

GENERAL CERTIFICATE OF SECONDARY EDUCATION
GATEWAY SCIENCE
SCIENCE B

UNIT 1: Modules B1 C1 P1 (Foundation Tier)

TUESDAY 15 JANUARY 2008

F
B621/01

Afternoon
 Time: 1 hour

Candidates answer on the question paper.

Additional materials (enclosed):

None

Calculators may be used.

Additional materials: Pencil
 Ruler (cm/mm)

Candidate
Forename

Candidate
Surname

Centre
Number

--	--	--	--	--

Candidate
Number

--	--	--	--

INSTRUCTIONS TO CANDIDATES

- Write your name in capital letters, your Centre Number and Candidate Number in the boxes above.
- Use blue or black ink. Pencil may be used for graphs and diagrams only.
- Read each question carefully and make sure that you know what you have to do before starting your answer.
- Answer **all** the questions.
- Do **not** write in the bar codes.
- Do **not** write outside the box bordering each page.
- Write your answer to each question in the space provided.

INFORMATION FOR CANDIDATES

- The number of marks for each question is given in brackets [] at the end of each question or part question.
- The total number of marks for this paper is **60**.
- A list of physics equations is printed on page two.
- The Periodic Table is printed on the back page.

FOR EXAMINER'S USE

Section	Max	Mark
A	20	
B	20	
C	20	
TOTAL	60	

This document consists of **21** printed pages and **3** blank pages.

2

EQUATIONS

$$\text{efficiency} = \frac{\text{useful energy output}}{\text{total energy input}}$$

$$\text{wave speed} = \text{frequency} \times \text{wavelength}$$

$$\text{power} = \text{voltage} \times \text{current}$$

$$\text{energy (kilowatt hours)} = \text{power (kW)} \times \text{time (h)}$$

3

Answer **all** the questions.**Section A – Module B1**

- 1 Jermaine is worried that he may be ill.

He decides to measure his body temperature.

- (a) Describe **how** he should measure his temperature.

.....
 [2]

- (b) What is Jermaine's **normal** body temperature at rest?

answer °C [1]

- (c) Jermaine's body temperature is above normal.

Write down **one** way that his body can change to increase heat loss.

..... [1]

[Total: 4]

- 2 This article appeared in a recent newspaper.

Did some mammoths have blond hair?

Scientists have managed to extract **DNA** from the **cells** of a mammoth that has been dead for 43 000 years.

They have discovered a **gene** that codes for a **protein**.

This protein affects hair colour in humans and other animals.

The mammoth had two versions of the gene.

One is **dominant** and makes hair dark.

The other is **recessive** and makes hair blond.

Six words in the article are in **bold**.

The following are meanings of three of these words.

Write down the best word in the space next to its meaning.

(a) A chemical that makes up chromosomes

(b) A coded instruction containing a length of genetic code

(c) A chemical that is made up of amino acids

[3]

[Total: 3]

5

3 Barry thinks he might be very overweight.

(a) Write down **one** health risk Barry might face by being very overweight.

..... [1]

(b) Barry decides to go on a diet.

The chart shows the meals he eats in one day.

meal	contents	energy content in kJ	iron content in mg	vitamin C content in mg
breakfast	grapefruit and toast	1250	1.5	70
lunch	soup and a roll	1250	1.5	0
dinner	ham salad and ice cream	1500	2.0	5

(i) Which of Barry's meals contains the most iron?

..... [1]

(ii) Which of Barry's meals would be **best** to prevent scurvy?

..... [1]

(iii) Barry finds out that his recommended intake of energy is 10 000 kJ per day.

Work out what percentage of this he took in on this day.

Put a ring around the correct answer in this list.

0.4%

4%

40%

400%

4000%

[1]

[Total: 4]

- 4 Contraceptive pills can be taken by women to prevent pregnancy.

- (a) Write down the name of **one** hormone that is usually in female contraceptive pills.

..... [1]

- (b) A new method of contraception is being produced by scientists.

It is given to men and stops the production of sperm.

The men are given an injection.

This makes the man's body produce antibodies.

