

GENERAL CERTIFICATE OF SECONDARY EDUCATION

GATEWAY SCIENCE

B624/02

ADDITIONAL SCIENCE B

Unit 2 Modules B4 C4 P4 (Higher Tier)

Candidates answer on the Question Paper
A calculator may be used for this paper

OCR Supplied Materials:
None

Other Materials Required:

- Pencil
- Ruler (cm/mm)

Wednesday 9 June 2010

Afternoon

Duration: 1 hour

Candidate
Forename

Candidate
Surname

Centre Number

Candidate Number

INSTRUCTIONS TO CANDIDATES

- Write your name clearly in capital letters, your Centre Number and Candidate Number in the boxes above.
- Use black ink. Pencil may be used for graphs and diagrams only.
- Read each question carefully and make sure that you know what you have to do before starting your answer.
- Answer **all** the questions.
- Do **not** write in the bar codes.
- Write your answer to each question in the space provided. Additional paper may be used if necessary but you must clearly show your Candidate Number, Centre Number and question number(s).

INFORMATION FOR CANDIDATES

- The number of marks is given in brackets [] at the end of each question or part question.
- A list of physics equations is printed on page two.
- The Periodic Table is printed on the back page.
- The total number of marks for this paper is **60**.
- This document consists of **28** pages. Any blank pages are indicated.

2

EQUATIONS

$$\text{speed} = \frac{\text{distance}}{\text{time taken}}$$

$$\text{acceleration} = \frac{\text{change in speed}}{\text{time taken}}$$

$$\text{force} = \text{mass} \times \text{acceleration}$$

$$\text{work done} = \text{force} \times \text{distance}$$

$$\text{power} = \frac{\text{work done}}{\text{time}}$$

$$\text{kinetic energy} = \frac{1}{2} mv^2$$

$$\text{potential energy} = mgh$$

$$\text{weight} = \text{mass} \times \text{gravitational field strength}$$

$$\text{resistance} = \frac{\text{voltage}}{\text{current}}$$

3

BLANK PAGE

Question 1 begins on page 4.

PLEASE DO NOT WRITE ON THIS PAGE

4

Answer **all** the questions.**Section A – Module B4**

- 1 Look at the diagram of a section through a leaf.

- (a) What is the name of part **X**?

Put a ring around the correct answer.

cuticle guard cells lower epidermis stomata upper epidermis

[1]

- (b) Palisade cells are labelled on the diagram.

Palisade cells are **more** efficient at photosynthesis than other leaf cells.

Write down **two** reasons why they are more efficient.

1

.....

2

..... [2]

5

- (c) (i) Water moves through vessels in the leaf during transpiration.

Write down the name of the vessels that transport water in transpiration.

Choose from the list.

cuticle

mesophyll

phloem

xylem

..... [1]

- (ii) Look at the leaf in the picture.

This leaf has yellow patches and does not photosynthesise well.

Magnesium is missing from the soil.

What substance in plants contains magnesium?

..... [1]

- (iii) Magnesium is usually taken up by plant root hairs from low concentrations in the soil.

Explain how plants can do this.

.....

 [2]

[Total: 7]

6

2 (a) Look at the food chain.

It shows the biomass at each stage.

A pyramid of biomass can be drawn to describe this food chain.

Finish the pyramid of biomass to include the caterpillars and the blue tits.

Make sure the bars are drawn to scale and **labelled**.

The bar for the cabbages has been drawn for you.

[2]

7

- (b) Farmers grow crops and produce large amounts of biomass.

This biomass is fed to cows.

Look at the diagram.

It shows all the energy transferred to and from a cow.

- (i) Look at the diagram.

What is process X?

..... [1]

- (ii) Calculate the amount of energy lost by process X.

.....

answer kJ [1]

- (iii) Some of the energy gained in food is transferred to growth and repair.

Calculate the **efficiency** of this energy transfer.

.....

answer % [2]

8

- (c) Some farmers use intensive farming methods to improve the yield of their crops.

Sometimes **pesticides** are used.

This is a food chain found in rivers.

Pesticides sprayed on fields can decrease the number of herons in rivers.

Write about how this happens.

.....

.....

.....

..... [2]

[Total: 8]

BLANK PAGE

Question 3 begins on page 10.

PLEASE DO NOT WRITE ON THIS PAGE

10

- 3 Peas can be preserved by storing them in a strong salt solution.

- (a) The peas are soaked in a strong salt solution.

Look at the statements below.

Which statement describes the way the salt solution helps preserve the peas from decay?

Put a tick (✓) in the correct box.

high temperature kills microorganisms

☐

the solution prevents microorganisms getting oxygen

☐

the solution causes microorganisms to lose water

☐

the solution is too acidic for microorganisms

☐

[1]

- (b) Preserving peas in strong salt solution can affect their texture.

This is because the pea cells change shape.

normal pea cell

pea cell in strong salt solution

- (i) Write down the name of the process that causes the cell to change shape in the strong salt solution.

..... [1]

- (ii) Write down the word used to describe the appearance of the cell in the strong salt solution.

..... [1]

- (c) (i) **Turgor pressure** provides support for a pea plant.

Explain what is meant by turgor pressure.

.....
 [1]

- (ii) Turgor pressure occurs in plant cells.

Turgor pressure does **not** occur in animal cells.

Explain why.

.....
 [1]

[Total: 5]

Section B – Module C4

4 Mr Hills is a farmer.

He grows vegetables on his farm.

(a) Mr Hills adds fertilisers to his fields.

Potassium nitrate, KNO_3 , is a fertiliser.

Calculate the relative formula mass, M_r , of potassium nitrate.

