- 6 Sundus has a bleeding arm wound with a large piece of glass in it.**

Complete the table below either with the first aid procedures that should be followed or with reasons why the procedure is carried out.

Some procedures and reasons have been completed for you. [6]

First aid procedure	Reason why
Ask someone to call 999 and get a first aid kit as soon as possible.	To obtain professional help as bleeding is severe.
	To expose the wound and give a clear view of it.
Do not remove the glass from the wound.	
	So that pressure can be applied on either side of the wound to try and slow down the bleeding, without pushing the glass further into the arm.
The wounded arm should be raised above the heart and supported.	
	The casualty may be feeling faint and it will be easier to elevate their arm from this position.

First aid procedure	Reason why
If the blood continues to seep through, a second dressing can be put on top of the first dressing.