The antibodies attack proteins needed for sperm production.

- (i) Which system in the body is stimulated by the injection?

Put a ring around the correct answer in this list.

digestive system

excretory system

immune system

respiratory system

[1]

- (ii) Write down the name of the cells that make antibodies.

..... [1]

- (c) New treatments can be tested on animals before they are given to humans.

- (i) Suggest why new treatments are sometimes tested on animals.

.....

..... [1]

- (ii) Write down **one** other way that treatments can be tested before human use **without** using live animals.

.....

..... [1]

7

- 5 Claudia had a motor-cycle accident and had to have one of her arms removed.
This arm has been replaced by an artificial arm.

Scientists have managed to reconnect Claudia's nerves to the artificial arm.
Claudia can now control the movement of her artificial arm by thinking about it.

- (a) What type of signals pass along nerves?

Put a ring around the correct answer in this list.

chemical reactions

electrical impulses

hormones

[1]

- (b) The nerves to Claudia's arms are connected to her central nervous system (CNS).

Write down the name of **one** part of the CNS.

..... [1]

- (c) The nerves in Claudia's healthy arm contain different types of nerve cells (neurones).

Look at the list of neurones.

motor neurone

relay neurone

sensory neurone

Put a ring around the type of neurone that takes signals to Claudia's muscles.

[1]

- (d) Claudia touches a hot object with her artificial arm.

She does **not** automatically move her arm away.

Suggest why.

.....

..... [1]

[Total: 4]

[Turn over

Section B – Module C1

6 Crude oil is a fossil fuel.

(a) Crude oil is separated at an oil refinery into useful parts.

These parts are called fractions.

(i) What is the name of the process that separates crude oil?

Choose from this list.

decomposition

dissolving

fractional distillation

polymerisation

answer[1]

(ii) Two of the substances in the list are fractions that can be separated from crude oil.

Which **two**?

Put ticks (✓) in the **two** correct boxes.

carbon

☐

diesel

☐

nylon

☐

petrol

☐

polythene

☐

[2]

9

- (b) Coal, crude oil and gas are non-renewable energy resources.

Supplies of these three fossil fuels will eventually run out.

Look at the information about fossil fuels.

fossil fuel	number of years before the fuel runs out
coal	220
crude oil	40
gas	60

percentage fossil fuel use in the UK in 2005

- (i) Which fossil fuel will still be available in one hundred years' time?

..... [1]

- (ii) Which fossil fuel was used the **least** in the UK in 2005?

..... [1]

[Total: 5]

7 This question is about cooking and foods.

Look at the pictures of some foods.

apple

bread

carrot

chicken

butter

fish

(a) Write down the name of **one** food that contains a lot of carbohydrate.

Choose from the foods in the pictures.

..... [1]

(b) Write down the name of **one** food that contains a lot of protein.

Choose from the foods in the pictures.

..... [1]

(c) Write about why we often cook fish before eating it.

.....

 [2]

[Total: 4]

- 8 This question is about compounds that contain carbon.

Look at the displayed formulae.

compound **A**

compound **B**

compound **C**

compound **D**

compound **E**

compound **F**

- (a) Look at compound **A**.

How many **atoms** are there in one molecule of compound **A**?

..... [1]

- (b) Look at compound **B**.

How many different **elements** are bonded together in compound **B**?

..... [1]

- (c) Choose a compound which is a **hydrocarbon**.

Choose from **A, B, C, D, E** or **F**.

..... [1]

- (d) Which compound is an **alkene**?

Choose from **A, B, C, D, E** or **F**.

..... [1]

- (e) Which compound is a **polymer**?

Choose from **A, B, C, D, E** or **F**.

..... [1]

- 9 Callum is using a Bunsen burner.

He has the air hole open.

There is a blue flame.

In the flame the methane reacts with oxygen as shown in this word equation.

- (a) What is the name of the gas needed for methane to burn?

..... [1]

- (b) How can you tell from the word equation that complete combustion is happening?

..... [1]

- (c) Callum closes the air hole of the Bunsen burner.

Incomplete combustion happens.

The flame changes colour from blue to yellow.