The relative atomic mass of K is 39, of N is 14 and of O is 16.

.....
.....
.....

answer [1]

(b) Potassium nitrate is made when potassium hydroxide reacts with an acid.

(i) Write down the name of this acid.

..... [1]

(ii) An acid reacts with a base.

What is the name of this **type** of reaction?

Choose from:

chromatography distillation neutralisation precipitation

answer [1]

13

- (c) One disadvantage of using too much fertiliser is that some of it runs off into rivers and lakes.

This causes **eutrophication**.

Write about eutrophication.

Your answer should include

- what happens during eutrophication
- the effects on living organisms.

.....

.....

.....

.....

.....

.....

.....

.....

..... [3]

[Total: 6]

- 5 This question is about the manufacture of ammonia, NH_3 .

Look at the flow chart. It shows the steps in the process.

- (a) In this reaction, nitrogen, N_2 , reacts with hydrogen, H_2 , to make ammonia.

Write a balanced **symbol** equation for this reaction.

..... [2]

- (b) An iron catalyst is used in this process.

What is the effect of using a catalyst on the rate of reaction and the percentage yield of ammonia?

Effect on rate of reaction

Effect on percentage yield [1]

- (c) Ammonia is a very important chemical.

Explain why.

.....
 [1]

(d) Look at the table.

It shows the percentage yield of ammonia at different temperatures and pressures.

pressure in atmospheres	percentage yield at 200 °C	percentage yield at 400 °C	percentage yield at 600 °C
100	80	22	8
200	92	40	14
300	95	56	18
400	96	67	22

(i) How does increasing the **temperature** change the percentage yield?

..... [1]

(ii) How does increasing the **pressure** change the percentage yield?

..... [1]

[Total: 6]

16
BLANK PAGE

PLEASE DO NOT WRITE ON THIS PAGE

6 This question is about water supplies.

Water purification has three stages.

(a) Complete the table to show the processes and why they are used.

process	why it is used
filtration	
.....	allows very small solid particles to settle out
chlorination	kills microbes

[2]

(b) One of the pollutants sometimes found in water is lead compounds.

Explain how lead compounds get into water supplies.

.....

.....[1]

[Total: 3]

7 Carbon can exist in different solid forms.

(a) What is the name given to different solid forms of the same element?

Choose from:

allotrope

isotope

nanotube

precipitate

answer [1]

(b) Graphite is slippery.

Explain why.

Use ideas about its structure.

The diagram may help you.

.....

..... [1]

19

- (c) Graphite is a good conductor of electricity.

Explain how graphite conducts electricity.

..... [1]

- (d) Diamond is used to make cutting tools.

Write down **two** reasons why.

1

2 [2]

[Total: 5]

Section C – Module P4

- 8 A film star walks down the red carpet.

He becomes charged.

He touches a metal pole.

The charged particles move to earth and he gets an electrostatic shock.

- (a) What are these charged particles called?

Choose from:

alpha beta electrons neutrons protons

..... [1]

- (b) Static electricity can cause shocks.

Write down one other **disadvantage** of static electricity.

..... [1]

[Total: 2]

9 This question is about radioactivity.

(a) The three types of nuclear radiation are **alpha**, **beta** and **gamma**.

Complete the table.

type of radiation	speed	description
alpha	slow moving	helium nucleus
beta		
gamma	very fast	electromagnetic wave

[2]

(b) Most elements do **not** contain radioactive atoms.

We can place these elements in a **nuclear reactor**.

They absorb **particles** in the reactor.

This makes the atoms radioactive.

(i) What is the name of the particles that are absorbed by the atoms?

..... [1]

(ii) Alpha radiation comes from the **nucleus** of a radioactive atom.

What is special about the nucleus of a **radioactive** atom?

.....
 [1]

(c) Some underground pipes carry liquids.

Sometimes they become blocked.

Look at the diagram.

Radioactive tracers can be used to find the blockage in the pipe.

Explain how.

Your answer should include

- the **type** of tracer used
- **why** this tracer is used
- how the radiation is **detected**
- **how** the blockage is found.

.....

.....

.....

.....

..... [4]

23

- (d) Radioactive materials become less active with time.

Look at the graph of the activity of radioactive material **X**.

- (i) Radioactive material **X** has an activity of 80 counts per minute.

Its activity decreases over time.

Look at the decay curve for material **X**.

What is the **half life** of radioactive material **X**?

answer days

[1]

- (ii) Material **Y** has a half life of **3 days**. It starts with an activity of 80 counts per minute.

Complete the graph.

Draw the decay curve for material **Y** for the first 6 days.

[1]

[Total: 10]

25

10 Amy builds an electric circuit.

(a) Look at the circuit diagram.

The current in the lamp is 3A.

The voltage across the lamp is 12V.

Calculate the **resistance** of the lamp.

The equations on page 2 may help you.

.....

answer..... Ω [2]

(b) Amy **increases** the voltage across the lamp to 24V.

What happens to the size of the **current** in the lamp?

..... [1]

[Total: 3]

11 **Ultrasound** is a longitudinal wave.

(a) Humans **cannot** hear ultrasound. Explain why.

.....

.....

..... [2]

(b) Ultrasound is used in hospitals for scanning.

It can detect the different layers inside the body.

Explain how.

.....

..... [1]

(c) X-rays are used in hospitals.

X-rays can show broken bones.

It is safer to scan unborn babies with **ultrasound**.

Suggest why ultrasound is used rather than X-rays.

.....

..... [1]

(d) How are X-rays made in an X-ray machine?

.....

..... [1]

[Total: 5]
