<b>Tuesday 15 January 2019</b>														
Afternoon (Time: 1 hour)							Paper Reference <b>4HB0/02</b>							
<b>Human Biology</b>														
Unit: <b>4HB0</b>														
Paper: <b>02</b>														
<b>You must have:</b>												Total Marks		
Ruler														
Candidates may have a calculator														

### Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided  
– *there may be more space than you need.*
- Show all the steps in any calculations and state the units.

### Information

- The total mark for this paper is 60.
- The marks for **each** question are shown in brackets  
– *use this as a guide as to how much time to spend on each question.*

### Advice

- Read each question carefully before you start to answer it.
- Write your answers neatly and in good English.
- Try to answer every question.
- Check your answers if you have time at the end.

**BLANK PAGE**

**Answer ALL questions.**

1 Diseases have different causes and can be transmitted in different ways.

The boxes give some diseases and some features of these diseases.

Draw one straight line from each disease to its correct feature.

(6)

**Disease****Feature**

typhoid

caused by a fungus

malaria

caused by schistosoma

thrush

spread by houseflies

gonorrhoea

spread by mosquitoes

tuberculosis

sexually transmitted

poliomyelitis

lung infection

bilharzia

caused by a virus

- 2 (a) A student investigates whether it is easier to identify food by taste and smell, rather than by taste alone.

She uses this method.

- cover the eyes of ten people
- place a piece of apple or a piece of onion on each person's tongue
- ask each person to state whether it is a piece of apple or a piece of onion
- test each person 20 times
- record the number of correct responses
- repeat the investigation with each person wearing a clip to close their nostrils as well as having their eyes covered

The table shows the student's results.

Person	Number of correct responses	
	Eyes covered	Eyes covered and nostrils closed
1	18	13
2	17	10
3	14	15
4	16	13
5	19	9
6	17	8
7	12	8
8	17	10
9	15	7
10	15	7

- (i) State why the people in the investigation have their eyes covered.

(ii) The percentage of correct responses for eyes covered and nostrils closed is 50%.

Calculate the percentage of correct responses for eyes covered only.

(3)

percentage = .....%

(iii) Give three conclusions that can be made from the student's results.

(3)

1 .....

.....

2 .....

.....

3 .....

.....

(iv) State three factors that the student should keep constant during her investigation.

**BLANK PAGE**

3 (a) Excess nitrogen in animals can be excreted in three different molecules.

These molecules are ammonia, urea and uric acid.

In humans, urea is the main excretory product.

(i) Describe how urea is formed in humans.

(3)

.....

.....

.....

.....

.....

.....

.....

(ii) Table 1 gives some properties of the three excretory products.

	Ammonia	Urea	Uric acid
Solubility	very high	high	very low
Toxicity	high	medium	low
Number of molecules of ATP needed to excrete one molecule	0	4	8

**Table 1**

Using information in Table 1, explain why urea is the main molecule for nitrogen excretion in humans.

(iii) Describe the difference between urine and urea.

(3)

.....

.....

.....

.....

.....

.....

(b) Table 2 shows the concentration of urea in the blood of a person over a period of 16 hours.

For the first 8 hours the person's kidneys are working normally.

After 8 hours the person's kidneys stop working.

	Kidneys working			Kidneys not working	
Time in hours	0	4	8	12	16
Concentration of urea in blood in arbitrary units	100	100	100	150	220

**Table 2**

(i) State the part of the blood that carries urea.

(1)

.....

(ii) State two conclusions that can be made from the information in Table 2.

4 Describe the processes that move substances in and out of cells.

In your answer, include the factors that affect these processes.

(8)

Area with horizontal dotted lines for writing the answer.

(Total for Question 4 = 8 marks)

5 The diagram shows an outline of a human heart.

(a) (i) The table gives some functions of the heart.

Complete the table by giving the correct chamber, W, X, Y or Z, for each function.

(4)

Function	Chamber
receives oxygenated blood	
sends blood to the lungs	
receives deoxygenated blood	
sends blood to the body
