is about to expire, which would require further capital expenditure simply to keep the current café open (L2). This means that at least half of the proposed expenditure on the new lease would have to have been spent anyway, making option 1, with its much larger capacity and take away facility a much more attractive proposition (L3). Option 1, would increase <i>IceCrazy</i>'s customer satisfaction with the option for takeaway and less queues in the summer months. With a careful project plan to ensure that costs do not escalate and increased use of social media to increase the</p>		<p>Level 1 (1 – 4 marks) Candidate identifies issues related to decision making.</p> <p style="text-align: right;">ARA</p> <p>L4 evaluation – Award 13 marks for suggesting the most beneficial option for <i>Ice Crazy</i> with justification for the choice. Award 14 marks for suggesting the best option in context with justification. Award 15 marks for a detailed <i>or</i> specific contextual judgement of the most suitable option. Award 16 marks for a detailed <i>and</i> specific contextual judgement of the most suitable option.</p>

Question	Answer	Marks	Guidance
	<p>customer base option 1, with its 10 year lease will secure long term growth for <i>IceCrazy</i> (L3).</p> <p>Option 3 represents such a large diversification into an area where the owners have little expertise and the level of borrowing will be so high, that I think that the risk is too great (L4). With a combination of option 1 and option 2, <i>IceCrazy</i> will have the opportunity to grow the wholesale and retail side of the business together, with each owner taking responsibility for one venture, thus securing the long term future of the company (L4).</p>