- (i) A black solid is made.

What is the name of the black solid?

..... [1]

- (ii) Carbon monoxide is made during incomplete combustion.

Carbon monoxide is a dangerous gas.

Why is it a dangerous gas?

..... [1]

[Total: 4]

13

10 Nail varnish remover is used to remove nail varnish.

Finish the sentences about nail varnish removers.

Choose words from this list.

insoluble

soluble

solution

solvent

Ethyl ethanoate is a nail varnish remover.

It is a and dissolves nail varnish.

Water will not dissolve nail varnish.

This is because nail varnish is in water.

[2]

[Total: 2]

Section C – Module P1

11 This question is about heat energy.

Rajvir wants to investigate how things heat up.

He uses three metal blocks.

They all start at the **same temperature**.

Block **A** and block **B** have a mass of 1 kg. Block **C** has a mass of 2 kg.

Rajvir heats the blocks for 5 minutes.

He uses **identical** heaters.

He measures the **final** temperature of each block.

Look at his table.

block	final temperature
A	60
B	100
C	40

(a) The **unit** of mass is the kilogram (kg). What is the unit of temperature?

Temperature is measured in [1]

(b) (i) Why does block **B** reach a higher final temperature than block **A**?

..... [1]

(ii) Why does block **C** reach a lower final temperature than block **A**?

..... [1]

15

(c) Rajvir leaves the blocks for ten minutes.

The blocks cool down. They have lost heat by **conduction**, **convection** and **radiation**.

Rajvir's house loses heat in a similar way.

He reduces the heat loss through the **walls** of his house.

Complete the following sentences.

Choose from the list.

air
conduction
convection
foam
radiation
water

Heat is lost through the brick walls of the house by

The **gap** between the inner and outer brick walls (the **cavity**) can be filled with

..... This reduces the heat loss across the gap by

..... and

[2]

[Total: 5]

16

12 This question is about heat transfer and efficiency.

Tori has a radiator in her room.

The radiator is made of metal.

It has hot water inside it.

(a) Complete the following information about the radiator.

Choose from the list.

conductors

joules

metal

room

water

Radiators are made of metal because metals are good

Heat from the is transferred through the

..... into the

The amount of heat energy entering the room is measured in

[3]

17

(b) Tori thinks that a lot of energy from the radiator is **wasted**.

She thinks the radiator has a low **efficiency**.

She finds this diagram in a book.

It shows how much energy is lost from a radiator.

Calculate the efficiency of the radiator in heating the room.

The list of equations on page 2 may help you.

.....

.....

.....

.....

efficiency = %

[2]

[Total: 5]

13 This question is about wireless technology.

The router sends wireless signals to the laptop computer.

Wireless connections are used for home computers.

(a) Suggest **two** advantages of wireless connections.

1

2 [2]

(b) Radio signals can be either **analogue** or **digital**.

The number of radio programmes transmitted using digital signals has increased.

Put a (ring) around the most likely reason.

analogue signals cannot carry information

digital signals can carry better quality information

sending digital signals is cheaper

analogue signals cannot be used for TV signals

[1]

(c) **Short** distance links for computers use an electromagnetic wave.

(i) Which electromagnetic wave is used?

Choose from the list

infrared

light

ultraviolet

X-rays

answer

[1]

(ii) Name **one** other use for this type of wave.

..... [1]

[Total: 5]

19

14 This question is about ultraviolet radiation from the Sun.

Megan knows that ultraviolet radiation can harm people.

(a) How is ultraviolet radiation dangerous to people?

..... [1]

(b) Megan wants to go outside on a sunny day.

She looks at these two sun creams.

SPF means **Sun Protection Factor**.

(i) Megan uses Golden Glow sun cream.

How long can Megan safely stay in the Sun?

Complete the table below.

safe time in the Sun for Megan	
without sun cream	with Golden Glow sun cream, SPF 15
5 minutes	

[1]

(ii) She decides that Bronze Blush will be better for her in the Sun.

Suggest why.

In your answer write about

- exposure times
- risk.

.....

.....

.....

..... [3]

[Total: 5]
